Mr. Corwin's age was 83 years. He had not been in good health since Christmas and for two weeks past he seemed to be gradually failing. He was only confined to the bed one day. Mr. Corwin had very many friends and will be missed greatly in the community where he has lived so many years.

Father and grandfather will be missed in the home of the son and family more than anywhere else.

Mr. Corwin was a good citizen, always ready and willing to help in any way. He leaves to mourn his loss one son, E. C. Corwin, and a daughter, Mrs. Delmer Barber of California, and five grandchildren.

The daughter was unable to be present at the funeral which was held Sunday from the home of his son and family at 2 o'clock. The Rev. F. F. Allington of North Lansing officiated. The remains were placed in the vault here at Maplewood cemetery. So much sickness and badly drifted roads kept many from attending the funeral. The family and other relatives have the heartfelt sympathy of their many friends.

### Short Course in Beekeeping.

The state college of agriculture at Cornell university, in co-operation with the federal bureau of entomology at Washington, will give a short course in commercial beekeeping at Ithaca during the week of Feb. 23. This course will be similar to the one given last year, with some important new features added.

One hundred and forty-nine beekeepers, many of them among the most extensive operators in the state, last year stayed through the entire week and passed a resolution asking for the course again. The indications are that the attendance this year will be more than double that of last year. No tuition fee is charged. All beekeepers are welcome and those wishing to attend are asked to write to George H. Rea, College of Agriculture, Ithaca, N. Y., and have their names registered for this course.

Give your physician a chance to keep you well before you call him in to cure you, advises the United States Public Health Service. An occasional thorough examination by a competent physician will save you money and prolong your life.

### A Message to the Boys.

The American boy is the product of the American school.

He is at the age then, between 15 and 20 years, when he will make himself physically strong, or weak, and form the ideals and habits that go with him through life.

It is for this reason that the United States Public Health Service has started a campaign in America to reach all of the boys between the ages of 15 and 20 years and interest them in a campaign to keep themselves physically fit. This is not with an idea of raising the boys to be soldiers, but because there is one young man in every three physically unfit, not only to be a soldier, but anything else that requires strong, vigorous manhood. This was revealed when the army had to reject one man in every three for physical disability.

Surgeon General Ireland, of the Army, and Surgeon General Braisted, of the Navy, have taken a very keen interest in this work, which has the backing of the Y. M. C. A., churches, welfare organizations, and educators throughout the United States. A letter from General Braisted follows:

My Dear Surgeon General Blue:

I have great pleasure in endorsing your movement to arouse the boys between fifteen and twenty years of age to a full sense of what they owe to themselves and the country. My message to them is:

"The habits of a lifetime are formed by what you think and do each day as young men; by the companions you choose and friends you make."

"Strong bodies, firm purposes, noble ambitions are your fortune. If you throw away your health by evil ways and soil the purity of mind and body for the amusement and excitement of the moment, you are like a man spending his capital instead of investing it."

"Work hard, play hard. Keep busy, keep clean."

W. C. Braisted,  
Surgeon General, U. S. Navy.

### Barn Burns at Moravia.

A barn on the property of Mrs. Ida Darby, in South Main street, Moravia, was burned Sunday evening with all its contents, including an Overland automobile, owned by Harold Sherman. Had it not been for the snow on the roofs, Mrs. Darby's house would also have burned as the barn stood on the west side of the house and a gale was blowing from the west. The barn on a lot adjoining belonging to Mrs. Sarah Wade, was also slightly damaged and the house was also in danger for some time. The damage to barn and contents is estimated at about \$2,500, partly covered by insurance. The automobile was also partly insured. The origin of the fire is a mystery.

Cutter; lecturer, Mrs. E. B. Cutter; chaplain, Mrs. Garfield Holden; gatekeeper, E. Hillyard; lady assistant, Mrs. Hugh Shaw; Flora, Mrs. John Halliday; Ceres, Mrs. Alson Karn; Pomona, Mrs. F. M. Upson.

### G. E. Taylor Resigns.

George E. Taylor, for the past 12 years division freight and passenger agent of the Central New York Southern Railroad company, has resigned his position which took effect Feb. 15.

Mr. Taylor went to Ithaca in 1908 to assume his duties as head agent of the freight and passenger traffic branch of the Short Line road. Mr. Taylor has stated that he has no announcement to make at present as to future plans.

### Beware the much advertised "sure cure" for disease.

W. C. Braisted, of the United States Public Health Service, warns that while experimenting, the disease often gets beyond the point where it can be cured by a competent physician.

One man in every three was rejected by draft boards for physical disability. According to the United States Public Health Service, a great many of these defects might have been eliminated and probably will be in the next generation.

There is still a lot of splendid sentiment left in the souls of men. But it requires a brief suspension of dollar-chasing to bring it to the surface.

Trouble, unlike opportunity, usually receives prompt response when it knocks. Or if it doesn't, it walks in anyway.

To squander time is just as wasteful as to squander money.

### Netting in Finger Lakes.

Feb. 13—With one faction of fishermen urging that no nets of any kind should be permitted in the Finger Lakes, and with another group writing to the Conservation Commission that the continued netting of coarse fish is desirable both from the point of view of anglers and also for the food value of fish thus obtained. Commissioner George D. Pratt has decided to hold a public hearing on the subject at which all may express their views. The hearing will take place at Gould's hotel, Seneca Falls, March 6, at 10 o'clock in the morning. At that time, those who are interested in one side or the other of the controversy, which has now existed for some time, will be given an opportunity to advance their arguments. Following the hearing at Seneca Falls on March 6, the final decision of the Commission on the subject will be announced. The lakes involved are Skanateles, Owasco, Cayuga, Seneca, Keuka and Canandaigua.

### For Better Teachers.

A standard salary scale for teachers of New York State was adopted at an organization meeting of the State Welfare League Saturday at the Court House in Syracuse.

The standard was arranged by a committee of teachers who fixed salaries on a scale commensurate with their estimate of labor. It was unanimously adopted. The new league announced its intention of making every effort to place its demands in the form of a bill before the Legislature during the present session.

The teachers went on record as favoring and desiring legislation to raise the qualifications of teachers and the quality of teaching through the state and as favoring legislation which would provide for "getting better teachers and training teachers to be better."

Published every Friday and entered at the postoffice at Genoa, N. Y., as second class mail matter.

**Dr. Finley on Rural Schools.**

"We must have as good schools for the country boys and girls as for the children who live in the city," declared Dr. John H. Finley, state commissioner of education, in an address on the rural schools of the state before a large audience in Bailey Hall, Cornell university, last week. "We cannot carry on the schools unless we increase the teachers' salaries so that they can go on living and teaching, and if we don't carry on the schools we can't carry on democracy," he asserted.

"Education will help us to produce more economically," he stated. "It is the only hope of the nation. The only question is how shall we best educate our children. We can't change ourselves very much but we can make things better for the children. A better day for the rural schools is coming, but the problem is primarily yours. Labor is presenting a program for the city child that is Utopian in its scope. It is time that the country people presented theirs.

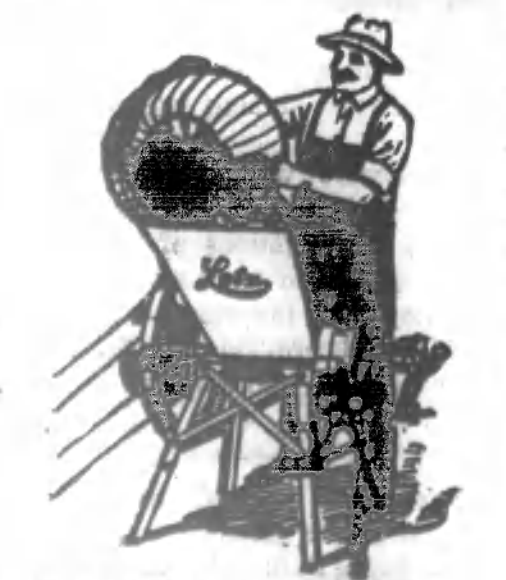

"The farmer must have leisure and opportunity to know the best there is, and his children must have educational opportunities comparable with those given the city children, many of whom came to this country as immigrants. Country teachers must be as well educated as city teachers. But there is no hope for better rural schools until the state undertakes to equalize the educational burden by taking a larger share.

"I should like to write a chapter on 'how to make people happy while paying their taxes,' he continued. "If they could only realize that the money is opening the eyes of the blind and the ears of the deaf—they would enjoy giving it as much as buying Christmas presents. I hope, too, that men of wealth will learn to put their money in the public school system instead of endowing private institutions." In this connection he mentioned one man who had complained bitterly of having to pay a school tax of a few hundred dollars, but who gave a large amount to a college endowment.

"Our motto is as good schools for the country boys and girls as for the city children," he concluded.

The Strout Farm Agency reports having sold 908 farms in New York State during the past year. 659 of the farms were sold to farmers from other states and Canada. 219 New York farmers purchased farms in other states.

**Fine Grinding? Sure!**

**LETZ FEED MILL**

excels all other mills in fine grinding. Why? Because of the wonderful Letz Rotor-Grind Plates. You should come in and take a look at that plate. You never saw anything like it to get results. The Letz will grind wild oats, wheat screenings, millet seed, grass seed, rye, barley, corn on the cob with or without cobs, kafir corn in the head, Milo makes alfalfa hay—fine as dust—practically as fine as flour without injuring the plates. One customer says he can grind shelled corn and oats into flour, for hog feed, in one grinding. With other mills he would have to grind it twice.

Letz Sell All Grains at Wholesale Prices. Letz is easily changeable, most reliable and economical. One set of rollers grinds 1000 to 2000 bushels of grain—oats into three to five times ordinary plates.

Get the Letz because when one is in a bind it gives satisfaction and sets one free.

**FEELING LIKE SCHOOL-BOY, BILLY SUNDAY Tells Post-Standard Before Visit.**

Syracuse, N. Y., Feb. 19—Rev. Billy Sunday, from Norfolk, Va., sent the following message to the Syracuse Post-Standard:

"I anticipate the visit to Syracuse with the same gladness of the school boy heading for the playground. It will be a brand new experience for me—this 10-day meeting. My plans heretofore have all operated on a seven or eight-week basis, so adjustments will be necessary.

"We will be ready to begin the meeting in Syracuse on March 5, ending March 14."

The Post-Standard is preparing to report the return campaign in its every detail. The great revivalist was pleased with the way this paper presented his smashing sermons during his last Syracuse drive. He is planning to co-operate with them now that none of the power of his condensed sermons may be lost in the rewriting.

**"THE TRAP"**

To make a choice between two men who profess to love her is one of the ordeals that many women have to face. The decision is infinitely more difficult when the men happen to be brothers. The choice is fraught with immensely greater liabilities for happiness or woe when one of the men is noble and true of heart and the other is a despicable blackguard.

That is the situation that confronted Jean Carson, a pretty school mistress of the frozen Yukon. She lived with her father waiting—waiting for the day when the wheel of fortune would turn and the gods of the Klondike would pour into their laps the yellow gold.

Ned Fallon, one of the brothers, was the truest hearted man in the Yukon, next to Dad, while Steve his brother, was a villain and a besmircher of women. Ned and her father went away on the final prospecting trip that would make or break them. Then Steve took advantage of his brother's absence and persuaded the girl to marry him—secretly, of course, for such was in keeping with his perfidious nature. And when her father returned, she could not face him. When true hearted Ned came back with fortune's smiles on him, she had to evade him and silence his love making. An ugly secret was gnawing her heart away.

For Steve had come home a few nights after their marriage and in a drunken rage had told her that he was already married to a girl in Seattle. Then Jean left him and went back to her father's cabin—before he returned. Believing Steve dead, as the result of a drunken brawl, Jean, married again. Her past comes to haunt her, the only witness to her marriage arrives to blackmail her, and Ned Fallon to claim her.

Could even the immortal gods bring happiness out of such a situation? Perhaps not—perhaps yes. But these are the facts in "The Trap" Universal's latest photodrama of the gold country, starring beautiful Olive Tell.

Following a thaw on Saturday, a blizzard struck Central New York on Sunday which was the worst storm of the winter as far as filling in the roads and tying up the railroads is concerned. The last train over the Short Line, went over the road Saturday night and the week up to the time of our going to press (Thursday afternoon) has been spent in digging out the cuts, which were completely filled throughout the length of the road. The snow plow which went over the road as far as South Lansing on Sunday and started on the return trip got stalled in a deep cut near North Lansing and did not reach Genoa until Tuesday evening. Since then it has been working its way north with difficulty. Genoa has received some mail via King Ferry. At 4 o'clock Thursday, the snow plow had reached the engine and two coaches which became stalled Sunday, between Merrifield and Mapleton. When the road will be entirely clear and trains running, it is hard to say. It is hoped that they may get a train through by tonight.

Mrs. A. H. Knapp, who was quite ill the first of the week, is much improved.

The new fox preserve will be the largest of its kind in the United States, and only rare and beautiful black and silver foxes will be bred there. The farm is to be a stock company along the lines followed by great fox farms in Nova Scotia. Forty pairs of black foxes have been bought, said to represent about \$150,000.
