

The Genoa Tribune.

VOL. XXII. No. 17

GENOA, N. Y., FRIDAY MORNING, NOVEMBER 22, 1912.

EMMA A. WALDO

From Nearby Towns.

Five Corners.

Nov. 20—Some of the farmers are beginning to worry for fear winter has surely commenced and some of their potatoes not dug and corn in the field not husked.

Evangelistic meetings will be held in the Presbyterian church here beginning next Sunday and continuing through the following Sunday. It is expected that Rev. E. B. Evans will conduct the services next Sunday, morning and evening. Rev. F. W. Palmer, D. D., of Auburn, will have charge of the meeting Monday evening, Rev. Robert Ivey of King Ferry Tuesday evening, and for the remaining services Evangelist Mackey will have charge. Here is a rare opportunity for the people of Five Corners and this vicinity to attend meetings conducted by men of ability and wide experience, and it is hoped all will avail themselves of it. Come and benefit by these meetings. The Alexander Gospel Songs will be provided and all who like to sing are especially invited to assist. The meetings will begin at 7:15 with a short praise service.

The temperance exercises at the Presbyterian church here the 10th were very interesting. The children all rendered their parts well.

A. L. Palmer of Ithaca spent last Saturday night and Sunday with his parents, Major Palmer and wife. George Curtis has his corn all husked and without any machine but with their hands. Mr. Curtis is a hustler with his farm work.

Fred Ford's horse sprained his ankle in the barn some way, so they cannot use it.

C. G. Barger made a business trip to Ithaca last Friday.

James DeRemer, who is working at Ithaca spent last Saturday night and Sunday with his family here.

Charles Stevenson is helping Nelson Parr near Lake Ridge with his farm work.

The turkeys are roosting high these days and tremble when they see anyone coming their way.

Thanksgiving will soon be here and how the ducks and geese will fly. Mrs. Sarah Reynolds of Lansingville spent a few days recently with her sister, Mrs. J. B. Smith.

The Ladies' Aid which met at the home of Mr. and Mrs. Albert Ferris last Friday was largely attended.

Mrs. Dannie Moore was the teacher in the school here last week Tuesday. Mattie DeRemer with Mr. and Mrs. George Jump attended the funeral of John Snover at Locke.

Mrs. James DeRemer is under the care of a physician.

Mrs. Will Ferris attended the birthday party at Fred Mann's.

G. W. Atwater is recovering from his accident on Election day.

The next business meeting of the West Genoa and Five Corners W. O. T. U. will be held at the home of Mr. and Mrs. J. D. Todd next week Wednesday afternoon, the 27th. A good attendance is desired.

Mrs. Lois Smith has returned to her home in Genoa.

Have you heard about the surprise that was given our genial mail carrier, Fred Mann? His birthday being the 7th of November, his good companion planned and invited some of their neighbors and relatives.

She was quite cute in getting it up and it was a surprise in full to Fred. He has thought that no one could surprise him but he has now found out different, if he did fool his wife she came up to him this time. The neighbors presented him with a very nice large chair and the relatives presented him with a beautiful seal ring. The night was the worst one we have had for a long time as it rained all day and during the evening which kept quite a good many from going. The evening was one of pleasure and a sumptuous menu was served. Fred's countenance the next morning was all smiles.

James O'Daniels has sold the home-stand place, south and west of Five Corners, to Mr. Tharratt of Belltown.

Mrs. Clyde Mead is spending a few days with her parents in Auburn.

James O'Daniels is suffering from rheumatism this week.

A company were entertained on

North Lansing.

Nov. 19—The waiting room for North Lansing station is now in the new building across the track.

Rensselaer Miller and his daughter, Mrs. Olive DeCamp, visited in Union Springs last week.

Mrs. Dorothy Wilcox is still very sick, but better than she was last week.

A little son has come to the home of Mr. and Mrs. Carl Tarbell. He will bear the name of Robert Dumont Tarbell.

Mrs. Ada Baker is still very poorly. Addison Boyles, wife and son were Sunday guests of their parents, Mr. and Mrs. Quinton Boyles.

Dana Singer has had a large number of his Black Minorca hens stolen. Why not search the town and catch the thief, for this is not the first hen-house visited.

The W. C. T. U. dinner at the home of Mrs. Alice Singer last week Tuesday was well attended, and all had a very enjoyable time. Mrs. Shaw of Ithaca, city missionary and superintendent of jail work, was present and gave a very interesting talk on her department of work. The local Union will pack a box and send to her to aid her in the work.

Ed Fuller recently visited at the home of Rev. and Mrs. Smith at Homer.

Henry Spangler, wife and son Ivan of Moravia were over-Sunday guests of Mr. and Mrs. Benton Buck.

Miss Blanche Ireland and r. Geo. Norris, cousins of Mrs. Rightmyer, were guests of the family on Sunday. Miss Ireland is a singer and gave a solo in church and another in Sunday school.

Mr. and Mrs. Frank Singer and Mrs. Gertrude Stowell were guests of friends in Ithaca on Sunday. Mrs. Stowell and Paul remained for a two weeks' visit.

Mrs. Alson Karn and Miss Emma Lamphere visited friends near Speedsville recently.

Dana Singer has threshed his buckwheat which yielded 1,070 bushels.

Ellsworth.

Nov. 12—The James Anthony farm, recently sold at auction, was purchased by John Callahan of Auburn. Mr. and Mrs. Callahan will take possession of the farm in the spring and their son Alton, who has lived with Mr. and Mrs. Anthony, will go with them to the farm as he has half interest in it.

Mrs. Elijah Anthony has installed steam heat in her house.

Alfred Aikin and family will remove soon to Poplar Ridge, where he has a position with Gordon Montgomery.

Merritt Winn and wife drove to Genoa Wednesday last.

Mrs. Albert Gould was a week-end guest of her daughter in Auburn.

Orin Stewart of Auburn spent the past week with his grandparents here. Saturday he shot two wild geese.

Miss Florence Todd spent Sunday with Miss Anna Minard in Ledyard.

Mrs. Helen Day, who is with her daughter, Mrs. Arthur Close, is confined to her bed.

S. O. Bradley is having a severe attack of rheumatism and is with his son, E. G. Bradley, at Willots.

Harlan Bradley is in Syracuse with his last load of grapes for this season. The crop was heavy this year but they did not ripen until so late it made a very busy time to get them harvested and marketed.

Mrs. Decker is assisting Mrs. H. H. Bradley with the housework.

Friends of Mrs. Grace Bradley Palmer will be interested to know she has a little son.

Tuesday at the home of Mr. and Mrs. Robert Ferris in honor of the birthdays of S. B. Mead and Robert Ferris, which both came on Nov. 19. A very fine birthday dinner was served to the following guests: Messrs. G. L. Ferris, Albert Ferris, S. B. Mead and Charles Barger, with their wives, and Miss Sarah Ferris. Of course there was a birthday cake, just like the younger boys have, and we noticed the dates, 1841—1848 on this one. The guests were requested not to bring gifts. There were however a number of birthday cards. The company joined in wishing Mr. Mead and Mrs. Ferris many more birthdays.

Scipioville.

Nov. 20—Frank Houghton's new blacksmith shop is finished and he has moved his stock from the old shop and is working in the new one.

Mrs. F. M. Pattington was in Auburn over Sunday and attended the evangelistic meetings while there.

Born, to Mr. and Mrs. Byron Hitchcock, Nov. 14, 1912, a daughter.

The Ladies' Aid of the Presbyterian church will serve a chicken pie supper on Friday evening, Nov. 22, at the Presbyterian parsonage. All are cordially invited.

Ivan and Earle Leeson were over-Sunday guests of their parents, Mr. and Mrs. C. Leeson.

Mrs. B. L. Watkins visited her father in Auburn a few days last week.

Enice Battey of Sherwood visited her sister, Mrs. Lee Gray, last week.

Nov. 18—The Ladies' Aid society of the Presbyterian church will hold a chicken pie supper at the parsonage Friday evening, Nov. 22. A cordial invitation is extended.

G. N. Brewster is in very poor health. Mrs. Eugene Brewster of Genoa is spending a few days in town.

George Yawger and wife of Union Springs spent Saturday last at Edwin Casler's.

Lansingville.

Nov. 16—Mrs. Sarah Reynolds is visiting relatives in Greenwich, N. Y.

Mrs. L. A. Boles is quite ill, and under the care of Dr. Hatch of King Ferry.

Edward Dempsey has been having an attack of appendicitis. His mother came from Auburn to care for him. He has now returned home with her.

Mrs. Cyrenus Reynolds is spending some time in Groton.

Miss Jessie Boles is home from her school in Auburn on account of the illness of her mother.

Next Sunday, Rev. G. H. Winkworth will preach on the "Life of Gen. Booth." On Saturday evening, Nov. 23, Mr. Philo Meade of Cortland will give a Temperance Song Talk at the Lansingville church. Admission free. A collection will be taken.

A Thanksgiving service will be held at the Lansingville church on Thanksgiving day. Mr. Winkworth will preach, and afterwards the ladies expect to serve dinner for 15 cents either at the church or hall. All invited to come and bring something for dinner.

Venice.

Nov. 20—The Ladies' Aid of the Baptist church are preparing for a bazaar to be held Dec. 6.

Mrs. Frank Main of Ledyard visited her daughters in this place part of last week.

Ivan Coulson and wife of Niles visited the latter's uncle, J. C. Misner, and family last Sunday.

Mrs. Hicks made a business trip to Auburn one day last week.

R. H. Therpe, wife and son were in Ledyard Sunday.

On Nov. 16, a birthday surprise was given Vera Fish at the home of her mother, Mrs. Howard Streeter, seventeen little girls being present. A bountiful dinner was served at 2 o'clock. At 4:30 the guests departed for home, declaring they had spent a very pleasant day. Several mementos were left by which Miss Vera can remember her 12th birthday.

Beware of Ointments for Catarrh That Contain Mercury

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them.

Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists. Price 75c per bottle.

Take Hall's Family Pills for constipation.

Advertisement in the TRIBUNE.

Atwater.

Nov. 11—Mrs. Mary Mann and Mrs. Will Ferris spent Tuesday in Ithaca.

Samuel Abbey spent a few days last week at his farm in Carlisle.

David Knox and wife and Fred Ford and wife were Sunday guests at Allie Palmer's. We are glad to say Mrs. Palmer is improving.

Carpenters have commenced work on the barn of James Young.

The West Genoa Ladies' Aid society meets at the home of Mrs. Leroy Mann on Wednesday, Nov. 20.

About forty friends and relatives gathered at the pleasant home of Mr. and Mrs. Fred Mann on Thursday evening, Nov. 7, to help Mr. Mann celebrate his twenty-seventh birthday. No rumor of the party had reached Mr. Mann's ears and it was a complete surprise to him, when, upon his return from the lake he found the company gathered in the parlor. The evening was pleasantly spent with games and a bountiful supper was served. The company presented Mr. Mann with a fine rocker and his immediate family gave him a handsome seal ring. The guests departed wishing Mr. Mann many more pleasant and happy birthdays. "Fred" has made himself very popular with everyone on his rural delivery route by his pleasant, obliging manner.

East Venice.

Nov. 18—Mrs. Lois Smith of Genoa spent a few days last week at Walter Smith's.

Mr. and Mrs. Lewis Lester and Miss Cora Osborne are visiting relatives in Westport, Essex Co.

Casper Nettleton and family were guests at Siméon Signor's Sunday.

Ray Smith of Moravia has been doing some carpenter work at Ernest Parmley's the past week.

George Sisson is building a new hen house. Nettleton and Eason are doing the work.

Fay Teeter was home from Auburn over Sunday.

The next meeting of the East Venice Grange will be held on Friday evening, Nov. 29. The third and fourth degrees will be conferred and supper will be served.

Howard and Nelson Conklin of Groton spent Saturday and Sunday at Olyde Conklin's.

Perry Hodge was in Moravia on business Monday.

Miss Lena Douglas visited at Walter Smith's Sunday.

Sherwood.

Nov. 19—The W. O. T. U. of this place will hold a public meeting at the home of Miss Isabel Howland, Thursday afternoon of this week to celebrate their twenty-seventh anniversary. Rev. J. W. Walter of Poplar Ridge will deliver an address and other interesting things have been arranged for the program.

Mrs. Hetty Morrison and her sister, Lydia King, returned home a few days ago, after spending a delightful eight weeks in Rochester andodus.

Miss Agnes Howland of Catskill is a guest at the home of Isabel and Emily Howland.

Mrs. Joseph Talon of Syracuse has been spending several days with her husband at the Sherwood House.

Miss Jessie Hoxie spent last Wednesday with her friend, Miss Ella Doremus.

Mrs. W. L. Peck and son Leon of Camillus are visiting friends in town.

Poplar Ridge.

Nov. 18—A son, Dudley Chester, was born to Mr. and Mrs. Paul Ward Nov. 6.

Mrs. Riley Howland suffered a shock last Saturday. She is reported to be resting comfortably.

Miss Mary Howland returned the first of last week from the Auburn City hospital, where she had been for a few weeks.

Mr. and Mrs. Thomas Tigue and Mr. and Mrs. Wilson Mosher spent Tuesday last in Auburn.

Allen Landon is having Blue-Gas installed in his residence.

The Odd Fellows announce a supper at their rooms Nov. 22.

Belltown.

Nov. 20—E. M. Hilliard and wife are entertaining the latter's brother, E. D. Cheesman was in Auburn a few days recently.

N. J. Atwater and wife visited their daughter in Auburn over Sunday.

Mr. and Mrs. Geo. Ferris were in Auburn Saturday.

Uhas Cheesman and wife of Cortland are visiting friends at Belltown.

The Ladies' Aid of the West Genoa M. E. church will hold their annual fair and supper Wednesday afternoon and evening, Dec. 4, at the home of Fred D. Young.

The State Dairymen.

The New York State Dairymen's Association is one of the strongest of the agricultural associations in the state, and the preparation under way for its thirty-sixth annual convention in Syracuse, Dec. 10-13 would indicate no abatement of interest on the part of its members, nor lack of determination to make the December meeting the most successful in the association's history. The State Armory has been secured for the convention as the necessity is already apparent that a great hall to house the dairy machinery will be needed as the manufacturers are desirous of exhibiting as never before. Also the armory provides a convention room capable of seating one thousand people and it is expected that not far from this number of interested dairymen will attend the series of lectures. The dairy industry of the state is a big one, the annual income being approximately \$9,000,000.

The convention will embrace every phase of dairying from the production of milk to its manufacture in the form of butter, cheese, ice cream, butter milk, etc., and machinery for performing the manufacture of the different products will be on exhibition. There will be talks by men of national reputation. Also social features, such as theater parties, etc.

E. H. Dollard of Heaverton is the president of the association and W. E. Griffith of Madrid, its secretary and treasurer; either of these gentlemen will gladly supply information regarding the convention.

Resolutions.

Whereas: Death has again entered our midst and taken from our order our esteemed sister, Ethel L. Willoughby, the East Venice Grange will deeply mourn her loss and ever remember the influence of her womanly character. Therefore be it

Resolved, That though we bow in humble submission to this Divine Providence, we desire to express our sense of loss and bereavement, and to extend our sincere sympathy to the husband and friends of our deceased sister.

Resolved, That a page be set apart in our minutes to her memory and inscribed with her name and a copy of these resolutions placed therein, and that a copy be sent to the husband of the deceased and also to the local paper.

Celia Atwood,
Nina Arnold,
Frances E. Taylor.

Tompkins County Jurors.

The December term of Supreme court for Tompkins county will convene in Ithaca, Dec. 2. The grand and trial jurors have been drawn, and the following is a partial list:

GRAND JURORS.

Dryden—Clinton Trapp, Lewis Cole, Frank Burch, Frank Whitman, George Underwood.

Groton—W. D. Ranney, William D. Baldwin.

Lansing—B. F. Gibb.

TRIAL JURORS.

Groton—Merris Backus, Lee Champlin, A. B. Gibson, Lew Lane, Jay Hunt.

Lansing—Melvin Brooks, Charles C. Fitch, Fred Bailey, Elmer Ludlow, Alton Karn.

Dryden—Edmund Smith, George E. Hagford, Fred Space, Alfred Lamkins.

HOMETOWN HELPS

AMERICA MIGHT COPY THESE

English Towns and Villages Shown to Be Far Ahead of Those of This Country.

Those who read the report of the Stanley investigating committee, which arraigned the methods of the United States Steel corporation in dealing with its employees, will be impressed by an account of an English village, which was printed recently in the Yorkshire Observer of Bradford, England. The condition of the average small wage earner in the mine and factory districts of the United States is not enviable. Social surveys have afforded the general public opportunities to study the way in which these poorer Americans live. In contrast is the successful experiment conducted by the Yorkshire Main colliery at Edlington, near Doncaster, England.

Land near the mine was sold to a reputable land development company, which in turn sells or leases plots to private builders. The latter are required to conform to a sanitary and architecturally pleasing plan approved by the colliery company. The site of the village is 120 feet above the sea level. On one hand is a picketing woods and on the other hunting grounds and the picturesque cliff of Levitt Hagg. The streets are wide and have grass plots and trees in the center. There are ample yards, the business houses are confined to one particular district and space has been allotted to four churches. Two recreation grounds have been laid out with a combined area of four acres. In the center of another four acres is the village school. At present there are 850 cottages, but with an addition under way, the number will soon be increased to 1,400.—Indianapolis News.

CO-OPERATION IN RURAL LIFE

Governor of Oregon Has Appointed a Commission Which Seems to Promise Good Results.

The governor of Oregon has appointed a "Rural Life Commission" of 15 members, four of them women. Its slogan is "co-operation," which at the very outset is applied to good roads, betterment in housing, improvement in farm products and marketing, better teachers and increased pay for them, one church for one community, and a lot of things which would not be attempted by the individual. For example: Many farms have running water in the barn to save the labor of men, and none in the house for the convenience of women. This is to be remedied. Hereafter, by the plan, all farmers shall raise the same products, so that the middlemen will come to the community instead of the farmer going to the market with only his own wares. There will be uniformity of price, saving in freight and advertising, and prompt payment for goods.

In our village there were two churches on opposite corners, and a school and a grange hall similarly situated. It is proposed to close both churches, using one for a neighborhood home, with gymnasium, library, etc., and using the grange hall for preaching, Sundays.

Must Plan for Structures.

Of much more importance than plans for streets, are those for the structures on them. In fact, often expenditure for streets indirectly raises death rates. I have in mind several cities near here that have spent all of their money, bonded themselves to the utmost, and are now practically bankrupt, having exhausted their resources for expensive paving, wrote Daniel H. Burnham. Their death rates are high, yet they can do nothing for their people, because of their orgies of street building. They have no health department, no hospitals, no laboratories, no school inspection, no building inspection, no anything which runs straight to the welfare of the people, because of their street improvements.

Clerks Should Read the Ads.

The success of any retail store depends largely upon the loyalty and intelligent efforts of the clerks.

Advertising has a great deal to do with store success, is absolutely necessary, in fact, but the clerk has the last call on the customer. The effect of the advertising is tempered by the efforts of the clerk.

The ad brings the customer in—suggests quality and value—but the clerk must do the rest.

Every live clerk should believe in advertising—should read advertising—should know every morning what his own store and its competitor is advertising for that day.

"Out of Sight, Out of Mind."

"To discontinue advertising," says ex-Postmaster General John Wamsler (one of the largest advertisers in the world—and, naturally enough, one of the most successful business men), "is like taking down your sign. If you want to do business, you must let the people know it. I would as soon think of doing business without a sign as without advertising."

WISDOM OF GREAT PAINTER

Meisner's Comments Show That He Was a Philosopher as Well as a Superb Artist.

We always like to know what a great man has said about his work, and how he feels about other things that are of interest to every one. Fortunately, Meisner left a record of many of his feelings and opinions, published as his "Conversations." Of all the painters, Rembrandt was his favorite.

Among his sayings were the following:

"Let well enough alone" is the motto of the lazy.

"The man who leaves good work behind adds to the inheritance of the human race."

"The master is an artist whose works never recall those of some other artist."

"I would have drawing made the basis of education in all schools. It is the universal language."

"No artist would paint if he knew he was never to show his work, if he felt no human eye would ever rest upon it."

"I never sign a picture until my whole soul is satisfied with my work."

"To will is to do" has been my motto. I have always willed. Oh! how I regret the lost time that can never be made up. As I grow older, I work harder than ever."

From Charles L. Barstow's "Famous Pictures" (Meisner), in St. Nicholas.

REAL LAND OF THE AUTOMAT

Germany, Probably More Than Any Other Country, Makes Use of These Simple Devices.

Germany might almost be called "the land of the automat." Automatic devices of all kinds are popular and are used for a thousand purposes. At all postoffices, stamps and post cards are sold by automatic machines; at the railway stations, platform tickets and suburban tickets are sold by automats; automat restaurants, where one can secure a glass of beer, wine, or liquor, a sandwich, square meal, cup of coffee, chocolate, etc., by dropping a coin in the slot, abound everywhere. Every city of 15,000 or 20,000 population and over has from one to several hundred such restaurants. At railway stations automats sell chocolate, candy, picture post cards, and even a little kit of "first aid to the injured," containing a few drops of pain-killer, bandages, needle, thread, etc. Ten pfennigs in a slot opens the doors of toilet compartments, delivering a towel or piece of soap. A coin in a slot obtains a cigar, a tune from a mechanical music box, a pair of shoe strings, a collar button, or a visiting card.

Editorial Confessions.

The following confessions have been made by Thomas E. Thompson:

"I once had a round key check with my name on it—about the size of a silver quarter. Occasionally when at church I found myself dead broke. I would drop that key check into the hat for a bluff and the next day the brother treasurer would bring it around and I would redeem it. But one time it went out and never came back, and now I have to put in the coin or give the sign of distress.

"Once when I was on earth the first time I tried to make love to a giggly girl. She laughed me out of court and I was firmly convinced that she was not capable of a sensible, serious thought. I saw her not long ago and she looked as if she hadn't giggled or even smiled for a score of years and I was glad she treated me as a joke in the other days."—Kansas City Star.

Fit Word.

The class had been discussing recent affairs in China. A few days later the fate of a man who was eaten by his savage enemies was referred to. Anxious to enlarge the limited vocabulary of the children, the teacher asked what name was given to men who ate other human beings.

"Savages" and "man-eaters" were the only words most of them could give. At last the eagerness of a bright-eyed boy indicated that he thought he had a better word. He had. It was "Manchus."—Youth's Companion.

Nature's Sun Dial.

There is no need for clocks on the Aegean sea any day when the sun is shining. There nature does not vary, though the centuries pass. This natural time-maker is the largest sun dial in the world. Projecting into the blue waters of the sea is a large promontory which lifts its head 3,000 feet above the waves. As the sun swings round the pointed shadow of the mountain just touches one after the other of a number of small islands, which are at exact distances apart and act as hour marks on the great dial.

To Tax Bill Boards.

The newspapers of Paris the beautiful are loudly demanding that the "gigantesque panneaux reclames"—gigantic bill boards—that disfigure some of the most prominent places in the city be eliminated. They hold that the only means to obviate this barbaric invasion is for the city to tax these boards at such a high figure as to discourage the big advertisers from using them. The French parliament has already passed a law taxing bill boards in the country, where they do not add to the beauty of the landscape.

SOCIAL SERVICE

By REV. J. H. RALSTON, Secretary of Correspondence Department, Moody Bible Institute, Chicago

TEXT: I Cor. 15:2. "Christ died for our sins according to the Scriptures, and he was buried, and rose again the third day according to the Scriptures."

Never were men more confused than today respecting almost every matter of concern.

The unrest in the world of business, education, scientific investigation, politics, and no less in religion, is universal. The confidence of the former days as to dependence on Christian experience, the certitude with reference to Christian doctrine, has gone, and there is great confusion in many minds as to what the gospel message is, and this confusion is making many Christians unhappy as they contemplate their mission as bearers of the gospel to the world. The most cordially accepted interpretation of the gospel is that it is social service. Save others physically and ethically, and you save yourself. Belief in ethical culture or the work of moral and spiritual evolution working the gradual elimination of evil as now going on successfully, is with many the gospel.

But who should be the most trusted spokesman of such a subject? Would it not be one who is very near to the great teacher, Jesus? It would seem so, and we believe the Apostle Paul was just such a person, and that in the text he answered the question, "What is the Gospel?" He said he was declaring the gospel which he had preached, and immediately follows this statement with the text.

There are just two things here—the death of Christ, and the resurrection of Christ. The second of these is presented without elaboration or comment, "Christ rose again from the dead;" but in the first, we have the death of Christ with the occasion of that death: the expiation of our sins, and the confirmation of the death by burial.

Died for Our Sins.

1. Christ died for our sins. The fact of the death of Christ on Calvary is generally received, but with most persons that death was simply that of an unfortunate young man who had lived a wonderful life, had manifested unselfishness to a degree never equaled by man, but who made a mistake by letting himself fall into the hands of his enemies and being put to death.

The first cause for the death of Christ was our sins. With some persons the death of Jesus Christ has no possible connection with man's relationship to God, it is merely inspirational and of moral influence towards a better life, beautiful to behold if you could shut your eyes to the physical agony and the grewsome blood-shedding. But such is not the mission of the death of Christ in the purpose of God, nor have Paul or the other apostles so thought. The death had immediate connection with man's relationship to God—every man who is joined to Christ vitally, there died to the world and world died to him—there was the shedding of blood without which the Scriptures plainly teach there is no "remission of sins."

The brief clause, "He was buried," has far more significance than most think. It is a confirmation of the death which must be perfectly authenticated. The story of the death is quite complete, even before Joseph of Arimathea appears on the scene, and the taking of the body, its burial with all the details given in the gospels, is quite full. The sepulcher was sealed, a guard of soldiers was placed over it, thus doubly confirming the burial of a dead body.

Risen With Christ.

2. The burial paves the way for the second main proposition—the rising again of Jesus from the dead. Paul preached to the Corinthians that Jesus rose again from the dead. We must read here between the lines, and we do not question but that Paul presented the fullness of this doctrine—using it first to enforce the necessity of the new life—for "you have been risen with Christ." This refers, of course, to the spiritual resurrection, very forcefully represented in the resurrection of Jesus Christ.

But Paul also was preaching a gospel to secure a man spiritually resurrected against all future contingencies. Man must die physically, and even to the Christian the passing into the unknown hereafter is something disturbing to contemplate, but Paul gives him the glorious hope that he shall rise again from the dead even as Christ, who was the first-fruits, of them that sleep, rose from the dead.

The Gospel of the death of Christ and of the resurrection of Christ is not narrow, in fact, offers the only platform broad enough on which can be built the doctrine that man needs to deliver him from the curse of sin which is now upon him, a curse hereafter infinitely greater; and, to enable him to have the positive blessing of resurrection.

The KITCHEN CABINET

ACHIEVEMENT is not gained by chance; Fate stoops not laurels to confer; Only the men of worth advance And take the proffered crown from her.

HELPFUL HINTS.

To Make Pear Honey.—This is as delicious as quince honey, and may be used for so many nice dishes, cake fillings and desserts. Grate four pears, the hard, nice-flavored variety, add a pint of cold water and two pounds of sugar; cook until thick and it drops from the spoon like honey. Skim occasionally while boiling. This is delicious served on griddle cakes.

An unusual sandwich is prepared of the white meat of a chicken run through the meat chopper and pounded to a paste. Mix with a little whipped cream, season lightly with horseradish and salt and cayenne. Stir in a little dissolved gelatine and let stand until firm; cut in slices and arrange with rings of stuffed olives on buttered bread.

Roll ripe sliced tomatoes in cornmeal or bread crumbs and fry until brown. Serve hot.

A substitute for maple sirup: Boil twelve clean corn cobs in two gallons of water until there is only a gallon left. Drain the water and strain. To each pint of the water add a pound of brown sugar and boil until thick.

Add a few drops of vanilla to the cocoa when it is ready to serve. It enhances the flavor.

Wash your diamond ring in alcohol and it will come out bright and clean.

The white of an egg swallowed will dislodge a fish bone in the throat.

A safety pin makes a good substitute for a bodkin.

The old tops of long silk gloves make fine stockings for the baby.

Corn meal dampened with kerosene is fine for sweeping carpets and oiled floors.

A bicycle pump is good to clean out wicker chairs and carved wood hard to reach with a brush or duster.

Chloroform will remove grease from the most delicate fabric without leaving a trace.

Put you cake of chocolate through the meat grinder, then seal it in a can and it is always ready to use at a moment's notice.

Cut open a piece of garden hose and tuck a piece on the bottom of the step ladder to keep it from slipping.

VE always noticed grate success is mixed with troubles, more or less. And it's the one who does the best. That gets more kicks than all the rest."—Riley.

HELPFUL HINTS.

When hemming children's dresses on the machine, use fine cotton—No. 100 is good. When the hems or tucks are to be ripped to lengthen the skirt the fine thread will be easy to rip. A quick jerk will pull it out.

Soda, unless well sifted, will always be in streaks in food. Dissolve it in a little water before mixing.

Stir a little soda into cream that has changed a bit and it will not be noticed when used in coffee.

Pantry shelves, where there are no doors, can be kept free from dust by putting up an inexpensive window shade, which can be pulled down when the shelves are not in use, and fastened with a hook at the bottom.

When a few lemons are found to be hard and dry, do not throw them away, but cover them with boiling water and let them stand an hour or two, when they will be found almost as good as fresh ones.

To Fry Liver.—Parboil the liver in a little sweet milk, roll in crumbs and fry in butter or bacon fat. The parboiling greatly improves the flavor.

Stale cake crispied in the oven makes a nice addition sprinkled over puddings, custards and whipped cream desserts. Flavor them with a few drops of rose.

If a little rice, hominy or farina is left from a meal, mix it with an egg, a little milk, flour and baking powder and bake in gems or griddle cakes.

Very useful dress hangers may be made from a barrel hoop. Cut the hoop in three pieces, wind with white cloth and fasten a loop to hang it by in the middle.

Dust cloths are made of a yard of hemmed cheese cloth dipped in kerosene and allowed to dry. They are nearly as good as the prepared cloths.

When ironing a shirt waist, try turning the sleeves wrong side out and ironing the waist first, then finish by ironing the sleeves. The waist can be ironed about the shoulders so much easier this way.

Cut the rind from ham and bacon with a pair of shears. It will waste much less than trying to do it with a knife.

Auction.

The undersigned will sell at auction at her home, 1 mile east of Lansingville, and 3 miles north of Ludlowville, on Tuesday, Nov. 26, beginning at 9:30 o'clock, property as follows: 4 horses, farming implements of all kinds, farm wagons, 2 buggies 1 nearly new, cutter, harnesses, etc., saws, scales, potato crates, quantity oak and basswood lumber, large quantity household goods including bedroom suits, beds, springs and mattresses, stands, tables, dining table and chairs, rockers, range, 3 stoves, lamps, couch, hand carved rosewood old time parlor suite, dishes, bookcase and writing desk, washing machine, tinware, glass ware, etc. Lunch served at noon.

Mrs. I. A. Underwood.

C. D. Robinson, auctioneer. w2

The Maryland Anti-Saloon League offered a prize of five hundred dollars last year for the best essay on what it costs the city of Baltimore to get a million dollars of revenue from liquor licenses during each year. Dr. Straton, a Baptist minister, won the prize. His essay contained facts and figures showing that the city would save fifty eight million dollars for better purposes if it gave up the one million for licenses, and suppressed all the saloons. Even on the business end of the argument, liquor is on the wrong side—very naturally, since the loss of a community can never be its gain.

Look for the special Thanksgiving sale adv. of Saperstein, the Auburn clothier. Mr. Saperstein has secured the services of Mr. Howard J. Lindsey, who formerly ran the H. J. Lindsey Co. store of Auburn, and they would appreciate a call from any of the local townspeople. The number is 56 State street, Auburn. Adv.

Our Mineral Productions.

The great volume of the mineral production of the United States, its tremendous increase during the last few years, and the wide distribution of the important minerals were indicated in a recent address by George Otis Smith, Director of the United States Geological Survey. The twelve most important mineral products in the United States, in order of value of annual output, were stated by Mr. Smith to be coal, iron, clay products, copper, petroleum, gold, stone, natural gas, cement, lead, silver, and zinc. "For certain of these minerals," he said "the Geological Survey presents estimates of the supply from which the nation's needs are to be met. For others, especially clay products and cement, the question of the supply of raw material from which they are produced is of little moment compared with that of the availability of the fuels useful for the processes of manufacture."

"Of nearly equal importance with the factor of abundance of these mineral resources is that of distribution. In the first place, the widespread distribution of the raw material makes possible an industrial nation in which every State has some share in the mineral production. Only four States had a mineral output last year valued at less than \$1,000,000, and ten States had a production valued at over \$50,000,000 each. Again, no State or section appears to have a monopoly of the mineral industry. While Pennsylvania, with its total mineral production more than one-fourth that of the whole country, leads in coal, cement, and stone by large margins, another State, Minnesota, leads in iron ore; another, Arizona, in copper; another, Ohio, in clay products; California in petroleum; California in gold; Missouri in both lead and zinc; and Nevada in silver."

Why did Noah and his family run no risk of starvation in the ark? Owing to the quantity of preserved pairs they took with them, and the perfect jam they always had on board.

Many Children are Sickly.

Mother Gray's Sweet Powders for Children Break up Colds in 24 hours, relieve Feverishness, Headache, Stomach Trouble, Teething Disorders, and Destroy Worms. At all druggists, 25c. Sample mailed FREE. Address, Allen S. Olmsted, LeRoy, N. Y.

DE MONTLUC A TRUE GASCON

Character of Romantic Soldier illustrated by an Incident During the Siege of Sienna.

Blaise de Montluc was a soldier and a marshal of France who fought through half the sixteenth century. Like a true Gascon, as he was, he added to his great physical qualities courage, high spirits and an unquenchable gaiety, which distinguished him above soldiers of a graver mold. He was the veritable captain of his soul. In the Italian wars Blaise de Montluc commanded the defense of Sienna during the prolonged siege. When the town was reduced to a few ounces of bread daily, Blaise was overcome with sickness, and had himself carried about in a chair muffled up in furs.

But perceiving that the inhabitants, especially the women, were "thus rendered apprehensive of their fate should he die,"—so runs the excerpt from De Montluc's "Commentaries,"—"he called for a pair of crimson velvet breeches, laid over with gold lace, very finely cut, for they were made at a time when he was forsooth in love. He put on a doublet of the same, and a shirt of crimson silk and gold twist; then a buff collar over which he put his arms, very finely gilt."

He was at that time wearing gray and white, "in honor of a fair lady to whom he was a servant when he had leisure." So he put on a hat of gray silk, with a gray silver hatband, and a plume of heron's feathers set with silver spangles.

He also put on a short cassock of gray velvet, garnished with "little plates of silver at two fingers' distance from one another, and lined with cloth of silver, all open between the plates."

Then he "rubbed his face with Greek wine till he brought a little color into his cheeks, and drank a small draught with a little bit of bread."

"He then looked at himself in the glass, strutted before his officers, though he had not the strength to kill a chicken, and rode through the town to the great comfort of all beholders."—Youth's Companion.

HE COULDN'T TAKE THE JOB

Notorious Cracksmen's Explanation of His Reason for Refusing an Easy Part in Play.

An American philanthropist made a business of getting jobs for men just out of jail. A notorious cracksmen came to him with a letter of introduction from the clergyman.

"I've the very thing you want," said the philanthropist, when the jail-bird had dilated adequately and with pride upon his exploits. "I'll see my friend Briggs. Come around tomorrow morning."

The cracksmen, encouraged by the prospect of honest work, appeared promptly at the appointed hour.

"You're to go to work at once," said the philanthropist. "My friend is producing a melodrama. In it is a scene where a burglar enters the room and cracks a safe. It'll only take you a few minutes, and you don't have to speak a word—just execute the job with the minute detail that will make it look real. Your salary will be \$50 a week."

The convict dolefully shook his head. "Sorry I can't take the job, boss."

"Can't take it? Why, it's the chance of your life."

"Can't help it, boss; I promised my mother I'd never go on the stage."

Bad Effects of the X-Ray.

After a great discovery has been made in medicine and practitioners have enthusiastically entered on the use of the new thing it usually follows that the loudly hailed panacea is not all that it was thought to be. Dr. A. Ravogli, in the Journal of the American Medical Association, discloses some of the injurious effects of the X-ray as a therapeutic agent. He describes lesions produced by its use and of a case of cancer following its use in lupus. He shows that while this powerful physical remedy may often be used with advantage, the greatest care must be observed and that many patients have suffered through its use by inexperienced office attendants.

If you have anything to sell, if you want anything, have lost or found an article, make it known through a Special Notice in THE TRIBUNE.

HOME TOWN HELPS

NOT ALWAYS BEHIND EUROPE

Many of America's Big Centers of Population Take the Lead in Some Matters.

New York City alone secure a larger revenue from land values than do the much-heralded "unearned increment" taxes of all the cities of Germany and all the taxes of the revolutionary Lloyd George budget of 1909 combined. The total collections of New York City from this source amount to approximately \$60,000,000 a year. I think it may fairly be claimed that we have made more progress in local taxation than have any cities in the world.

It must be remembered, too, that many activities of the American city are efficiently performed. Our library systems are models. In this we have been pioneers. The rapid development of public and private libraries, the extension of branches, the opening of reading rooms and library centers, the use of pictures and children's departments show the possibilities of our municipal democracy—when the laws of the state permit it to grow as it will.

Commissions come to America to study our library methods just as commissions go from this country to Europe to study their municipal achievements. The park systems of our cities are of the same high order. Our development in recent years has been phenomenal. Not only are our parks generous in area, but they have been laid out by experts in a far-sighted way. The Boston system is said to be the most comprehensive of any in the world, while those of Chicago, Cleveland, Philadelphia, Baltimore, Washington, Kansas City, Denver, and a score of lesser cities compare favorably with those of any cities of Europe.

America, too, led the way in playground development, as well as in the wider use of the schoolhouse and the social center. The exhibits of the American city in these activities at the Berlin Town Planning exposition were accepted as in advance of those of Europe.

From the very beginning our fire departments have been honestly and efficiently administered. These, too, have been models for foreign cities. For the most part, they have been free from the spoils system. Merit has been recognized in the selection of chiefs. New appliances have been rapidly introduced and an esprit de corps has been created like that of the army and the navy.—F. C. Howe in Scribner's Magazine.

WITH AN EYE TO THE FUTURE

Manner of Laying Out the Streets of a New Town Should Be Most Carefully Considered.

For outlying districts, narrow, winding, or diagonal streets make it possible to spend more on the sanitation of the homes, declares a man who has made a study of city planning. Where traffic of the future promises to be dense and a wide street may at some time be wise, in the intervening years a narrow paved area, bordered by grass and trees, is good economy, good sense, and good health.

As between rectangular streets exclusively and a combination in which some of the streets are diagonal and some rectangular, Robinson says aesthetics, sanitation, and convenience all favor the latter.

In Vienna the crowds are handled with less inconvenience than in any other city, and there the cars come in on diagonal streets to the Rigstrasse, which they follow around to deliver their passengers as near as possible to their destinations.

Robinson says: "The two diagonal streets, Broadway and the Bowery, in New York saved for the city breathing spots like Madison and Union squares—space out of reach if condemnation had been required."

Utilization of Vacant Lots.

For several years the City Beautiful page has advocated the use and beautification of vacant city lots, calling attention to the success attained in eastern cities through the work of Vacant Lot associations, etc. The problem now seems near to solution. The various schools of the city have extended their school garden work to near-by unused property, and if this movement does not culminate in the appropriation of all vacant lots it will at least call attention to the importance of control of one of our greatest eyesores—numberless weed-grown, rubbish-strewn vacant lots.—Los Angeles Times.

Weeds in the Walks.

For weeds in pavements or gravel walks, make a strong brine of coarse salt and boiling water, put the brine in a sprinkling can and water the weeds thoroughly, being careful not to let any of the brine get on the grass, or it will kill it, too.

Worth Thinking Over.

What a simple matter it would be to clean up the city if everybody would do his part without depending on his neighbor to begin the work first! That is, assuming, of course, that the city authorities would do their part.

Farm Bookkeeping.

The fact that there are 6,400,000 farmers in this country, each of whom is utilizing land, labor and capital as a means of deriving an income is sufficient reason for the use of farm bookkeeping.

Farming is a business the same as banking or running a department store. It is a business which involves the production and sale of several kinds of products. Two important points must be considered: First, What does it cost to produce these products? Second, By selling at market prices, what profit is made on them?

The farmer should receive interest on his capital as well as wages for his labor, but owing to the lack of proper records few farmers know what wages they actually receive. There is reason to believe that the majority of farmers are really living off the interest of their investments rather than on the profits of their farms. The problem of the farmer is to meet conditions on his own farm in a way which will give him the greatest net returns for his labor and the use of his capital. Sypher's Farmers' Directory and Account Book will solve this problem in a few years and put you on easy street. Each book is good for 20 successive year's business, price \$2.50. Next time you are in town step in and examine this book.

NEWS for the YOUNG PEOPLE

GOOD TRICK WITH SCISSORS

Something That Has Puzzled Many People and Requires Practice to be Done Quickly.

This is something that has puzzled many people. The trick is to place your little fingers through the handles of a pair of scissors, palms up, and then twirl the scissors round toward you and bring them up in front in such a way that the points will be upward, as shown in Fig. 3. If you don't know the secret they will come up with the points downward instead. The trick is in the way you manage the scissors just as you flip them over; if you leave your fingers in the handles the scissors will come up with the points down. In order to make them come points up you have to take your fingers out of the handles momentarily and let the scissors turn a little between the palms of your hands and then put your fingers back through the other way. The principle

The Way It's Done

can best be followed by trying it with a pair of scissors. First stick your fingers through the handles, with the scissors points down and your palms facing up, as in the top picture. Then by a movement of the hands you can force the scissors upward and around till the points are near your chest, as in Fig. 2. Now is the time to take your fingers out for an instant. You continue the rotation by holding the handles between your palms and put your fingers back through from behind, thus allowing the points of the scissors to come up when the hands are placed back to back as in Fig. 3. It must be practiced so it can be done quickly.

HOW TO MAKE STEEL FLOAT

Needles Held on Surface of Water by "Tension" Just as Skip-Jacks Run About on Ponds.

Will steel float on water? Ask this question in a crowd and almost everybody will say "no." Then

Making Steel Float.

go ahead and prove that steel will float. Take a glass full of water and some fine steel needles, perfectly dry. Lay the needles carefully on the surface of the water one at a time. If you are careful enough about it they will float. The needles are held up by the "surface tension" of the water, just as are the skip-jacks that run on the surface of ponds.

Juvenile Books a Century Ago.
Does the modern child count his blessings in the matter of Christmas books? What would he say if, instead of one of the healthy, brightly written stories that now crowd the booksellers' windows, he received a copy of one of the books for juveniles in vogue a century ago? The very titles of some of these old volumes would rouse the back of present day youth—"The Advantages of Education as Elucidated in the History of the Wingfield Family," Elizabeth Ann Dove's "Tales of My Pupils, or, an Attempt to Correct Juvenile Errors;" S. W.'s "A Visit to a Farm; or, an Introduction to Various Subjects Connected With Rural Economy" (this reached a fifth edition in 1811), and Sandham's "Perambulations of a Bee and a Butterfly, in Which Are delineated Those Smaller Traits of Character Which Commonly Escape Observation."—London Chronicle.

Safety Valve for Vesuvius.
An Italian scientist proposed to supply a safety valve for Vesuvius by boring a tunnel in the base of the mountain and letting the lava escape into the sea. His idea is to bore the tunnel while the crater is in a state of calm, and he believes that when the volcano becomes active such a channel would be sufficient to carry away the lava, says Popular Mechanics. His whole proposal, however, is not to let the lava escape altogether, but to run it into molds and make it into blocks for use in the streets and quays of Naples.

The KITCHEN CABINET

'T'S the songs ye sing
An' the smiles ye wear,
That's a-making the sun
Shine everywhere."

SEASONABLE DISHES.

Cabbage Salad.—Shred very fine a small head of cabbage, add a chopped onion, seasoning of salt and pepper, then pour over the vegetable the fat from a slice of fried, diced salt pork, the little brown pieces of pork are an addition to the salad. Heat a half cup of vinegar boiling hot in the frying pan in which the pork was cooked, and pour over the cabbage.

Heidelberg Cabbage.—Fry two slices of diced bacon; when brown add a chopped onion and cook until brown, then add half a cup of vinegar, a teaspoonful of salt and a few dashes of red pepper. Add a small head of shredded cabbage, cover and cook slowly for two hours.

Flower Salad.—Scald ripe tomatoes of small, uniform size, then peel and chill thoroughly. With a sharp knife cut the tomato into points, beginning at the blossom end, then press open, remove the seeds as much as possible and fill with seasoned rice, hard-cooked egg yolk. Serve in a nest of green lettuce with a boiled dressing.

Beef Chili.—Brown a few pieces of round steak in a little suet, add a shredded onion, a chopped green pepper and a piece of red pepper sufficient to make it warm enough for the family taste. Add a pint of tomatoes, cover and simmer for a half hour. Season with salt when cooking.

Peach Marmalade.—Use three-fourths of a pound of sugar to a pound of fruit. Boil the pits in water until it is flavored with them; skim out and add the peaches, peeled and quartered. Cook a half hour before adding the sugar, then continue cooking for one hour, stirring often to keep it from burning.

Large peaches canned whole make very charming desserts in the winter with the addition of whipped cream.

At the Railroad Restaurant.
The Man—Have you dusted off the pies this morning?
The Waitress—Yes, sir.
"Sifted the sugar?"
"Yes, sir."
"Limbered up the sandwiches?"
"All done, sir."
"Well, come and help me blow through this macaroni."

The KITCHEN CABINET

HE either fears his fate too much
Or his deserts are small
Who dares not put it to the touch
To gain or lose it all.

CHOICE DISHES.

Onion Soup.—Make several gashes in a shin bone of beef, put it into the soup kettle and cover with two quarts of water. Heat slowly to the boiling point and let simmer for three or four hours. Slice five small onions and cook them in enough butter to brown them well. Strain the stock, add a little beef extract for flavor, and color; salt and pepper to taste. Cut bread in one-third-inch slices, sprinkle with cheese and pour the soup over the bread.

Allerton Chicken.—Cut up a fowl as for fricassee and cover with boiling water. Simmer until tender. When the fowl is about half done, add two slices of onion, two slices of carrot, one stalk of celery, a sprig of parsley, 12 pepper corns and a tablespoonful of salt. Cook until all the vegetables are tender. Remove the chicken to the platter, arrange in attractive form, and pour over the gravy and vegetables. Prepare the gravy by skimming the fat and using sufficient flour to thicken.

Chicken Stew With Onions.—This is not a common dish, but is most delicious. Stew the chicken with two dozen small onions, simmer until tender. Remove the chicken to the platter and drain the onions from the stock. Thicken the stock with three tablespoonfuls each of butter and flour cooked together. Add one-half cup of cream, season with salt, pepper and lemon juice. Pour over the chicken and garnish with the onions and parsley.

Marshmallow Wafers.—Cook together a cup of sugar and half a cup of water in a granite dish. Boil until it threads, then add ten marshmallows cut in small pieces. Pour gradually over the whites of two eggs beaten stiff; add a cup of pecan meats and a teaspoonful of vanilla. Spread on small wafers and brown in the oven.

"You know how you refused me four times before you accepted and married me? It's the same thing."

MARATHON UP A MOUNTAIN

Test of Endurance for Vigorous Swiss Athletes Is Race Up the Stanserhorn.

A Marathon race up a mountain in the Swiss Alps is a test of endurance to which only the most vigorous among professional mountaineers would care to submit themselves. The first event of this kind took place the other day, and despite the obvious difficulties, proved a great success. The mountain selected was the Stanserhorn, 6,286 feet above the sea level, and the difference in altitude to be covered was roughly 4,700 feet; the starting point, the little town of Stans, being some 1,500 feet above the sea.

About 1,500 spectators took the funicular railway up the mountain-side, or made a leisurely ascent on foot to cheer the winner, who proved to be Karl Hug, a young Swiss Alpinist of Alpach, his time being 1 hour and 4 minutes. The second arrival took eight minutes longer, and the last of the 52 competitors finished 45 minutes later.

The promoter of the race was a wealthy German who has offered valuable prizes and who rather fancied himself for the championship. He was greeted with sympathetic cheers when he arrived, puffing and blowing at the goal, half an hour after the last competitor, and innocently asked "if any of them had been sighted yet."—New York Sun.

AVIATORS IN THE DESERT

Enthusiasts Have Made Plans for a Regular Service Across the Sands of Sahara.

The Desert of Sahara seems to have a fascination for the aviators, who have made ambitious plans for establishing a regular service—particularly for military purposes—across the sands to Timbuctu.

One of the chief obstacles in the difficulty of reaching a machine that has come to grief in the sand in many parts of the desert is so soft that it is almost impassable, except by the broad-footed camels.

One of the enthusiasts at Biskra has devised an automobile for desert work that seems to promise a solution. It is driven by an air propeller, like those on aeroplanes, and is mounted on a triangular skeleton body, each corner being supported by two large-tired wheels which are so mounted that they can adapt themselves to a very irregular surface.

The entire weight, including a 50-horse power engine, is only 700 pounds.

Mineral Wealth in Ireland.

A remarkable discovery of silver and lead has been made at Clew, near Keady, County Armagh, Ireland, by a farmer named Conlon. While working in a field the other day he turned up a piece of bright metal, which he put in his pocket and afterwards placed on the mantel shelf in the kitchen, thinking little more about it. Subsequently an old miner who had worked in Cornwall, when visiting the house, examined the ore, and advised Mr. Conlon to obtain expert advice upon it. This was done, and the analytical tests showed that the ore contained 5 per cent. of pure silver and 85 per cent. lead of first quality. A mining expert and some other gentlemen visited the place, and as a result of boring operations a bed of solid ore was, it is said, struck just a little over five feet from the surface. Steps are now being taken with a view to obtaining the mining rights of the land.

Ghost Gave the Tip.

An extraordinary story of a gambling "tip" from the regions of spirits is that of Signor Crota, the stationmaster at Cleigiano, near Naples. Signor Crota speculated one franc at a weekly lottery, and now finds himself in consequence the lucky winner of \$120,000. On learning the good tidings Crota's first task was to telegraph to the directorate of the State Railways his resignation. He is a married man, and has a daughter who is a local schoolmistress. The stationmaster is also setting apart a sum for masses on behalf of his dead aunt, whose ghost, he avows, appeared to him in the early hours of the fateful morning bidding him gamble on four numbers which she revealed to him, all of which eventually proved lucky ones.

Salvor Left to the Ocean.

The crew of the ship Invernon related a gruesome tale of the sea on their arrival at Queenstown the other day from Wallaroo, laden with wheat. When rounding Cape Horn, the attention of the crew was directed to quite a large number of albatrosses, and other sea birds, fighting over a dark object in the water. With the aid of telescopes, it was seen that the birds were diving at the dead body of a seaman, who had been drowned. It was seen that the clothes on the body had been torn, and that the birds had picked large pieces of flesh from the remains. The weather was stormy, and nothing could be done to recover the body in order to give it decent burial.

Seaweed Made Valuable.

It is estimated that those engaged in the industry of gathering seaweed and reducing it to gelatinous food in Japan alone number 600,000 persons. Within recent years seaweeds have been introduced into the English kitchen. The edible species, served with roast meats, have been found to be very palatable. Devonshire and Japanese seaweeds are employed largely in the London industry.

WONDERFUL WORK OF DOGS

If These Are Not Inventions of Drummers, They Surely Are Remarkable Animals.

The grocery drummer from Chicago had just made some remarks about household pets, which awakened a memory in the mind of the agent from the New York Bond house, out selling securities:

"Speaking of that," said he, flicking the ashes off the end of his cigar, "I'm very fond of dogs. I have a pointer at home that's a wonder. Taking him altogether, he is the most intelligent animal I ever saw. You gentlemen may not believe it, but it is nevertheless a fact that whenever I go out riding in my motor through a hitherto untraveled country I always take Roger along with me, and he sits up alongside of me in front. Whenever we come to a crossroad, and I find myself up a tree as to which turning to take, I simply put the question to him, and in every blessed case he has instinctively pointed in the right direction."

"I can well believe that," said the grocery drummer. "I have a retriever in my house that is quite as wonderful. I don't believe my wife and I could possibly get along without him. If my wife mislays anything, from a rolling pin to a bridge score, anywhere around the house, all she has to do is to set Bob after it, and he finds it. When I am in a hurry to catch a train in the morning and my collar button slips out of my hands and disappears, as collar buttons are almost certain to do at such moments, good old Bob gives a yelp of delight and goes after it, saving me no end of trouble, much time, and some language."—Lippincott's Magazine.

LIBEL ON ARIZONA WEATHER

Tale Impressed Englishman, Who Probably Went Home and Wrote a Book About It.

"Hot weather reminds me," said the fellow who is always ready to tell a story when he gets an opening. "I was riding down through Arizona last summer on a train on which there was a party of Englishmen. You never know what hot weather is until you ride through some of those southwestern states in the summer. The heat rolls up in waves and smites you. Everything except the rattlesnakes and the Indians stay out of the sun's rays as much as possible. "On a station platform stood a dilapidated sprinkling can. It was full of dents and the spout was lying near the can, both evidently not having been used for months. "You know I have been telling you we have some hot weather out here," said a westerner to one of the Englishmen. "Well, look at that sprinkling can. It has been so hot that it has melted the spout right off! And the farther west you get the hotter it gets," the native son finished as he noticed the awed look on the foreigner's face."

Mind-Reading.

A young man and his wife, accompanied by their two children, a boy and a girl, entered a street car and sat down on one of the side seats. The girl was a beauty, while the little boy, with strongly marked features and freckled skin, was quite the opposite.

Directly across the aisle sat two ladies, evidently a mother and daughter. The younger of the two looked critically at the children. Then she scrutinized the parents. Then she turned to the elder lady, smiled, and made a whispered remark. The young man, who had been watching her, leaned forward.

"Madam," he said, "you are quite right. The girl fortunately looks like mother, and the boy looks like me." That he had guessed accurately what was passing in her mind, her look of confusion left no doubt.—Youth's Companion.

Took Care of It.

A nice, new mackintosh was little Bessie's birthday present from her father, and the seven-year-old was very proud of it.

That very morning, as she set out for school proudly attired in the mac, mother called after her:

"You'll be very careful of that nice cloak, dear, won't you?"
"Yes, mother," said Bessie dutifully. On coming out of school, Bessie started in horror. It was pouring hard; great, big drops of rain that splattered on the pavement. Hastily rolling up the nice, new mackintosh, she thrust it under her little pinafore and started for home.

"Why, dearie, you are drenched!" cried her mother, in surprise. "Why didn't you put on your mackintosh?" Bessie eyed her in sorrowful anger. "You—you told me—to take care of it!" she sobbed indignantly.—London Answers.

Early Pneumatic Tires.

It has been discovered recently that as early as 1847 efforts were made to construct a pneumatic tire. At that time a patent was granted by the patent office of the United States to an Englishman, whose invention covered several forms of tire, one of which was maintained in a distended position by means of air under pressure. Other forms, kept distended by means of springs, were also contemplated and described by him at that time. In relating the advantages of his invention he called particular attention to the fact that a vehicle thus equipped was propelled with greatly decreased power.

TEMPERANCE NOTES

(Conducted by the National Woman's Christian Temperance Union.)

LIQUOR TRAFFIC IS DOOMED

Not Believed This Government Can Permanently Endure Half License and Half Prohibition.

(By LILLIAN M. N. STEVENS.)
In contemplating the prohibition situation in our country, permit me to adapt a paragraph from a famous classic:

"We believe that this government cannot permanently endure half license and half prohibition. We do not expect the nation will be destroyed on this great question, but we do expect it will cease to be divided. It will become the one thing or the other—either the license advocates will push the liquor traffic further until it becomes alike lawful in all of the states and in every locality in our country, or the opponents of the licensed liquor traffic will arrest its further spread and place it where the public mind shall rest in the belief that it is in the course of ultimate extinction. Certainly the Woman's Christian Temperance union believes that the liquor traffic is on the way to destruction, for,

"The voice of warning has gone abroad, The time grows ripe for the hour of God."

In every state the question of what shall be done with the liquor traffic is up for consideration. In every state more or less has been done toward the settlement of the question.

USE ALCOHOL AS STIMULANT

Where Seventy-five Years Ago It Averaged \$1.48 Per Patient, Now Costs Three Cents.

Seventy-five years ago the bill for alcoholic stimulants averaged \$1.48 per patient in the Massachusetts General Hospital. In 1911 the average cost of alcoholic stimulants of all kinds, per patient, was less than three cents in the largest hospitals in the United States—Bellevue in New York and Cook County hospital in Chicago. On an average the hospitals today are using only one-fifth as much alcohol per patient as they were twenty-five years ago. In other words, whiskey, wine and beer are falling into disuse as medicines.

There are now four hospitals in the United States which give no alcoholic medicines. Their death rates are remarkably low. About 400 physicians of the old school in the United States absolutely refuse to give alcohol, and nearly all of the new schools are against its internal use. When the allopathic physicians met in their last national gathering a motion was made to strike alcohol out of the pharmacopoeia. The motion was lost, but the hot discussion it evoked showed which way the wind blows.

A Suggestion to Housewives.

To give a fruity flavor to mince meat open a can of fruit with a rich or sub-acid flavor, such as cherries, plums, or grapes, and drain the juice into it. It will be better than any wine flavored mince meat you ever ate, and will create no appetite for strong drinks.

This reminds us that one time on the menu of a dining car the only dessert was cottage pudding with wine sauce. The W. C. T. U. traveler pointed to her white ribbon and said, "I'll have to go without." Whereupon the waiter whispered, "It's just cherry juice, lady, just cherry juice!"

Shall It Be This?

Potatoes and salt, with a crust of bread, For the best little woman the Lord ever made. While the rum-seller's wife feeds on turkey and wine, Bought with my money, if so I incline; This shall it be, For mine and for me?

Tattlers and rags for my own little one, My fair, comely baby, my own darling son; While the rum-seller's children go warm and well clad, On my earnings, wrested from my bonny lad; This shall it be, For mine and for me?

Did You Know It?

We run the government, pay the most liberal pensions of any nation of the world, and more of them; we have a public school system of which we are intensely proud; we have universities, colleges, academies and normal schools all over our broad land; we pay in the United States fifteen and sixteen years' schooling for twenty-five million children. And yet the cost of government, of pensions and of education combined is but two-thirds the amount of our drink bill.

Moral Light.

No man has a moral right to do that which, if the whole world should follow his example, as some are sure to do, will produce more harm than good.—Neal Dow, Father of the Maine prohibition law.

A Sign of the Times.

The biggest street-car advertising company in America refused, for righteousness sake, a \$150,000 contract, for a three years' campaign of education by advertising-cards in the cars, urging the use of beer.

LEGAL NOTICES.

Notice to Creditors.
By virtue of an Order granted by the Surrogate of Cayuga County, notice is hereby given that all persons having claims against the estate of Mary J. Branch, late of the town of Genoa, Cayuga County, N. Y., deceased, are required to present the same with vouchers in support thereof to the undersigned, the executor of said estate, at his place of residence in the town of Genoa, County of Cayuga, on or before the 30th day of April, 1912. Dated October 24, 1911. CARL J. THAYER, Executor.

Notice to Creditors.

Y., deceased, are required to present the same with vouchers in support thereof to the undersigned, the administrator of said estate, at his place of business at King Ferry, County of Cayuga, on or before the 1st day of May, 1912. Dated, King Ferry, N. Y., October 28, 1911. G. S. AIRIN, Administrator.

The Thrice-A-Week Edition OF THE New York World

Practically a Daily at the Price of a Weekly

No other Newspaper in the world gives so much at so low a price.

The great Presidential campaign will soon begin and you will want the news accurately and promptly. The World long since established a record for impartiality, and anybody can afford its Thrice-A-Week edition, which comes every other day in the week, except Sunday. It will be of particular value to you now. The Thrice-A-Week World also abounds in other strong features, serial stories, humor, markets, cartoons; in fact, everything that is to be found in a first-class daily.

THE THRICE-A-WEEK WORLD'S regular subscription price is only \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and THE GENOA TRIBUNE together for one year for \$1.65.

The regular subscription price of the two papers is \$2.00.

Dentists.

J. A. Spaulding, D.D.S.
H. W. Reynolds, D. D. S.

Preserving the natural teeth our specialty.

Fillings, gold, porcelain, silver and gold inlays. Crown and bridgework just like the natural teeth.

NEWS for the YOUNG PEOPLE

GOOD TRICK WITH SCISSORS

Something That Has Puzzled Many People and Requires Practice to be Done Quickly.

This is something that has puzzled many people. The trick is to place your little fingers through the handles of a pair of scissors, palms up, and then twirl the scissors round toward you and bring them up in front in such a way that the points will be upward, as shown in Fig. 3. If you don't know the secret they will come up with the points downward instead. The trick is in the way you manage the scissors just as you flip them over; if you leave your fingers in the handles the scissors will come up with the points down. In order to make them come points up you have to take your fingers out of the handles momentarily and let the scissors turn a little between the palms of your hands and then put your fingers back through the other way. The principle

The Way It's Done

can best be followed by trying it with a pair of scissors. First stick your fingers through the handles, with the scissors points down and your palms facing up, as in the top picture. Then by a movement of the hands you can force the scissors upward and around till the points are near your chest, as in Fig. 2. Now is the time to take your fingers out for an instant. You continue the rotation by holding the handles between your palms and put your fingers back through from behind, thus allowing the points of the scissors to come up when the hands are placed back to back as in Fig. 3. It must be practiced so it can be done quickly.

HOW TO MAKE STEEL FLOAT

Needles Held on Surface of Water by "Tension" Just as Skip-Jacks Run About on Ponds.

Will steel float on water? Ask this question in a crowd and almost everybody will say "no." Then

Making Steel Float.

go ahead and prove that steel will float.

Take a glass full of water and some fine steel needles, perfectly dry. Lay the needles carefully on the surface of the water one at a time. If you are careful enough about it they will float.

The needles are held up by the "surface tension" of the water, just as are the skip-jacks that run on the surface of ponds.

Juvenile Books a Century Ago.
Does the modern child count his blessings in the matter of Christmas books? What would he say if, instead of one of the healthy, brightly written stories that now crowd the booksellers' windows, he received a copy of one of the books for juveniles in vogue a century ago? The very titles of some of these old volumes would rouse the back of present day youth—"The Advantages of Education as Elucidated in the History of the Wingfield Family," Elizabeth Ann Dove's "Tales of My Pupils," or, an Introduction to Correct Juvenile Errors; "S. W.'s "A Visit to a Farm; or, an Introduction to Various Subjects Connected With Rural Economy" (this reached a fifth edition in 1811), and Sandham's "Perambulations of a Bee and a Butterfly, in Which Are delineated Those Smaller Traits of Character Which Commonly Escape Observation."—London Chronicle.

Safety Valve for Vesuvius.
An Italian scientist proposed to supply a safety valve for Vesuvius by boring a tunnel in the base of the mountain and letting the lava escape into the sea. His idea is to bore the tunnel while the crater is in a state of repose, and he believes that when the volcano becomes active such a channel would be sufficient to carry away the lava, says Popular Mechanics. His whole proposal, however, is not to let the lava escape altogether, but to run it into molds and make it into blocks for use in the streets and quarries of Naples.

The KITCHEN CABINET

It's the songs ye sing
An' the smiles ye wear,
That's a-making the sun
Shine everywhere.

SEASONABLE DISHES.

Cabbage Salad.—Shred very fine a small head of cabbage, add a chopped onion, seasoning of salt and pepper, then pour over the vegetable the fat from a slice of fried, diced salt pork, the little brown pieces of pork are an addition to the salad. Heat a half cup of vinegar boiling hot in the frying pan in which the pork was cooked, and pour over the cabbage.

Heidelberg Cabbage.—Fry two slices of diced bacon; when brown add a chopped onion and cook until brown, then add half a cup of vinegar, a teaspoonful of salt and a few dashes of red pepper. Add a small head of shredded cabbage, cover and cook slowly for two hours.

Flower Salad.—Scald ripe tomatoes of small, uniform size, then peel and chill thoroughly. With a sharp knife cut the tomato into points, beginning at the blossom end, then press open, remove the seeds as much as possible and fill with seasoned rice, hard-cooked egg yolk. Serve in a nest of green lettuce with a boiled dressing.

Beef Chilli.—Brown a few pieces of round steak in a little suet, add a shredded onion, a chopped green pepper and a piece of red pepper sufficient to make it warm enough for the family taste. Add a pint of tomatoes, cover and simmer for a half hour. Season with salt when cooking.

Peach Marmalade.—Use three-fourths of a pound of sugar to a pound of fruit. Boil the pits in water until it is flavored with them; skim out and add the peaches, peeled and quartered. Cook a half hour before adding the sugar, then continue cooking for one hour, stirring often to keep it from burning.

Large peaches canned whole make very charming desserts in the winter with the addition of whipped cream.

LIBEL ON ARIZONA WEATHER

Tale Impressed Englishman, Who Probably Went Home and Wrote a Book About It.

"Hot weather reminds me," said the fellow who is always ready to tell a story when he gets an opening. "I was riding down through Arizona last summer on a train on which there was a party of Englishmen. You never know what hot weather is until you ride through some of those southwestern states in the summer. The heat rolls up in waves and smites you. Everything except the rattlesnakes and the Indians stay out of the sun's rays as much as possible.

"On a station platform stood a dilapidated sprinkling can. It was full of dents and the spout was lying near the can, both evidently not having been used for months. "You know I have been telling you we have some hot weather out here," said a westerner to one of the Englishmen. "Well, look at that sprinkling can. It has been so hot that it has melted the spout right off! And the farther west you get the hotter it gets," the native son finished as he noticed the awed look on the foreigner's face."

Mind-Reading.

A young man and his wife, accompanied by their two children, a boy and a girl, entered a street car and sat down on one of the side seats. The girl was a beauty, while the little boy, with strongly marked features and freckled skin, was quite the opposite.

Directly across the aisle sat two ladies, evidently a mother and daughter. The younger of the two looked critically at the children. Then she scrutinized the parents. Then she turned to the elder lady, smiled, and made a whispered remark. The young man, who had been watching her, leaned forward.

"Madam," he said, "you are quite right. The girl fortunately looks like mother, and the boy looks like me." That he had guessed accurately what was passing in her mind, her look of confusion left no doubt—Youth's Companion.

Took Care of It.

A nice, new mackintosh was little Beesie's birthday present from her father, and the seven-year-old was very proud of it.

That very morning, as she set out for school proudly attired in the mac, mother called after her:

"You'll be very careful of that nice cloak, dear, won't you?"

"Yes, mother," said Beesie dutifully.

On coming out of school, Beesie started in horror. It was pouring hard; great, big drops of rain that splattered on the pavement. Hastily rolling up the nice, new mackintosh, she thrust it under her little pinfold and started for home.

"Why, dearie, you are drenched!" cried her mother, in surprise. "Why didn't you put on your mackintosh?" Beesie eyed her in sorrowful anger. "You—you told me—to take care of it!" she sobbed indignantly.—London Answers.

Early Pneumatic Tires.

It has been discovered recently that as early as 1847 efforts were made to construct a pneumatic tire. At that time a patent was granted by the patent office of the United States to an Englishman, whose invention covered several forms of tire, one of which was maintained in a distended position by means of air under pressure. Other forms, kept distended by means of springs, were also contemplated and described by him at that time. In relating the advantages of his invention he called particular attention to the fact that a vehicle thus equipped was propelled with greatly decreased power.

TEMPERANCE NOTES

(Conducted by the National Woman's Christian Temperance Union.)

LIQUOR TRAFFIC IS DOOMED

Not Believed This Government Can Permanently Endure Half License and Half Prohibition.

(By LILLIAN M. N. STEVENS.)
In contemplating the prohibition situation in our country, permit me to adapt a paragraph from a famous classic:

"We believe that this government cannot permanently endure half license and half prohibition. We do not expect the nation will be destroyed on this great question, but we do expect it will cease to be divided. It will become the one thing or the other—either the license advocates will push the liquor traffic further until it becomes alike lawful in all of the states and in every locality in our country, or the opponents of the licensed liquor traffic will arrest its further spread and place it where the public mind shall rest in the belief that it is in the course of ultimate extinction.

Certainly the Woman's Christian Temperance union believes that the liquor traffic is on the way to destruction, for,

"The voice of warning has gone abroad, The time grows ripe for the hour of God."

In every state the question of what shall be done with the liquor traffic is up for consideration. In every state more or less has been done toward the settlement of the question.

USE ALCOHOL AS STIMULANT

Where Seventy-five Years Ago It Averaged \$1.48 Per Patient, Now Costs Three Cents.

Seventy-five years ago the bill for alcoholic stimulants averaged \$1.48 per patient in the Massachusetts General Hospital. In 1911 the average cost of alcoholic stimulants of all kinds, per patient, was less than three cents in the largest hospitals in the United States—Bellevue in New York and Cook County hospital in Chicago. On an average the hospitals today are using only one-fifth as much alcohol per patient as they were twenty-five years ago. In other words, whisky, wine and beer are falling into disuse as medicines.

There are now four hospitals in the United States which give no alcoholic medicines. Their death rates are remarkably low. About 400 physicians of the old school in the United States absolutely refuse to give alcohol, and nearly all of the new schools are against its internal use. When the allopathic physicians met in their last national gathering a motion was made to strike alcohol out of the pharmacopeia. The motion was lost, but the hot discussion it evoked showed which way the wind blows.

A Suggestion to Housewives.

To give a fruity flavor to mince meat open a can of fruit with a rich or sub-acid flavor, such as cherries, plums, or grapes, and drain the juice into it. It will be better than any wine flavored mince meat you ever ate, and will create no appetite for strong drinks. This reminds us that one time on the menu of a dining car the only dessert was cottage pudding with wine sauce. The W. C. T. U. traveler pointed to her white ribbon and said, "I'll have to go without." Whereupon the waiter whispered, "It's just cherry juice, lady, just cherry juice!"

Shall It Be This?

Potatoes and salt, with a crust of bread. For the best little woman the Lord ever made, While the rum seller's wife feeds on turkey and wine, Bought with my money, if so I incline: This shall it be.

For mine and for me?

Tattlers and rags for my own little one, My fair, comely baby, my own darling son; While the rum-seller's children go warm and well clad, On my earnings, wrested from my bonny lad: This shall it be.

For mine and me?

Did You Know It?

We run the government, pay the most liberal pensions of any nation of the world, and more of them; we have a public school system of which we are intensely proud; we have universities, colleges, academies and normal schools all over our broad land; we pay in the United States fifteen and sixteen years' schooling for twenty-five million children. And yet the cost of government, of pensions and of education combined is but two-thirds the amount of our drink bill.

Moral Light.

No man has a moral right to do that which, if the whole world should follow his example, as some are sure to do, will produce more harm than good.—Neal Dow, Father of the Maine prohibition law.

A Sign of the Times.

The biggest street-car advertising company in America refused, for righteousness sake, a \$150,000 contract, for a three years' campaign of education by advertising-cards in the cars, urging the use of beer.

LEGAL NOTICES.

Notice to Creditors.
By virtue of an order granted by the Surrogate of Cayuga County, Notice is hereby given that all persons having claims against the estate of Mary J. Branch, late of the town of Genoa, Cayuga County, N. Y., deceased, are required to present the same with vouchers in support thereof to the undersigned, the executor thereof, at his place of business at King Ferry, County of Cayuga, on or before the 30th day of April, 1912.

Dated October 24, 1911.

The Thrice-A-Week Edition

OF THE New York World

Practically a Daily at the Price of a Weekly

No other Newspaper in the world gives so much at so low a price.

The great Presidential campaign will soon begin and you will want the news accurately and promptly. The World long since established a record for impartiality, and anybody can afford its Thrice-A-Week edition, which comes every other day in the week, except Sunday. It will be of particular value to you now. The Thrice-A-Week World also abounds in other strong features, serial stories, humor, markets, cartoons; in fact, everything that is to be found in a first-class daily.

THE THIRCE-A-WEEK WORLD'S regular subscription price is only \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and THE GENOA TRIBUNE together for one year for \$1.65.

The regular subscription price of the two papers is \$2.00.

Dentists.

SHOP DISPLAYS IN HONGKONG

Articles of Dress or Personal Adornment Shown on Wax Figures Cause Chinese to Wonder.

Several of the more pretentious Chinese shops in Hongkong are commencing to use wax figures for displaying various articles of dress or personal adornment.

It has been a subject of considerable wonder on the part of foreigners that the Chinese people have evinced such a marked interest in wax figures displayed in foreign establishments, says an exchange.

A hair-dressing establishment in Hongkong's principal retail thoroughfare has displayed several wax busts showing late styles in hair-dressing for some time, and there is scarcely a time during the pleasant days when there is not a crowd of Chinese—women, business men, coolies and all—about the windows of that establishment.

Chinese merchants in Hongkong's Chinese quarter who have adopted this

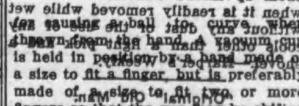

Gazing at the wax figure of a man's head, a Chinese woman in a long dress stands next to it.

means of displaying goods has established a wax figure in a Chinese shop. The costume of the wax figure is like that of a Chinese woman, but the face is that of a man.

MAKING A BASE BALL CURVE

Mr. Jones provided means in this case readily attachable to the "Hain"

A baseball bat and ball, used in the illustration of a curve.

Known in England as Sir Roger de Coverley, the character of the Old Peasant was the first to be introduced into the novel.

Well, it did get rid of him. He went to New York, tied up to some of the local politicians there and came back with a lot of money.

NEW NEWS OF YESTERDAY

Saw Great Value of Railway Passes in Politics.

Dean Richmond Was the First Man to Discover the Power of Free Transportation in Obtaining Legislative Favors.

By E. J. EDWARDS.

Recently on the authority of the late Commodore Alfred Van Santvoord, who at the time of his death was the wealthiest and most successful steamboat line proprietor in the east, I told how Dean Richmond of Buffalo became the real father of modern railway consolidation by reason of a sudden thought which came to him while he was riding upon the Erie canal.

But Dean Richmond, according to Commodore Van Santvoord, did not limit his discoveries to the railroad. He also discovered the power of the political and legislative influence which was contained in the railway passes.

Dean Richmond, it is said, was the first to discover the power of the railway passes in politics. He was the first to discover that the railway passes were a powerful political weapon.

Dean Richmond, it is said, was the first to discover the power of the railway passes in politics. He was the first to discover that the railway passes were a powerful political weapon.

COST THE LEOPARD HIS LIFE

Baboons Had Revenge for the Seizure of One of Their Number, Though Many Were Sacrificed.

The leopard likes the meat of certain monkeys, but the indulgence of his taste sometimes costs him dear. A remarkable battle between a leopard and a company of baboons, seen by a traveler in Africa, is described in Das Buch fur Alle.

I was sitting in the shade of a ravine, resting from the midday sun, when a company of baboons came clambering down the opposite wall toward the water that trickled through the gully. I sat still and watched them. A big male led, and after satisfying himself that all was safe, uttered a few deep notes.

Reassured by the call, the others quickly followed; a mother, with an ever-watchful eye on her two young ones, brought up the rear.

Suddenly, like a streak of lightning, a leopard sprang from behind a rock, and with one blow of his paw, felled the little baboon nearest him. But before he could make off with his prey, the furious mother attacked him. The attack had come so quickly that the rest of the company hardly realized what had happened. But at the mother's cry of rage they all at once turned and fell upon the robber.

In a moment the leopard was surrounded and almost covered with furious baboons. The battle waxed hot. Although numbers of baboons went down before the powerful paws of the cat, their places were immediately filled by others. It was not long before the leopard began to tire; he could make no noticeable impression upon his assailants, and his strength was sapped by their sharp teeth. He struggled bravely, but in vain; slowly he sank out of sight beneath the fiercely chattering foe that he had despised. The baby baboon was avenged.—Youth's Companion.

WORLD OF HIS OWN CREATION

Great French Writer in His Absent-Mindedness Lived Far Apart From His Fellow Men.

A writer in the St. James Gazette tells us that Theophile Gautier's absent-mindedness amounted to actual somnambulism. He so identified himself with his mental pictures as to lose all consciousness of time and place, and for the time he would actually live in the scene that he had created. We are told that rarely, if ever, has a man had such a gift for getting out of himself. He would enlarge on his magnificent golden tea and breakfast service, when the most humdrum china lined his shelves. And though his servants were all treated in the most fatherly way, Gautier would tell you that he never permitted them to utter a word in his presence, that he only employed negroes. "I give my orders by signs. If they understand my signs, well and good. If they don't, I kick them into the Bosphorus." And there is no doubt that he actually heard the wave closing over the head of a black slave. He actually meant what he said. The street outside was actually for him the Bosphorus.

Doctor of Agriculture.
The time is coming when every rural community of sufficient size will have one or more agricultural experts—men professionally trained to serve in an advisory way all the farmers of the community for a fee.

These men will understand the chemistry of the soil and plant growth; their laboratories will be busy with soil analysis and the study of local plant diseases; they will be entomologists and bacteriologists, and their value will be obvious to the enlightened farmers of a new age.

These farmers, no longer content to depend on the free clinic of the state experiment station, will seek the advice and prescription of the local doctor of agriculture. The dignity and the rewards of this profession are bound to increase, for it is founded upon the basis of our greatest industry.—World's Work.

Women Run French Town.
Folsey, a small town halfway between Paris and Amiens, in France, is said to be the only civilized community in which the municipal affairs are entirely in the hands of women. The mayor is a woman, and so is the superintendent of the railway station, the switchman, the mail carrier and the town barber. Mme. Lesoboro is the telegraph messenger and Mme. Drouot-Marchardin is the drummer whose duty it is to announce each proclamation of the mayor. Mme. Drouot-Marchardin is described as an octogenarian who has held her post through wind and rain for upward of twenty years. The letter carrier, Mme. Doubour, has held her office for more than ten years and goes about with her letters regardless of the weather.

Married in Mourning.
Six couples dressed in mourning came to the garrison church at Potsdam recently to be married. They are known as the "Louise bridal pairs," for every year these funeral weddings are celebrated at 9 o'clock on the anniversary of the day and the hour the good Queen Louise died. In the year of her death a Lutheran bishop left a sum of money, the interest of which was to be divided between couples married on its anniversary, and the directions he left for the ceremony are still observed. This year each couple received the acceptable sum of \$100 in return for their selection of the bridal party.

Pinturicchio's Frescoes Stolen.

The Clerone reports the sensational theft of Pinturicchio's frescoes from the Palazzo del Magnifico, in Siena. They were soaked off, and secretly carried away. With them disappears the last of the treasures in the Palace of Pandolfo Petrucci, which in its decline is still called "del Magnifico." Built about 1505, it had a great hall decorated with the mural paintings of Girolamo Genga, Luca Signorelli and Bernardino Pinturicchio. One of the paintings was Signorelli's "Triumph of Chastity," another Pinturicchio's "Return of Ulysses to Penelope," and both, transferred from the walls to canvas, in 1844, were purchased at the Barker sale in 1874 for the National Gallery, London. Two other paintings from the walls by Genga are in the Accademia di Belle Arti at Siena, and the rest of the contents have been scattered among the museums of Europe.

An Athlete.
Join an athletic club. Get one of the old members, or better still, one of the attendants, to show you where the gymnasium is so that you will not feel embarrassed when visitors to the club ask you to show them around. Step into the cafe and order the waiter to bring you a cylindrical glass receptacle containing any one of a number of liquids which you will find printed on a card which the attendant will hand you. Grasp this receptacle firmly in your right hand and raise it to your lips. The trick is to lift it without spilling a drop and set it down without leaving a drop to spill. Continue this exercise until you are thoroughly exhausted. Then have yourself put into a cab and sent home.—New York World.

Not the Same Japan.
Such great changes have come about in Japan since the Emperor Komel was laid away nearly fifty years ago that the recent death of the emperor suddenly called into being practices and customs which the vast majority of the nation had never heard of before, says the Far East. Musty old archives that had lain hidden away for forty-five years were consulted by men little in sympathy with the medieval ceremonies and regulations that they record. The funeral ceremonies were as novel and strange to the Japanese as to the foreigners, and only those skilled in forgotten lore were able to furnish an explanation of the many symbols and ceremonial details.

Water Cress Right at Home.
Do you like water cress? Anybody may grow it right in one's own home and with little trouble. Take a large flower pot and fill it half full of drainage material—sticks, charcoal and the like. Fill the remainder of the pot with soil rich in plant food. Plant your water cress seeds plentifully and keep the soil moist and the flower pot saucer filled with water. As soon as the cress plants start to grow, stop planting, as they will grow quickly, and the more water cress you pick the faster and better the little plants grow.—Suburban Life.

Blasting With Water.
A new method of mining is being practised in German and other coal shafts that is said to do away with dangerous blasting, while also avoiding much of the risk of spontaneous explosion of coal dust. Deep holes are bored in the coal and water is introduced into them by pipes under heavy pressure. The water finds its way through the coal fissures and opens them up until the mass is loosened, when it is readily removed while wet without any dust or the use of any tools other than a light pick and a shovel.—Harper's Weekly.

"Original" Old Man.
"Why do you spend so much time in the society of that old man?" "He is such an original old chap that I love to hear him talk." "In what way is he original?" "He says he was a private in the Civil war, that he was not one of the best ball players among the boys of his day, that lots of other boys could swim better than he could, and any boy in town could beat him fighting, and that he was not at all good looking, and that he was never a favorite with the girls."

His Proud Boast.
"Ah!" interestedly ejaculated the city visitor, "and that is your oldest inhabitant? A venerable figure, truly. I fancy he looks back on a life as full of useful achievement as it has been long?" "Well, not to hurt, exactly," a trifle pessimistically replied the landlord of the Skeedee tavern. "About all he's ever done that I know of is to brag that he had a second cousin a good many years ago who got arrested on suspicion of being Jesse James."—Kansas City Star.

Restricting Sale of Absinthe.
A bill restricting the sale of absinthe has passed the French senate. If the bill finally becomes a law, France will join Belgium, Holland and Switzerland in recognizing the demoralizing effects of this beverage. The increase of absinthe drinking in France has been paralleled by an increase in crimes of violence. In 1911 it is said that 53 per cent. of the persons tried for murder were devotees of absinthe.

Dangers of Earrings.
Indications are that earrings are coming into fashion again—not the diamond earrings which never go out of fashion—but earrings that are fashioned from all kinds of material, ligneous and metallic. They will for the most part be pendants and ardent lovers in attempting to seize a kiss from the coy maid or widow will find out how they may be hung up in a coil of tangled hair.

We Want Your Trade Every Man Who Aims to Be Well Dressed for Thanksgiving Should Make a Special Point to See SAPERSTEIN, THE STATE STREET CLOTHIER, AUBURN

Special offerings will be made to make the Thanksgiving business the largest in the history of this store. Read the following price reductions and act at once. Your dollars go farther at Saperstein's, out of the high rent district, but up to the minute in styles.

QUINLAN'S

Horse Show and Thanksgiving Display

SATURDAY, MONDAY AND TUESDAY, Nov. 23—25—26.

Mrs. K. H. Quinlan Fitzgerald has just returned from the New York market, where she has been able to purchase Millinery and Ready to Wear Garments at greatly reduced prices. While there she also visited the Horse Show and will now be able to give you all the latest designs and models for mid-winter. Never before have we been able to give such quality, at such greatly reduced prices, at this season of the year.

Pattern Hats \$7.50, \$10 and \$15
Trimmed Hats, value \$4 to \$9 \$1.98 to \$5.00
Untrimmed Hats, value \$1.25 to \$4 50c to \$1.49

All Tailored Suits 25 per cent. OFF
