#### State Agricultural Society.

The 88th argual meeting of the New York State Agricultural society will be held in the Assembly Parlor of the Capitol, Albany, Tuesday and Wednesday, Jan. 20 and 21.

If any of our readers has a of King Ferry visited school last panacea to offer for the ills attending the keeping of sheep as affected by a superfluity of dogs, he should journey to Albany and at the after noon session, Wednesday, Jan. 21, make the cure known. At that time and place an open forum will be conducted, the sole topic to be considered that of sheep in New York, with a growling undertone concerning dogs. It is a perennial subject-that of dogs versus sheepand now that sheep keeping in New York State is again popular save for the dog menace, the old State society will assign an entire session to

the consideration of this subject. The Tuesday afternoon session-Jan. 20-will be of interest to every producer and to every consumer of milk, for at that time most of the phases of the most vexatious subject of the present day will be discussed by men most familiar with the questions of its production, its transportation and its marketing with an attendant open discussion

Senator Thomas of Col orado will give the annual address.

A total of 1,183 firms were incorpor ated at the office of the secretary of state in December last. This estab lished a record for one month, Secre tary Hugo said. The receipts for the month were \$65,000, also a record. The year's total, indicating an unprece dented business revival according to Mr. Hugo, shows more than 15,000. of which 90 per cent were located in New York city.

The usefulness of the state commis sions will be "very greatly impaired if not destroyed," Lewis Nixon, public service commissioner for the first district, declared, if the Cummins rail road bill is passed as it stands. Mr Nixon specifically attacked the sec tion empowering the interstate com merce commission to review orders made by a state commission requiring

common carriers to expend money. A verdict directing the Fairmon Creamery company, a New York statcorporation doing a nation-wide busi ness, to pay \$600 in fines to the state was returned by a jury in Justice Wheeler's part of the supreme court

in Buffalo. The fines were exacted in 12 cases where it was alleged the com. pany undervalued cream sent to its stations by farmers and underpaid the owners. For each case, the company under the verdict must pay the state

Captain Robinson, commander of Troop A of the state police, stationed at Batavia, in his annual report shows that the troop covered 103,928 miles by automobile, 57,261 miles with horses, 49,113 miles by foot, 42,404 miles by train and 29,494 miles by motorcycle. Stolen property recovered amounted to \$75,313.30. During the year the troopers recovered 69 stolen automobiles. A total of 1,326 arrests were made, out of which 1,150 convictions were secured.

Growth of state banking institution: has been unprecedented, despite the great financial problems and unrest resulting from the World War, according to the annual report of George L Skinner, superintendent of banks There has been a great increase in the number of banks and the total resources at the close of 1919 were extimated at \$7,738,109,710 or \$1,151. 502,692 more than one year ago. Ac cording to the last reports available in 1914, before the outbreak of the war, the total resources of such insti

tutions were \$4,512.604.292. Higher milk production in Cattar sugus county in 1920 is the aim of Agent O. H. Chapin of the Cattaraugucounty farm bureau. Farmers will btaught to pay more attention to in creasing the average production of keeping their barns full of boarder metals.

Many of Profit-Absorbing Intermediary Agencies Avoided by Direct Marketing.

#### PREPARATION IS IMPORTANT

Essential to Fold in Head and Neck. Flesh Sides Together-Sheepskins Are Bundled Differently-Use Strong Linen Tags.

(Prepared by the United States Depart-

ment of Agriculture.) Much may be done to improve the country branch of the hide and skip industry by marketing the hides an dian residing on the Cattaraugus res pelts on a graded and selected basis. ervation, who presaged much cold this according to relative merits, and by winter, clings to his prediction and avoiding many of the profit-absorbing intermediary agencies through moring who predicted a mild open winter direct marketing by the rural producwith scarcely any snow, better take s ers. In this way country producer will not only derive more profits, but the profits will be commensurate with the quality of their products, a con dition which will prove an incentive to produce hides and skins of the bea

> possible quality. The preparation of hides and skins for market is of great importance, when they are not properly prepared and shipped they are subject to great deterioration. The farmer who has

Care in Removing Hides Reduces Ul

timate Cost of Leather. thoroughly cured a number of hides and skins by the green salting method commonly followed should place them over some elevated object, such as a barrel. They should remain there over night, to drain free of excess moisture; after which the surplus salt should be swept off or removed by thoroughly shaking the hides.

Folding the Hides. As a rule hides are folded so that the hair side is out. It is essential to fold in the head and neck on the body of the hide, flesh surfaces together, and to turn in the tail in a similar marner. Then a narrow fold on each side should be made by throwing back the body edges and legs upon the hody of the hide, flesh surfaces to gether, keeping the lines of the folds parallel. The legs should then be folded back and these lapped with the heir surfaces together, bringing the break of each fold near the middle line of the back. The side folds should then be completed by bringing together the two breaks of the folds, with the mi-ale line of the back as the main fold, in this way making one long rectaugular bundle. The butt end of the folded hide should then be thrown forward about four-fifths of the distance to the neck fold, whereupon the forward portion of the bottom lap should be folded back on top of the first fold, bringing the break of the rear fold

even with that of the fold just made. Each hide should be bundled seps rately and tied securely, about sever feet of strong cord being necessary to tie one hide bundle. A saft rope line at least one-fourth inch thick is suitable for this purpose, although reg-uler hide rope is preferable. Wire should never be used, as it is likely to

Sheepskins are bundled differently. from either cattle hides or calfakins The wool sides are laid down and the skins are folded along the median line of the back with the wool side out. As many as five skins folded in this manner can be placed in a single bundle for shipment. Two pieces of stout rope should then be wound around the pack from back to belly, one passing around the back portion just in front of the hind legs, and the other passing around the front portion immediately back of the forelegs. All shipments of hides should be tagged with good, strong linen tags with a paper finish and brass eyelets, and all addresses si-onld be done plainly with moistureeach cow, according to Mr. Chapin | resisting ink. Hides and skins should the murder of Harry Smith of Horn by, and the trial will be held at Hor provement in dairying, he said. #### Letter from California.

Sawtelle, Calif., Jan. 9, 1920. Editor Genoa Tribune, Genoa, N. Y.

Will you kindly find space in your newsy paper for a letter to our many friends in Cayuga county?

We had a very pleasant and uneventful trip of 3000 miles to southern California. This is a most delightful climate of spring, summer and fall without winter. To illustrate the diversity of climate-one can go from a dip in the surf to snow in 60 minutes. Flowers, fruits and vegetables can be gathered every day in the year, and the roads are a dream, perfect from curb to curb, lined for miles with roses and palms. One very interesting fact is ner bobs; 10 shoats; pair Moravia that oranges can be left on the trees for six months if the market is not satisfactory, and they are just as a few 4-day old calves to raise. sweet and good as if they had been picked and stored. They are all picked and marketed by citris associations, as well as other land products. We have visited some of these packing houses and it is an interesting and instructive sight. Lemons are in bearing all of the year round-ripe ones, green ones and blossoms being on the trees at the same time. We visited one orange grove of 1100 acres owned by the-Murphy Brothers of Whittier.

Whittier seems to me to be the most promising of the cities we have visited. Will Willmore, formerly of Poplar Ridge, N. Y., is located there and doing a flourishing real estate business. While there 31.45 lbs. Service fee \$15. we were also entertained at the delightful and hospitable homes of Jesse Willmore and Benjamin Farboth formerly of Poplar Ridge. The Friends of Whittier have just completed a beautiful church edifice at a cost of \$100,-000.00, the seating capacity of the main auditorium being 2000. This is splendid for a city which claims only 9000 inhabitants.

California has 800 miles of coast. We are 20 miles from Long Beach, which I believe to be the most attractive of the beach towns for homeseekers. The population is 60,-000 and is said to be the fastest growing city in Southern California. While visiting in Long Beach we took a little trip to Los Angeles harbor or San Pedro, a distance of five miles, and there saw a most interesting demonstration of sea power-four of the largest U.S. Battleships, submarines, hydroplanes and airplanes. Airplanes make the trip from San Pedro to Catalina Island daily, a distance of 30 miles. We expect to take this trip but not by air.

We visited the annual Rose Tournament at Pasadena on New Year's day. The day was ideal, and the senting teeth that beautify floats were visions of beauty, something to be remembered always. It was estimated 300,000 people lined the streets to see the pageant, which took one hour to pass.

We are making our headquarters at the pleasant and hospitable home of our cousins, Mr. and Mrs. Charles Soule, formerly of Geneva and Waterloo. This little town of Sawtelle is located in a fertile and healthful valley between the city and the sea-that is about 14 miles from Los Angeles, and 4 miles from the grand old Pacific. One can step into the main street of the town now and look from majestic snowcrowned mountains to trees loaded with semi-tropical fruit, and flowers of infinite variety. One-half mile to the north is located the Pacific Branch of the National Soldiers Home. There are about 8000 members in the Home, and the grounds are made beautiful by a great variety of flowers, shrubbery and trees, which make it a veritable paradise, and a fitting place for the declining days of these heroes of the Rebellion. The graveyard white with the stones marking over 3000 graves, lies ready to receive them into peaceful bosom of the Sierras.

We are very thankful that we can enjoy our vacation to the fullest extent, nothing to mar our pleasure. Our relatives and friends California have given ps a most and many friends.

> Yours very truly. Mr. and Mrs. F. C. Purinton. Avely lawised.

#### Farm Bureau Assistant.

By courtesy of Farm Bureau Manager Weatherby, we publish the following article with halftone, concerning W. E. Davis, the new assistant:

Mr. Davis comes from a large farm in Tompkins county which he has been running with his father since leaving the Agricultural college at Ithaca in 1915. He has had considerable experience with dairy cattle, having tested for the State in A. R. O. work and has been a

breeder of pure bred Holsteins. Mr. Davis is not new in Farm Bureau work as he has for two years been Secretary of the Tompkins County Farm Bureau association. He has also served as a director of the Tompkins County Farm company, in the Breeders' association, and as president of his local Dairymen's League. Being a farm boy with this training, he should sucmanager of the local Bureau.

Mr. Davis, with his wife and little daughter, resides at 381 Nelson St.; Auburn.

#### Recruits Needed.

Every man and woman, and child who has reached the age of reason, can help make the year 1920 better than 1919. All that is necessary is to try and do something that will count. Some can do more than others but everybody can do a little. By enlisting now immeasurable good will result, and there seems to be in all of us a growing disposition to assist. Great means are not required to do one's share because there is something everyone can do to contribute his or her mite.

#### Franklin's Birthday - To-day.

The 214th anniversary of Benjamin Franklin's birthday will be celebrated throughout the country to-day. The man who made his debut in the streets of Philadelphia eating a bun and carrying one under each arm, while his future wife looked on greatly amused, will be eulogized for his constructive work along the lines of science, philosophy

and statesmanship. Beginning life as a printer Franklin rapidly advanced into other fields and before long became a dominant figure in American politics. His early influence on the residents of Philadelphia in the matter of thrift made Franklin one of the first economic authorities to gain the public's eye.

Many of Franklin's teachings in Poor Richard's Almanac have come down to posterity as good sound doctrines for the use of future generations. It is upon these that the celebration of the anniversary has been planned. The anniversary marks the beginning of National Thrift Week, Jan. 17 to 24, an eight day program under the direction of the Y. M. C. A.

The following is the program for National Thrift Week: "National Thrift Day" or "Bank Day," "Share With Others Day," "National Life Insurance Day," "Own Your Own Home Day," Make A Will Day," 'Thrift In Industry Day," "Family Budget Day," and "Pay Your Bills Promptly Day."

On every day of this program some phase of the following creed will be emphasized: Make a budget. Keep a record of expenditures. Have a bank account, Carry life insurance. Make a will. Own your own home, Pay your bills promptly. Invest in government securities. Spend less than you earn. Share with others.

#### Young Women.

The Nurse's Training School of the Ithaca City hospital offers a course of two years and eight months to young women who have completed at least one year in a high school. Besides the regular training given by the medical, surgical and nursing staff of the hospital, pupils receive class-room and laboratory instruction from professors of Cornell University, in anatomy, physiology, pathology, bacteriology, chemistry and dietetics. #### John G. Whitten.

John G. Whitten, a lifelong resgeneral, making a total of \$19.60 on ident of this vicinity, died at his home north of this village, early Monday morning, aged 78 years. He had been in failing health for a Democrats 34, a gain of 17 for the long time, and suffered a shock Saturday morning. For many years he has been a well known beekeeper of this section.

Surviving are one son, Claude Whitten, who resides at the family home, and a brother, Henry B. Whitten of Auburn.

Funeral services were held at the home on Wednesday afternoon at 2 o'clock, Rev. R. A. Fargo officiating. C. J. Foster sang two appropriate hymns. The remains were placed in the receiving vault at East Venice cemetery.

Those from out of town in attendance at the funeral were Mr. and Mrs. Henry B. Whitten and B. B. Coggswell of Auburn, and Harry Grover of Ithaca.

#### Collector's Notice.

Notice is hereby given to the taxable inhabitants of the town of Genoa, Cayuga County, N. Y., that I, the undersigned, collector of taxes in and for said town, have received the warrant for collection of taxes for the present year, and that I will attend from 9 o'clock in the forenoon until 4 o'clock in the afternoon for 30 days from the date hereof, for the purpose of receiving payment of taxes at the following places in said Home - Furnishings town, viz:

D. W. Smith's store, Genoa, Friday, Jan. 16 and 30; W. D. White's store, Five Corners, Thursday, Jan. 15 and 29; Atwater's store, King Ferry, Wednesday, Jan. 14 and 28; EQUIPPED HOME F URNISHING ESand the balance of the time at my residence west and south of Genoa village.

William P. Shaw, Collector Town of Genoa. Dated Jan. 8, 1920.

#### YOUR SONORA PHONOGRAPH HAS COME

During Holiday time several the vicinity of Genoa wanted phonographs, large size. I am pleased to announce that I have received three large Sonoras and two smaller ones. Those who are waiting may secure them now if you come right away. I do not know the names of inquiring parties or I would personally send them word. Owing to Holiday rush of business we neglected to take names of people who wanted the Sonora. I cannot tell when I can get another lot, the onest I have were ordered some of the ones I have were ordered, some of them last June. I have orders in now, for several, but can get no encouragement as to when they will arrive, .o I take this means of announcing the arrival of these you have waited for so long.

The Sonora is in great demand because it was proven the finest tone above all other disc machines at the Panama Exposition and awarded first prize. It is the most durable machine, made and has a veritable insurance guarantee against its ever going wrong. It plays ALL makes of records without extra attachments and is the HIGHEST CLASS TALKING MACHINE IN THE PLODE IN I CHINE IN THE WORLD. It has the exclusive bulge lines—you notice in buying furniture that the highest priced is that with bulge lines. The Sonora is not merely a square box, it has the patented bulge lines which no other talking machine has. The Sonora needle will not wear out

# The Successful Farmer Raises Bigger Crops

and cuts down costs by investment in labor-saving machinery.

Good prices for the farmers' crops encourage new investment, more production and greater prosperity.

But the success of agriculture depends on the growth of railroads-the modern beasts of burden that haul the crops to the world's markets.

The railroads-like the farms-increase their output and cut down unit costs by the constant investment of new capital.

With fair prices for the work they do, the railroads are able to attract new capital for expanding their facilities.

Rates high enough to yield a fair return will insure railroad growth, and prevent costly traffic congestion, which invariably results in poorer service at higher cost.

National wealth can increase only as our railroads grow.

Poor railroad service is dear at any price. No growing country can long pay the price of inadequate transportation facilities.

This advertisement is published by the Association of Railway Executives.

# BETTE METHODS

American Agriculture Steadily Advaricing, Says Houston.

#### YIELD PER ACRE INCREASING

Intelligence in Planting, More Efficient Farm Machinery, More General Application of Disease and Insect Control Measures Are Important Factors in Producing Upward Tendency in Acreage Yields-Is General Throughout the Country.

"American agriculture, instead of deteriorating, as some people have asserted, is steadily advancing," says David F. Houston, secretary of agriculture, in his annual report. He shows, by comparing figures covering a long period of years, that the average yield of all crops for the decade ending in 1918 is about 16 per cent greater than the average for the decade ending in 1890. He also points cut that while the results of agricultural operations during the war furnish guaranty of the ability of the present farm population of the country. with the area now in farms and in the existing state of agricultural science and practice, to meet the nation's necessities for the near future if the requisite incentives are furnished, the steady increase in acre yields gives ground for further optimism.

"For many years to come the average yield per acre in the United States may be expected to increase, aithough the total output per man may dimin-

"This country has a long distance to go before it comes in sight of its limit in farm production. It can further increase its output of commodities by continuing to secure increased yields per acre. It has been estimated by experts that only about 15 per cent of the land in cultivation is yielding reasonably full returns. The opportunity is presented, as conditions warrant, to bring the remaining 85 per cent up to the point of fair yield. One them is to promote increased yields along economic lines by the further application of scientific knowledge and the adoption of improved practices. The path of progress is pretty well charted and the agricultural forces are moving along it with gratifying speed.

#### Investigational Work.

"However, the maintenance of satisfactory increases necessitates the continuance and enlargement of investigational work, particularly such as is required to insure fuller control of destructive plant diseases and insect

"The nation can further expand its output of commodities by cultivating the tillable land which at present is unused, estimated to be over 60 per cent

"It appears not to be well known," he states, "that as the result of improved processes and better practices in all sections there has been an upward tendency in the acreage yields. The increased production per acre is due in considerable measure to the practice of better agricultural methods, including more efficient farm machinery, better knowledge and fuller adoption of crop rotations, planting of crops better adapted to prevailing climatic conditions, development and adoption of varieties more resistant to plant diseases and insect pests, more general application of disease and insect-control measures, increased and more intelligent use of fertilizers, and improved efficiency in crop production generally."

The increase in acre yields, the report shows, is not confined to any particular section of the United States, but is general throughout the country. It shows, further, that the same tendency exists in the agriculture of most of the civilized countries of the world.

#### How American Farmers Lead.

Secretary Houston also points out that in comparing American yields peracre with those of European countries. "It should be borne in mind that in the United States the energy of each farmer is spread over a larger area and that although the American farmer produces less per acre he produces much more per man. The total production by the average farmer is probably greater in the United States than in any country in the world. Thus in Belgium, with its intensive system of farming, only about 5.8 acres are cultivated for each person engaged in agriculture, whereas in the United States the corresponding figure is 27 acres. Taking both acreage and yield per acre into consideration, the average American farmer produces 23/2 times as much as the average Belgian farmer, 2,3 times as much as the English, 3.2 times as much as the French, 2% times as much as the German, and over 6 times as much as the Italian."

Secretary Houston goes into considerable detail in discussing the progress of agriculture as reflected by increased acre yields. "Orop yields per acre in the United States," he says, show an upward tendency during the parable statistics. The average rate of increase for the past 25 years has been about one-half of 1 per cent a year, This gain is not readily observed from one year to another, owing to the wide yearly fluctuations in yield. But when averages for a series of years are obdained, the affect of the seation? vari-

ations is largely neutralized and the genera trend is clear.

Upward Tendency Since Nineties. "Immig the decides of the seventies and englities, when there was a vast expansion of farm area in the West and crops were grown on a more and more extensive scale, the tendency of crop yields per acre was downward. Since the early nineties, however, the movement has been upward.

"In the decade of the eightles-that is, for the ten years ending with 1890 -the average yield per acre of wheat in the United States was 11.84 bushels; for the past ten years-that is. for the ten years ending in 1918-ft was 14.87 bushels-an increase of 25

"For the ten years ending in 1890 the average yield of corn in the United States was 23.43 bushels; in the ten years ending in 1918 it was 25.81 bushels-an increase of 10 per cent.

"The oats yield in the ten years ending in 1890 averaged 25.92 bushels, but in the ten years ending in 1918 if was 32.17 bushels-a gain of 24 per cent.

"The potato crop averaged 72.97 bushels per acre for the ten years ending in 1890, and 96.84 for the past ten years-an increase of nearly one-third. "By a like comparison, it may be observed that the hay yield rose from

1.193 tons per acre to 1.432 tons, an increase of 20 per cent. "Cotton, notwithstanding the ravages of the boll weevil, increased from an average of 169.78 pounds in the decade ending in 1890, to 175,73 pounds

for the past decade, a gain of 31/2 per

"Other field crops have likewise shown greater yield. The average increase per acre of all crops in the ten years ending in 1918, as compared with the ten years ending in 1890, was

#### about 16 per cent. General in United States.

"The tendency toward enlarged production per acre is general throughout the United States; it is not due to a shifting of production from one section to another. For example, in the old agricultural state of New York the increases for the two decades mentioned above were as follows: Corn. 25 per cent; wheat, 44 per cent; oats, 21 per cent; barley; 24 per cent; buckwheat, 43 per cent; potatoes, 30 per cent; hay, 10 per cent; average of all (weighted), 18 per cent. The facts for the New England states may appeal to many as even more striking and of agricultural agencies assisting land states, the following gains are shown in the ten-year period 1909-1918 over the ten-year average for 1866-1875: Corn, 33 per cent; wheat, 63 per cent; oats, 25 per cent; barley, 27 per cent; rye, 27 per cent; buckwheat, 17 per cent; potatoes, 27 per cent; hay, 42 per cent; and all field crops, 25 per cent. And for the ten years 1909-1918 over the ten-year average for the period 1881-1890: Corn, 38 per cent; wheat, 50 per cent; oats, 24 per cent; barley, 29 per cent; rye, 44 per cent; buckwheat, 45 per cent; potatoes, 69 per cent; hay, 23 per cent; and all field crops, 26 per cent.

"Not only in the United States, but n most civilized countries of the world, the yield per acre has been tending upward in recent years. This is noted in respect to wheat in practically all wheat-growing countries.

#### DOG KILLING PAYS

Constable in One Small Town Collecting \$60 a Month.

The high cost of living casts no shadow over the life of Constable Josiah Pearson of Portvue, Pa., so long as Portvue residents keep or try to keep dogs.

A canvass of the borough by a man who wanted to borrow a hunting dog disclosed the fact that dogs still living there are being closely guarded by their owners. The reason is that Constable Pearson has established a record as a dog killer. Proceeding under the law which provides for the execution of all dogs found running loose, whether licensed or not, Portvue's energetic peace officer has sent 599 of the animals into the great beyond thus far this year.

The state authorizes the payment of \$1 a head, and Pearson, aside from his other sources of income, has made an average of \$60 a month from his activity in this field of endeavor alone, Portvue has a population of 2,000 and practically every family used to keep

#### RICH A LITTLE WHILE

Suitable Reward.

Mary, eleven years of age, was the wealthlest little girl in Sharon, Pa., for just one week. Her dreams ended late one day when, questioned by police, she admitted that on November 14 she had found a package containing \$4,270, the life savings of Mr. and Mrs. George Dzurulak, which the woman lost in the street near her home, the money falling from an apron pocket.

The girl found the package a few minutes later, ran to ber home, hid the bills in the cellar and placed 82 gold pieces in an electric flashlight. She told Chief of Police Lansdowne that she then began to plan what she

would do with her wealth. But a Sharon business man, who saw the girl pick up the package, told

## HOW SPAIN'S OLIVE OIL

IS PRODUCED AND PLACED ON THE MARKET. -In Spain there are 3,851,288 acres planted with olive trees. Of their products about 97 per cent is for oil. The yield of olive oil varies widely from year to year; in 1911 it was 421,782 metric tons; in 1912 only 63,-001 tons; in 1917, 427,836 tons; in 1918, 255,202 tons. In odd years the yield is normally greater than in even years.

Though there are oil mills, the greater part of the oil is pressed by the producers. After pressing, the pulp, called orujo, is sold to the sulphur-oil factories, the product of which is used in making soap. The residue is a brown, flaky charcoallike substance used as fuel. This generates high heat.

The quality of oil depends upon the acid content. Oil with less than half of one per cent of acid brings the highest price, but anything up to three per cent is 'considered edible.

It is contrary to law to mix olive oil with any other oil in Spain, but, of course, this does not prevent its adulteration in other countries. In the first five months of 1919 edible olive oil to the value of \$3,153,214 was exported to the United States from Malaga.

Why Varnish Tree is Dreaded. Varnish is produced in China from a tree commonly spoken of as the varnish tree, but known botanically as Rhus vernicifera, which is found in abundance in the mountains

Hupeh, Kweichew and Szechwan. The varnish is taken from the tree after it is about six inches in diameter by tapping at intervals of from five to seven years, until the tree is fifty or sixty years of age. / A goodsized tree will yield from five to seven pounds of varnish.

The natural color of the crude varnish as applied is black. It is considered the most indestructible varnish known. One peculiarity is that it hardens only in a moist atmosphere.

In China it is erroneously known among the foreign communities as "Ningpo varnish," probably because it first came into contact with foreign

# Clean Up Sale

# Opened Thursday 9 A. M.

THIS is the Special Clean-Up Sale you have been looking forward to---the most important shoe merchandising event of the winter seas on in Auburn.

WE BELIEVE IT IS GOOD BUSINESS POLICY, AFTER HOLIDAY SELLING HAS PLAYED HAVOC WITH SOME OF OUR STOCKS, TO PUT OUR STORE INTO GOOD SHAPE AS QUICKLY AS POSSIBLE. WE ARE ACCUSTOMED, THEREFORE, TO CHOOSE A TIME IN JANUARY, TO MARK DOWN THE PRICES ON STYLES THAT WE EXPECT TO DISCONTINUE AND STYLES THAT REPRESENT BROKEN LOTS---IN ORDER TO CLEAR THEM OUT OF THE WAY FOR COMING SHIPMENTS OF SPRING GOODS. ALL THESE MARKED-DOWN STYLES ARE GOOD, SEASONABLE, DESIRABLE. THEY MUST SIMPLY MOVE OUT, THAT THEIR PLACE MAY BE FILLED WITH NEWER AND FULLER STOCKS IN NEXT SEASON'S STYLES.

- - January Clearance Sale - -

Big Sale of Men's and Young Men's Suits and Overcoats, Mackinaws, Sheeplined Coats, Sweaters, Underwear and Caps.

As this is my first year in business in Auburn and all my goods are new and up-to-date, although goods have advanced a great deal since I bought my stock, and are still going up all the time, I am going to offer all my present stock at greatly reduced prices, as I am not going to carry my goods over from one season to another. Therefore take the advantage of this clearance sale as you can rely upon my advertisement as I will do as advertised.

# Sale Starts Monday, Jan. 19

and will last until

# February 1st

Come early and you will surely find a big stock to pick from and prices will surely be right. You can buy a good woolen suit of clothes during this sale for less money than you will have to pay in the spring for a cotton worsted suit. Be sure and come early to get your share of my big bargain offerings.
