West Venice.
 MARCH 21—It does not look quite so much like making garden as it did the fore part of last week. Thursday certainly was a record breaker and every one who had to be on the road said it was the worst day of the winter and some said the cold wind was the most severe they had ever been out in.
 Charles Brightman has a very sick horse.
 Mrs. Thomas Owens is still unable to walk on her lame foot and ankle which was first hurt last fall, and has bothered her at times all winter until three weeks ago she had to stop using it.
 Born, to Mr and Mrs. Mortimer J. Travis, 303 Greene Ave, Brooklyn, a daughter—Martha Elizabeth. Mrs. Travis is a daughter of J. W. Cook of Venice. Mrs. J. W. Cook is spending a few weeks with her daughter and family.
 Mr. Lord, who bought the McAllister farm, started with loads of goods from his home near Auburn on the 14th and got nearly to Sherwood where he had to put up for the night. The next day they started at 7 a. m. and by night got to David Nolan's a half mile east of Wheeler's Corners, with one horse nearly ruined by cuts while floundering in the snow drifts. It is not an easy job to move so far at best, but to have to get through such roads with wagons is dangerous.
 Master Floyd Barnes is getting over the measles nicely. Art Bennett's, Clarence Kenyon's and Thomas Welch's are entertaining them as visitors now.
 E. A. Haley and son are sawing the lumber for Walter Minard's barn which he is getting ready to build in the spring.
 Joseph Pearson was in Auburn a couple of days last week on business.
 Jesse Jacobs is moving on the Eaton farm. His brother Roy moves on the Otis farm.
 Mrs. Susie Haines is visiting in Moravia.
 Roy Holland and family, who were so sick with scarlet fever, do not gain strength very fast.
 Ed Doyle brought a fine team of horses home with him to-day that he purchased in Auburn.

Belltown.
 MARCH 20—Tom Keane is visiting in Ithaca.
 Elwood Stoughton and wife are visiting at Alpine.
 E. O. Wager recently lost a valuable horse.
 Mort Hilliard is entertaining a relative from Syracuse.
 Elizabeth Brown was home from her school over Sunday.
 L. A. Enner is getting out timbers for his new barn.
 Wm. White has moved into Geo. Ferris' tenant house and will work for him the coming year.
 John Calhoun has bought the Frank Lobdell farm and will soon move there.
 Miss Lizzie Wager is expected home this week from Fall River, where she has been spending several months.
 Michael Dempsey will work for John Bower, Erwin Snushall for Fred Young, Harry Swansbrough for Whitney Wager, J. L. Davis for C. E. Palmer, and Frank Fliun for Frank Young the coming season.

Venice Center.
 MARCH 20—Rev. P. E. Illman of Syracuse, a former pastor at this place, was the guest of Mr. and Mrs. Hiram Wallace over Sunday and preached to his old friends in the morning.
 The new church bell was placed in position on Saturday and was used for the first time Sunday morning. It seems pleasant to hear the sound of a church bell once more.
 R. O. Wyllie and wife have gone to their home near Wyckoff's and we are sorry to lose them.
 Francis Mosher and family have moved to the Murdock place which they will occupy for a time.
 March is maintaining its reputation of being a blizzardy, blustery month.
 Carroll Brightman and wife returned Sunday evening from a three weeks' visit with friends in Ithaca, Cortland and Spafford.

Will Ferris and wife spent a few days with his sisters, Mrs. Chas. Egbert and Mrs. George Lanterman at South Lansing and while there Mr. Ferris made a business trip to Ithaca.
 Robert Ferris and son have a nice stock of groceries and are soon to put in dry goods. They are doing a good business for the little time they have had the store opened.
 Mrs. J. D. Todd and son Howell were among relatives at Auburn a few days last week.
 Wm. White and family are to occupy George Ferris' tenant house this year.
 A large attendance at the rink last Saturday evening.
 Oh, have you had any warm maple sugar yet?
 MARCH 23—It is reported that Fred Swartwood will work the farm of S. C. French this season.
 Arthur French has purchased the Fred Swartwood place in this place Chas. Chittenden is making his home with LeRoy King and mother, Mrs. Leona King.
 Robert Ferris and George Ferris with their wives were in Auburn Wednesday on business, remaining over night.
 Mr. and Mrs. George Atwater received a letter from their son Asa and family in Kansas this week. He said it seemed strange to him to know that we were having such cold weather out here, while they were eating vegetables from their garden and it was warm and sun shining every day. Their little boy was playing out doors and enjoying the sunshine. Your scribe thinks if they had such weather as last week Thursday was here they would be frightened. Certainly that would be a fine place to live, especially in the winter.

POPULATION OF NEW YORK STATE

Complete Figures as Given Out by Census Bureau.

MOVEMENT IS TO THE CITIES.

Gains Shown in a Decade by Various Cities, Towns and Villages—Total Population of the State is 9,113,614 as Against 7,268,894 Ten Years Ago, Incorporated Places in One Group, Minor Civil Divisions in Another.

E. DANA DURAND, director of the census, has announced the figures in detail covering the entire state of New York. The total population of the state is 9,113,614 for 1910 as against 7,268,894 in 1900.

The detailed figures reveal in a startling degree the movement cityward. Almost every city in the state has increased, some phenomenally. The villages show a movement both ways, some upward and others downward. On the whole, there is perhaps a slight increase in the villages, which include incorporated places under 10,000. A closer analysis would probably establish the fact that the purely rural villages have decreased while those containing manufactories have gained.

It is in the farming communities where the greatest loss is shown. In almost every case the purely agricultural counties have gone backward in

E. DANA DURAND.

population. Other counties are only saved from a slump by their cities. The same condition is found, with very few exceptions, throughout the state. It is so nearly universal that this general law can be deduced. Increases are confined to urban and suburban sections. Rural communities as a whole show a falling off.

Just how marked is the divergence between the movement in city and country may be realized from the fact that the state as a whole has grown nearly 2,000,000 in population. Considering that the farming sections have decreased this means that the cities have grown more than 2,000,000.

An analysis of each county discloses the trend. Allegany, an agricultural county, has a slight decrease. Broome shows a growth of 9,000, nearly all of which is in the city of Binghamton. Cayuga county grew more than 1,000, yet the city of Auburn increased more than 4,000, showing an actual loss in the remainder of the county. The counties that have suffered loss of population are Allegany, Chenango, Delaware, Greene, Hamilton, Lewis, Madison, Otsego, St. Lawrence, Schoharie, Schuyler, Seneca, Tioga, Tompkins and Yates. These are all agricultural counties. They show decreases despite the fact that their villages or cities have in most cases increased. But the agricultural sections of other counties exhibit precisely the same condition. These counties are only redeemed from decreases by their cities.

Compare this rural decline with the growth of the great cities. New York has increased more than 1,000,000, Buffalo more than 70,000, Rochester over 55,000, Schenectady more than 40,000, Syracuse nearly 30,000 and Yonkers above that figure. Westchester county, which is in the suburban district of New York city, has gone up nearly 100,000. These figures might be continued indefinitely. The conditions apply not only to New York state, but to the middle west. Outside of new sections they obtain in the entire country.

The time has come when the American people must look these facts squarely in the face. They cannot longer be ignored or sidestepped. We have heard much of "anti-race suicide" and the "back to the farm" movement. Apparently neither has got beyond the word stage. The effects do not show in the census reports. The story there told is all the other way.

The Empire State is in a position of leadership. What is her answer? As to the lesson, it may be gleaned from the figures themselves. The reader is welcome to forget all that has been said and to study the thing out for himself. The population of incorporated places in the state is as follows:

Asters Big as Chrysanthemums

During the past ten years the Aster has become one of the most popular flowers, and is grown in most gardens.

Among these large flowering varieties are the Branching Asters; these are known almost everywhere, and no flower surpasses them for bouquets and decorative purposes.

You may learn all about Asters by sending for a free copy of Vick's Garden and Floral Guide. Send a postal card to James Vick's Sons, 143 Main Street, Rochester, N. Y.

DYSPEPSIA ON THE DECLINE.

Why anyone in Genoa should continue to suffer with indigestion when a box of SEAVER'S DYSPEPSIA TABLETS will cure, is certainly a mystery.

It certainly ought to give you confidence when you know that every 50c box of SEAVER'S DYSPEPSIA TABLETS contains 20 days treatment, and at the end of that time if you are not decidedly benefited all you need to do is to go back to the dealer and get your money.

His System of Self Defense.

"Have you ever studied the art of self defense?" said a young fellow to a man of magnificent physique and noble bearing.

The elder man looked at his questioner with a quiet smile and then answered thoughtfully:

"Yes, I have studied and practiced it."

"Ah!" said the other eagerly. "Whose system did you adopt?"

"Solomon's," was the reply.

Somewhat abashed, the youth stammered out: "Solomon's! What is the special point of his system of training?"

"Briefly this," replied the other: "A soft answer turneth away wrath."

For the moment the young man felt an inclination to laugh and looked at his friend anxiously to see whether he was serious. But a glance at the accomplished athlete was enough, and soon a very different set of feelings came over the youth as his muscular companion added, with silent emphasis, "Try it."—Christian Endeavor World.

The "Green Flash" at Sunset.

A correspondent writes that during the course of a voyage when midway between Marcellus and the strait of Bonifacio a "green flash" was seen at sunset. The sky was perfectly clear after a cloudless day, with little wind. As the sun approached the horizon the line "twixt sea and sky for about forty-five degrees each side of the sun became suffused with a rich dull rose pink, and the waves reflected a marvelous ruby shade on their surfaces facing the sunset, while the other faces were an opalescent blue or green from the upper sky. The two colors flashed and changed in a marvelous way. Such intensity of coloring had never been seen by those on board. The sun set clean into the sea, and about ten (or less) seconds after it had disappeared a bright green single flash, just like a railway signal lamp, but brighter far, met our view and rewarded our watching for it.—Symons' Meteorological Magazine.

A Good Creed.

To be able to look every man squarely in the eyes; to make friends and hold them; to keep clean of mind and body; to smile at ill fortune; to laugh at my mistakes; to frown when temptation comes availing; to be ready with a word of cheer when that word will help; to strive to develop to the utmost the heart, head and hand qualities endowed by the Ruler over all; to hold all women in respect and to love one; to weave the thread of eternal optimism into the lives of all with whom I may come in contact; to worship nature and the Great Spirit that conceived it all—in a word, to play the game of life with a steady hand and a qualmless conscience and a real desire to be of service—that is my religion. And say, if I can live up to the mark, don't you think I've corralled about all the creed that is necessary?—Backbone Monthly.

A Stream of Water.

A high pressure jet of water will bowl over a man as easily as a box of matches and leave him half stunned. It will even turn a bullet from its path. Experiments have shown that a jet of water can be produced at such a high pressure that it becomes practically a bar of iron. Swords have been blunted in attempting to cut through these extra high pressure jets. Some years ago an armed thief attempted to hold up a high official of the Bank of England in his private office. The official managed to get out of the room unharmed and locked the door. A resourceful attendant brought the fire hose. He opened the door sufficiently to insert the nozzle. In a few minutes the would be thief was picked up senseless.—Pearson's Weekly.

The Lion and the Lamb.

He was a gentleman of the old school—never mind his wrinkled brown skin and wrinkled brown clothes—and it was with the most distinguished politeness that he gave his order to the butcher man: "De madam say please to cut her two lam' chops fum de lion, suh." The butcher man jerked a loin from a hook, and his customer watched him cut into it. And a waiting woman said to herself: "Addition forty-eleven to the literature of the lion and the lamb."—Washington Star.

Gold, Silver and Oil Output.

In a preliminary review of the gold and silver industry in the United States in 1910 the United States Geological Survey presents the following data, compiled by H. D. McCaskey.

The value of the production of gold in the United States in 1910 fell below that of the record output of 1909, which was nearly \$100,000,000. Preliminary statistics compiled by the Director of the Mint indicate that in 1910 the value of the total production of gold in the United States (including Alaska and the insular possessions) was \$96,055,274, a decrease of \$3,618,186 from the value of the output in 1909, which was \$99,673,400.

Notwithstanding this decrease, which was chargeable mainly to reduced production in Alaska, Colorado, and South Dakota, the decrease in the two latter having been due to merely temporary suspension of production in important camps, the gold-mining industry was on the whole and during most of the year progressive and in a satisfactory condition.

The production of silver in 1910 in the United States, as indicated by preliminary figures compiled by the Director of the Mint, was 56,438,695 fine ounces, an increase over the production of 109 of 1,717,195 fine ounces.

The value of the silver production of 1909 was \$28,455,200, and that of 1910 is estimated at \$30,194,702, the increase therefore being \$1,739,502. The average price for silver in 1909 was 52 cents a fine ounce. In 1910 the price rose to an average of 53.5 cents an ounce.

The production of oil in the United States in 1910, as reported by D. T. Day, of the United States Geological Survey, was between 200,000,000 and 208,000,000 barrels, approximately, which is two-thirds of the world's production and several million barrels more than the whole world produced seven years ago.

PATRIOTISM.

The religion of patriotism may sound blasphemous to some ears, but that patriotism be less than religion is the conception which has prepared the way for the civic corruption of the last decade. We are to serve the state not only with our bodies as soldiers and policemen nor even with our bodies alone as voters, but, as Thoreau has put it, with our consciences as citizens. Ours ought to be a religion of patriotism, for America is not a land alone nor a country nor a people, but a hope, a vision, an ideal. What nobler religion can there be than the pure love and unselfish service of the noblest, freest commonwealth the world has known?—Rabbi Stephen S. Wise.

Suicide of H. M. Purdy.

Henry M. Purdy of Ledyard committed suicide Wednesday by hanging himself in the loft of his barn. He had been at work during the forenoon around the barn, and Mrs. Purdy last saw him about 11 o'clock. When she went to call him to dinner, she found his body hanging from the ceiling of the loft. Her calls for help brought neighbors who cut down the body and sent for Dr. Hatch of King Ferry. No cause is known for his committing the deed, except that he may have become despondent on account of poor health.

Mr. Purdy was a well known and highly respected farmer, and leaves a wife and one brother, W. P. Purdy, of Venice. His age was 65 years.

Funeral services will be held at his late home on Saturday at 1 o'clock. Rev. H. E. Crossley of Ledyard will officiate.

Our Children.

To read while lying down is not injurious to the eyes, always provided that the conditions are such as they should be. In the first place, the light should be so arranged as to fall upon that which is being read in such a manner that the print can be easily seen. The position of the body should be such that no strain comes upon the eyes in looking at the book. The trouble occasioned by reading when the light is poor and the print is difficult to see gives rise to eye-strain. The ordinary result of eye-strain is an inflammation of the lids and of the eyes themselves. The eyes and the lids, both upper and lower, are lined with a delicate membrane, like a cobweb, which carries tiny blood vessels. In that part of the membrane which covers the eyeball it is invisible if the eyes are not inflamed. Any tax upon the eyes causes the blood vessels to become enlarged, and the red appearance of the eyes is the result. This is called conjunctivitis. You ask if there is any connection between this habit and a puffy, swollen appearance above the eyes. If you mean that the upper lids of the eyes are swollen it would show that the eyes are becoming inflamed for this or some other reason. When the eyes are inflamed, ordinarily it is the lower lid which shows it most, and under the eyes becomes swollen and puffy. If however, you mean just under or above the eyebrows there is a puffiness, it is probably occasioned by some other trouble.—The Ladies' World for April.

Gumption on the Farm.

The toad is the gardener's friend.

When you don't know just what to do, go in and have a good talk with your wife.

Save your metal roofing by giving it a good coat of paint, and do it before it is too late.

The mountain of work before you can all be worked off if you just keep a cheery heart and peg away.

A man with a large family can live better where money grows, than in the city, where money goes.

Take time to look into every project that is suddenly sprung on you. Life's greatest successes come out of the most careful consideration.

Can't you fix it so that you will not have to buy any garden stuff this year? Of course you can. What any farmer can do, you can. Get right at it now and make the best garden in town. Surprise yourself and the neighbors.

Here is the formula for treating seed potatoes to prevent scab: Soak the whole seed for two hours in a mixture of one-half pint of formalin (formaldehyde) and fifteen gallons of cold water; dry the seed, cut and plant in ground that has not recently grown potatoes.

If you are planning to grow your own asparagus plants, sow the seed as soon as the ground can be worked. Palmetto is a splendid variety and you will make no mistake in planting it. Be sure to get seed from a reliable grower. Make the drills wide enough apart to permit cultivating with a horse. Thinning the plants to two inches in the drill, and thorough shallow cultivation are necessary to secure strong, well-rooted plants by fall.—From April Farm Journal.

"Is that man a good weather prophet?"

"I should say he is," replied Farmer Cornsowell. "Sometimes his weather is a few days ahead of time or a few days behindhand, but it always gets here."—Washington Star.

Wanted—Boats.

The steamboating season of 1912 holds forth no promise for a fleet on Cayuga lake. Without boats the lakeside resorts and villages cannot prosper, flourish and grow as they would with efficient and sufficient water communication. It may be that our Ithaca capitalists are awaiting the development of gasoline or gas producing marine engines of large power. Or they may be delaying until the barge canal shall supply long lines of tow, as in the sixties. Electrifying the east shore railroad and the giving to it of an hourly service would help out that side; but the west side is dependent upon a navy. And there's not a hull on the horizon.—Ithaca Journal.

—Hunting licenses for 1911 have this sentence across the back: "This license must be carried on the person and shown upon demand. Any hunter who fails to comply with these provisions violates the law and is guilty of a misdemeanor and liable to a fine."

—We publish this week the complete census report of the state of New York. We are sure THE TRIBUNE readers will appreciate the valuable information contained in this official report, and would suggest that it be saved for reference. The report may be found on pages 2, 3, 6 and 7. Remember that the first column of figures is the 1910 census and the second column that of 1900.

—Mr. and Mrs. Alphonzo Cannon returned Monday from Rochester, where they were called Saturday by the illness of their son, Chas. A. Cannon, who has been suffering from the grip. His condition is such that his physician has ordered a complete rest and change and he is at present in a sanitarium. In a few weeks, he and his family will come to Genoa and spend some time with his parents.

—From the Americus (Georgia) Times-Recorder, we learn that the Southern Printers, the large printing concern of which C. A. Ames, formerly of Genoa, is secretary and treasurer, have recently installed a New Model 5 Mergenthaler linotype and a 34x50 in. bed two-revolution Cottrell Cylinder Press, also about a thousand dollars' worth of new type and fixtures necessary to handle their large and fast-growing business. A recent order from one customer called for 500,000 folders and 200,000 letter heads. This looks like business, and Mr. Ames' Genoa friends will be glad to learn of his prosperity.

—Mrs. Delos Niles has been quite ill for the past few days.

—Nearly two thousand people listened to Booker T. Washington last Friday evening in the Burtis Auditorium in Auburn. His address on "Some Phases of the Negro Problem," was full of information concerning the work of Tuskegee Institute and of the advancement of the negro race. In the midst of his address, he referred to the help given by Miss Emily Howland of Sherwood as follows: "I would be ungrateful if I failed to mention one resident of your vicinity who has helped us for many years. I refer to that staunch friend of yours and the friend of my race, Miss Emily Howland."

Be A Booster.

Be a Booster, Mr. Johnson, Get to work and help your town; Stop your kicking at improvements That will give us all renown.

Be a Rooster, Mr. Johnson, Always ready for a shout; Why forever on the off-side When a boost will help us out?

Be a Helper, Mr. Johnson, Why not thrill the cheering crowd? They are waiting for a leader. Let us make them shout aloud.

Be a Starter, Mr. Johnson, Take the place where you belong; At the head of business progress, Where we deck-hands follow on.

You can do it, Mr. Johnson, All you need is grit and grace; We are ready to support you, Won't you please sir, start the pace?

—Fame is easily acquired. All you have to do is to be in the right place at the right time and do the right thing in the right way—and then advertise it properly.—Puck.

—V. Tremain, who for the past six months has been making a tour of the world, has been the guest of his sister, Mrs. Ida T. Swift, 14 Harrington ave., before returning to his home in San Francisco.—Cortland Standard.

—The state-wide insurance company, to be managed by Grangers only, is being planned. There are 800 Granges in the state with a membership of over 100,000. It is planned to appoint a district manager in each Grange and assemble the whole into one organization.

—President Jacob Gould Schurman of Cornell will represent the university at the celebration of the 500th anniversary of the founding of St. Andrews University in Scotland and the centenary of the founding of the University of Christiania in Norway next summer.

—At one of the churches last Sunday evening, part of the congregation was amused watching the efforts of a man to avoid having his eye put out by the tale of a pheasant which protruded about fifteen inches from the rear of a lady's hat immediately in front of him. He was heard to remark afterwards, that if he had a pair of scissors handy, he would have been tempted to clip off a foot or so from the feathery appendage.—Albion American.

—Consul General Gaulin at Marseilles, France, where great quantities of peanuts are raised, reports to the Department of Commerce and Labor at Washington that peanut exports to the United States for the year 1910 rose in value from the comparatively insignificant total of \$9,773 in 1909 to \$371,568. Large purchases of peanut oil by Americans also were recorded and the trade was the briskest in years.

—DeWitt Giles of Rochester, formerly of this village, was calling on friends in town Saturday. Mr. Giles expects to locate in Genoa this spring. . . . Mr. and Mrs. Purdy Main returned to their home in Ithaca Thursday last after a two weeks' stay at the home of his mother, Mrs. Lina Main. Mr. Main has just recovered from the mumps and is able to resume his work again. . . . This week a large maple tree was dug out of the north side of C. J. Hewitt's yard and drawn to O. D. Hewitt's and set out in front of his residence in line with the other trees there. It would take a number of years for a tree to grow its size, and by replanting it at this season, before it begins to bud, it will continue to grow as if it had not been disturbed.—Locke Courier.

The Doctor and the Sewing Machine.

I sell the "Standard Rotary," central needle sewing machines. The only sewing machine we know to be utterly free from criticism by physicians. The New York Health Journal says "When buying a sewing machine, health is of ten fold greater importance than all other features." The Standard Rotary is endorsed by Walter M. Brickner, B. S., M. D., editor in chief, and Joseph Macdonald Jr. M. D., managing editor of the American Journal of surgery. Ask your doctor if they are noted and responsible physicians. There are so many reasons why you should see this machine that I will gladly send cuts, etc., to any one who will send me a card.

Dr. Potter is a young minister who has had a remarkably successful career in Hartford and has won for himself the distinction of being regarded one of the great preachers of New England.

Suicide at Belltown.

Glenn W. Bothwell of Syracuse recently went to the home of his cousins, Mr. and Mrs. R. M. Hillard at Belltown, to spend a few weeks and recuperate, not being in very good health.

Early Tuesday morning they called him for breakfast, and not receiving any response, went to his room, only to find it empty. They supposed he must be with their son Percy, but when he came in, he had seen nothing of Mr. Bothwell. Search for him revealed that he had taken his own life, as his body was found hanging in a shed in the rear of the barn. A revolver nearby disclosed the fact that he had also shot himself, there being a bullet wound in the temple, although it is said that death was caused by strangulation. His age was about 62 years and it is thought that he was tired out and despondent, which caused him to commit the act. Coroner Atwood of Moravia was called.

The remains were taken to Syracuse Wednesday morning, and the funeral will be held at Ryan's undertaking rooms at 2 o'clock this (Friday) afternoon.

He is survived by a son, I. Glenn Bothwell, and a daughter, Mrs. Victor Starkman, both of Syracuse.

A New Version.

The politician is my shepherd; I shall not want for anything during his campaign. He leadeth me into the saloon for my vote's sake. He filleteth my pockets with cigars, my cup of beer runneth over. He enquireth concerning my family, even unto the fourth generation. Yea, though I walk through the mud and rain to vote for him, and shout myself hoarse when he is elected, straightway he forgetteth me. Although I meet him at his own house he knoweth me not—surely, the wool has been pulled over my eyes all the days of my life, and I shall dwell in the house of a chump forever.—Ex.

How Would a "Full Jewelled" Typewriter Appeal to You?

Every important bearing in an expensive watch is a small gem of a hardness not susceptible to wear. The purpose of the jewels is to insure by reduction of friction and wear, the accuracy which makes a timepiece valuable.

The first successful use of a ball-bearing typebar in a writing-in-sight machine was by the manufacturers of the New Model L. C. Smith & Bros. Typewriters

Ball Bearings not only for the typebars, but at all vital wearing points of the New Model L. C. Smith & Bros. Typewriter

ALL THE WRITING ALWAYS IN SIGHT

are made to serve exactly the same purpose as the jewelled bearings of an accurate, expensive watch. They prevent play and false motion, banish friction, and insure to the operator, for every ounce of energy applied, a full equivalent of perfect work. You demand a full jewelled watch. Why not a full ball-bearing typewriter?

DIRECTIONS FOR SPRAYING.

Suggestions For Getting Best Results Offered by Wisconsin Authority.

To spray home orchards and get the best results the following suggestions are offered by the horticultural department of the agricultural experiment station of the University of Wisconsin:

Fungous diseases and insects usually work upon trees at the same time; therefore use a spray of bordeaux mixture to which some arsenical poison has been added. Ten ounces of Paris green or three pounds of arsenate of lead added to fifty gallons of bordeaux mixture will control the codling moth or apple worm and apple scab.

Most fruit growers will find it more advisable to purchase arsenicals in the prepared form than to mix them at home, which involves much labor and care. Bordeaux mixture, which is used for spraying to prevent fungous

diseases, should be prepared at home. To get the best results a strong pressure pump with good nozzles that will throw a fine mist spray should be used.

Growers should watch the development of the trees closely at blossoming time and make a thorough application before the calyx of the apple closes. The leaves and stems of branches not fruiting should be covered with spray up to the top of the tree. The spray should be thrown from many directions so as to cover both sides of the leaves thoroughly.

As a general rule the first spraying should be made just before the buds open, with 200 gallons of bordeaux mixture, including poison for each 200 trees. The second application should be made just after the blossoms fall, with 250 gallons; the third application ten days later, the fourth two weeks after the third, and the fifth three weeks after the fourth. The last three sprayings should be made with 400 gallons of bordeaux mixture and poison.

The average farmer needs to do a lot more work with his pencil. He must know, not guess, the profit and loss.

Orchard and Garden.

Plan for a variety of vegetables. Try Swiss chard, kale, endive, Brussels sprouts and others not usually found in the home gardens. Vegetables which are liked the best by your family should be planted in succession. Such crops as peas, bush beans, sweet corn, beets and radishes should be planted at intervals of ten days or two weeks to supply a succession.

There is too much handwork in most home gardens. So much is unnecessary. A seed drill will sow in a few minutes as much as can be planted by hand in one hour. Many farmers who do not have seed drills could easily afford them. They sow more regularly and at a more uniform depth than is possible by hand.

Do not plant lima beans in the open until the ground is quite warm. The bush limas are becoming more popular and are planted at same distances as ordinary bush beans.

Take chances in planting some sweet corn ten days or two weeks earlier than usual. If it fails the loss will be slight, and if there is no mishap the gain may be great.

If some cucumbers have been started under glass a planting of seed should also be made in the open to insure a crop late in the summer and during the early fall.

Hubbard squash should be more generally grown and used on town and country tables. When properly cooked and seasoned it is a delicious vegetable and is available for use from October until June. The hills should be 8 by 8 feet apart and enriched with rotten manure unless the land is quite fertile. They may also be grown in rows eight feet apart, drilling the seed and thinning plants to about two feet.—National Stockman and Farmer.

SPRING HOTBEDS.

Simple Suggestions For Starting Things Growing at Home.

To have or not to have a hotbed must be decided on rather early in the season. March or early April should see a large one "on tap." The elaborate ones are expensive and require almost constant attention. If left to themselves they freeze by night and broil by day, and that great is the gain thereof perhaps does not greatly matter to one who gardens only in a small way. But that is a question one must decide for oneself, says the Country Gentleman.

If the one is a woman and the bed can be placed only a few steps outside the sunny window where she spends the greater part of her days sewing, reading or planning dainty dishes against the homecoming of the man the effort may be worth while. It means to uncover in the early morning before the sun reaches the bed, to shade at noon, to let in air later, to replace the glass as the sun declines, to know how and when to water and while the nights continue cold to cover at dusk with matting or even thick carpets. If you do not want to confront this trouble and the expense try a few shallow boxes covered with panes of glass in the house.

The windows of the kitchen are by all odds the best, as the air is properly dense and moist. If you have had little experience, which we are supposing you have not, do not try asters and fine flower seeds in this way—only common, easily grown seeds. The others would almost certainly "damp off," die or come up so slim and sickly that they would never amount to anything.

Or, infinitely better than the house boxes, if you possess or can easily come by an everyday window sash—even one 3 by 3 feet will do—this can be fitted on to a rough box from the grocer's and the whole set on a heap of manure where the sun will reach it early and late. With this a few radishes, lettuce and fine flower seeds can be successfully grown. Never put it in a northern exposure and do not have less than full three inches of sifted earth on top of the manure. More is better. Do not try the small bed very early. Wait until April forgets to be coy with winter; then with moderate care the small structure should make a difference of several weeks toward getting things into bearing of leaf or blossom.

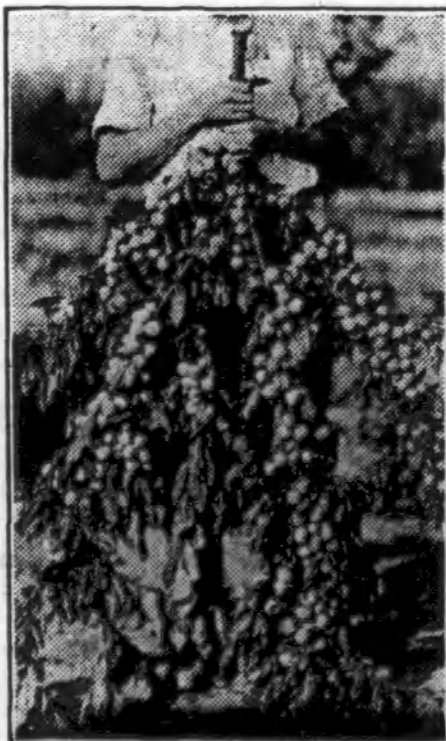

BOTTLED TIME.

Bottled time is a choice dish to serve at planting, haying and harvest season. Now is the time to preserve it. Gather it in idle days by putting everything in perfect order for the work later on.—New England Homestead.

before the product is permitted to develop is followed by fruit of superior size and quality, commanding higher prices if marketed or affording greater table delight if consumed at home. This is a point neglected too frequently by farmers and fruit growers who complain of yields that are too abundant and of inferior quality.

Don't joy ride in your savings; bite when you ought to be moving the manure in your barnyard out into the hungry fields.

Stimulating an Old Tree. An old tree that is injured needs very much to be stimulated. You can do this by cutting back well and fertilizing and cultivating it. You should give it a dressing of wood ashes and ground bone or acid phosphate, with some barnyard manure added. If possible loosen the soil around it early in the spring and if the weather is dry water it occasionally.

Mulching Berry and Flower Beds. In mulching strawberry beds, flower beds or trees and shrubs be careful to select a material for the mulch that will not "pack."

Out of the Ginger Jar.

Just how far does the kitchen range?

The housewife is known by the bread she bakes.

He that has ears to ear should now begin to think of planting corn.

"I'm so run down that I can give no more tick," sighed the alarm clock.

"I've seen brighter days," sighed the saucepan in the slovenly kitchen.

"Well, I'll be switched," angrily exclaimed the small boy; and he was.

The hotbed is well enough in its place, but few people would care to sleep in it.

There is more sound in a hollow gourd than in a full one, and the same is true of an empty head.

"Go South," says Clark.

Congressman Champ Clark of Missouri amends the famous saying of Horace Greeley, "Go west, young man; go west," and makes it read: "Go south, my boy; go south."

"The south is the place, and my advice is to go there. You won't eat as much as you do here in the north. If you do you'll die. Your clothing must be lighter and therefore less expensive. You won't have to buy fuel to speak of, and you can allow your horses and cattle to graze out of doors the year round.

"Believe me, the south is the poor man's land, and you'll live to see the day when the south is going to be the richest part of the United States."

Preserve the Maples.

The maple tree in the United States furnishes a yearly crop of 60,000,000 pounds of sugar and 3,000,000 gallons of syrup. It seems remarkable that this country does not produce more of the delicious sweets of the maple.

The cane and beet sugar, and glucose are abundant and cheap, but they are not to be compared with the exquisitely flavored maple sweets, nor with that other incomparable sweet, the honey stored by the bees. Every farmer who has maple trees can have a supply of delicious sugar and syrup. Many farmers who have no maples can set the trees in waste places, and in a few years the beautiful trees will improve the appearance of his farm and supply him with one of the most delectable sweets known to man.—New York Farmer.
