The Story of Waitstill Baxter

By KATE DOUGLAS WIGGIN

Copyright, 1913, by Kate Douglas Wiggin

"You gave me my life, and I'm thankful to you for that, but you've given me little since, father."

"Hain't I fed an' clothed you?" "No more than I have fed and clothed you. You've provided the raw food, and I've cooked and served it. You've bought cloth, and I have made shirts and overalls and coats for you and knitted your socks and comforters and mittens. Not only have I toiled and saved and scrimped away my girlhood as you bade me, but I've earned for you. Who made the butter and took care of the hens and dried the apples and 'drew in' the rugs? Who raised and ground the peppers for sale and tended the geese that you might sell the feathers? No. father, I don't con-

sider that I'm in your debt!" Deacon Foxwell Baxter was completely nonplused for the first time in his life. He had never-allowed "argyfyin'" in his household, and there had never been a clash of wills before this when he had not come off swiftly and brutally triumphant. This situation was complicated by the fact that he did not dare to apply the brakes as usual since there were more issues involved than ever before. He felt too stunned to deal properly with this daughter, having emptied all the vials of his wrath upon the other one and being, in consequence, somewhat enfeebled. It was always easy enough to cope with Patty, for her impertinence evoked such rage that the argument took care of itself, but this grave young woman was a different matter. There she sat composedly on the edge of her wooden chair, her head lifted high, her color coming and going, her the mills, but on my way I shall stop at eyes shining steadily like fixed stars; there she sat, calmly announcing her intention of leaving her father to shift for himself. Yet the skies seemed to

that he n ust make another effort to as cert his authority "Now, you take off your coat," be said, the pipe in his hand trembling as he stirred nervously in his chair. "You gather strength. "Of course it would take your coat right off an' set down to the supper table same as usual, do you hear? Eat your victuals an' then go to your bed an' git over this crazy fit that Patience has started workin' in you. No more nonsense now! Do as I tell you!"

"I have made up my mind, father. and it's no use arguing. All who try to live with you fail sooner or later. Yor 'save had four children, father, One boy ran away; the other did not mind being drowned, I fear, since life was so hard at home. You have just turned the third child out for a sin of deceit and disobedience she would never have committed-for her nature is as clear as crystal-if you had ever loved her or considered her happiness. So I have done with you, unless in your old age God should bring you to such a pass that no one eise will come to your assistance; then I'd see somehow that you were cared for and nursed and made comfortable. You are not an old man; you are strong and healthy, and you have plenty of money to get a good housekeeper. I should decide differently perhaps if all this were not

"You lie! I haven't got plenty of money!" And the deacon struck the table a sudden blow that made the Lord, I don't know where you two thina in the cupboard rattle "You've no notion what this house costs me. an' the food for the stock, an' you two girls, an' labor at the store, an' the tayfield, an' the taxes an' insurance! I've slaved from sunrise to sunset, but I ain't hardly been able to lay up a cent. I s'pose the neighbors have been fillin' you full o' tales about my mis'able little savin's an' makin' 'em into a fortune. Well, you won't git any of 'em, I promise you that!"

"You have plenty laid away. Everybody knows, so what's the use of denying it? Anyway, I don't want a penny of your money, father, so goodby. There's enough cooked to keep you for a couple of days," and Waitstill rose from her chair and drew on

Father and daughter confronted each other, the secret fury of the man met by the steady determination of the girl. The deacon was baffled, almost awed, by Waitstill's quiet self control. but at the very moment that he was half uncomprehendingly giaring at her, it dawned upon him that he was beaten, and that she was mistress of the situation.

Where would she go? What were her plans? For definite plans she had, or she could not meet his eye with so resolute a gaze. If she did leave him how could be contrive to get her back again and so escape the scorn of the village, the averted look, the lessened

"Where are you goin' now?" be sakand though he tried his best, he sould not for the life of him keep back mes final taunt. "I s'poss, like your manner, you've got a man in your eye?" the chose this, to him, impossible sug-

stacles too stubborn for us to overcome. My way has chanced to open first, though it was none of my con-

Had the roof fallen in upon him the deacon could not have been more dumfounded. His tongue literally clove to the roof of his mouth. His face fell, and his mean, piercing eyes blinked under his shaggy brows as if seeking

Waitstill stirred the fire, closed the brick oven and put the teapot on the back of the stove, hung up the long handled dipper on its accustomed nail over the sink and went to the door.

Her father collected his scattered wits and pulled himself to his feet by the arms of the high backed rocker. 'You shan't step outside this room till you tell me where you're goin'," he said when he found his voice.

"I have no wish to keep it secret. I am going to see if Mrs. Mason will keep me tonight. Tomorrow I shall walk down the river and get work at

poor farm!"

the Boyntons' to tell Ivory I am ready to marry him as soon as he's ready to take me.'

This was enough to stir the blood of

have no thought of falling! He felt the deacon into one last fury. "I might have guessed it if I hadn't been blind as a bat an' deaf as an adder!" And be gave the table another ringing blow before he leaned on it to be one o' that crazy Boynton crew you'd take up with!" he roared. "Nothin' would suit either o' you girls but choosin' the biggest enemies I've got in the whole village."

> "You've never taken pains to make anything but enemies, so what could

"You might as well go to live on the poor farm! Aaron Boynton was a disrep'table hound, Lois Boynton is as crazy as a loon, the boy is a nobody's thild, an' Ivory's no better than a common pauper!"

"Ivory's a brave, strong, honorable man and a scholar too. I can work for him and help him earn and save,

as I have you." "How long's this been goln' on?" The deacon was choking, but he meant to get to the bottom of things while he

had the chance. "It hasn't gone on at all. He has never said a word to me, and I have always obeyed your will in these matters, but you can't hide love any more than you can hide hate. I know Ivory loves me, so I'm going to tell him that my duty is done here and I am ready

to help him." "Goin' to throw yourself at his head, be you?" sneered the deacon. "By the girls got these loose ways o' thinkin' an' actin'. Mebbe he won't take you, an' then where'll you be? You won't git under my roof again when you've once left it, you can make up your mind to that!"

"If you have any doubts about Ivory's being willing to take me you'd better drive along behind me and listenwhile I ask him.

Waitstill's tone had an exultant thrill of certainty in it. She threw up her head, glorying in what she was about to do. If she laid aside her usual reserve and voiced her thoughts openly it was not in the hope of convincing her father, but for the bliss of putting them into words and intoxicating her-

self by the sound of them. "Come after me if you will, father and watch the welcome I shall get. Oh, I have no fear of being turned out by Ivory Boynton. I can hardly wait to give him the joy I shall be bringing! It's selfish to rob him of the chance to speak first, but I'll do it!" And before Deacon Baxter could cross the room Waitstill was out of the kitchen door into the shed and flying down Town House hill like an arrow shot free

from the bow. The descon followed close behind, hardly knowing why, but he was no match for the girl, and at last he stood helpless on the steps of the shed, shaking his fist and burling terrible words after her, words that it was fortunate for her peace of mind she could not

"A curse upon you both!" he cried savagely. "Not satisfied with disoberin' an' defyin' me, you've put me to shame, an' now you'll be settin' the neighbors ag'in me an' ruinin' my person as being the most insulting one | trade. If you was freesin' in the snow hal he could invest at the recessit. I wouldn't heave a blanket to you! "Playe," replied Waitstill, "a man If you was starvin' I wouldn't fling to my aye and in my heart. We should sither of you a crust! Never shall you bearing bustons and wife before darken my doors again, an' never shall the sales are been book aport by ob- you git A penny of my money, and if

I have to throw it into the river to spite you!

Here his breath failed, and he stumbled out into the barn whimpering between his broken sentences like a whipped child.

"Here I am with nobody to milk, not feed the hens; nobody to churn tomorrow, nor do the chores; a poor, mis'able creeter, deserted by my children, with nobody to do a hand's turn' 'thout bein' paid for every step they take! I'll give 'em what they deserve. I don' know what, but I'll be even with 'em yet." And the deacon set his Baxter jaw in a way that meant his determination to stop at nothing.

CHAPTER XXVI.

Sentry Duty. VORY BOYNTON drove bome from the woods that same afternoon by way of the bridge, in order to buy some provisions at the brick store. When he was still a long distance from the bars that divided the lane from the highroad he espled a dark clad little speck he knew to be Rodman leaning over the fence, waiting and longing as usual for his homecoming, and his heart warmed at the thought of the boyish welcome that never failed.

The sleigh slipped quickly over the hard packed, shining road, and the bells rang merrily in the clear, cold air, giving out a joyous sound that had no echo in Ivory's breast that day. He had just had a vision of happiness through another man's eyes. Was he always to stand outside the banqueting table, he wondered, and see others feasting while he hungered?

Now the little speck bounded from the fence, flew down the road to meet the sleigh and jumped in by the driver's side.

"I knew you'd come tonight," Rodman cried eagerly. "I told Aunt Boynton you'd come.'

"How is she, well as common?" "No, not a bit well since yesterday morning, but Mrs. Mason says it's nothing worse than a cold. Mrs. Mason has just gone home, and we've had a grand bousecleaning today. She's washed and ironed and baked, and we've put Aunt Boynton in clean sheets and pillowcases, and her room's nice and warm, and I carried the cat in and put it on her bed to keep her company while I came to watch for you. Aunt Boynton let Mrs. Mason braid her hair and seemed to like her brushing it. It's been dreadful lonesome, and, oh, I am glad you came back, Ivory. Did you find any more spruce gum where you went this

time? "Pounds and pounds, Rod; enough to bring me in nearly \$100. I chanced on the greatest place I've found yet. I followed the wake of an old whirlwind that had left long furrows in the forest -I've told you how the thing worksand I tracked its course by the gum that had formed wherever the trees were wounded. It's hard, lonely work

Rcd, but it pays well." 'If I could have been there maybe we could have got more. I'm good at shinning up trees."

'Yes, sometime we'll go gum picking together. We'll climb the trees like a couple of cats and take our knives and scrape off the precious lumps that are worth so much money to the druggists. You've let down the bars, I

"'Cause I knew you'd come tonight," said Rodman. "I felt it in my bones. We're going to have a splendid sup-

"Are we? That's good news." Ivory tried to make his tone bright and interested, though his heart was like a lump of lead in his breast. "It's the least I can do for the poor little chap," he thought, "when he stays as caretaker in this lonely spot. I wonder if hadn't better drive luto the barn, Rod, and leave the harness on Nick till I go in and see mother? Guess I will."

"She's hot, Aunt Boynton, bot and restless, but Mrs. Mason thinks that's

Ivory found his mother feverish, and ber eyes were unnaturally bright, but she was clear in mind and cheerful. too, sitting up in bed to breathe the better, while the Maltese cat snuggled under her arm and purred peace-

"The cat is Rod's idea." she said smilingly, but in a very weak voice. 'He is a great nurse. I should never have thought of the cat myself, but she gives me more comfort than all

the medicine." Ivory and Rodman drew up to the supper table, already set in the kitchen, but before Ivory took his seat he softly closed the door that led into the living room. They ate their beans and brown bread and the mince pie that had been the "splendid" feature of the meal, as reported by the boy. and when they had finished and Rodman was clearing the table Ivory walked to the window, lighting his pipe the while, and stood soberly looking out on the snowy landscape. One could scarcely tell it was twilight, with such sweeps of whiteness to catch ev-

ery gleam of the dying day. "Drop work a minute and come here, Rod," he said at length. "Can you keep a secret?"

"Course I can! I'm chock full of 'em now, and nobody could dig one of 'em out o' me with a pickax!"

"Oh, well, if you're full you natural ly couldn't hold another!" "I could try to squeeze it in

nice one," coaxed the boy. "I don't know whether you'll think it's a nice one, Rod, for it breaks up one of your plans. I'm not sure myself how nice it is, but it's a very big,

gone and got married!"

hastily putting his hand over his mouth to hush his too loud speaking.

"Yes. She and Mark Wilson ran away last Monday, drove over to Allentown, N. H., and were married without telling a soul. Deacon Baxter discovered everything this afternoon, like the old fox that he is, and turned Patty out of the house."

"Mean old skinflint!" exclaimed Rod excitedly, all the incipient manhood rising in his ten-year-old breast. "Is she gone to live with the Wilsons?"

"The Wilsons don't know yet that Mark is married to her, but I met him driving like jehu, just after I had left Patty, and told him everything that had happened and did my best to cool him down and keep him from murdering his new father-in-law by showing him it would serve no real purpose now."

"Did he look married and all different?" asked Rod curiously.

"Yes, he did, and more like a man than ever he looked before in his life. We talked everything over together, and he went home at once to break the news to his family without even going to take a peep at Patty. I couldn't bear to have them meet till he had something cheerful to say to the poor little soul. When I met her by Uncle Bart's shop she was trudging along in the snow like a draggled butterfly and crying like a baby."

Sympathetic tears dimmed Rodman's eyes. "I can't bear to see girls cry. Ivory. I just can't bear it, especially Patty."

"Neither can I, Rod. I came pretty near wiping her eyes, but pulled up, remembering she wan't a child, but a married lady. Well, now we come to the point."

"Isn't Patty's being married the point?"

"No, only part of it. Patty's being sent away from home leaves Waitstill alone with the deacon, do you see? And if Patty is your favorite, Waitstill is mine. I might as well own up to that."

"She's mine, too," cried Rod. "They are both my favorites, but I always thought Patty was the suitablest for me to marry if she'd wait for me. Waitstill is too grand for a boy!"

"She's too grand for anybody, Rod. There isn't a man alive that's wortby to strap on her skates."

Well, she's too grand for anybody except"- and here Rod's shy, wistful voice trailed off into discreet silence,

"Now, I had some talk with Patty, and she thinks Waitstill will have no trouble with her father just at present. She says he lavished so much rage upon her that there'll be none left for anybody else for a day or two. And, moreover, that he will never dare to go too far with Waitstill because she's so useful to him. I'm not afraid of bls beating or injuring her so long as he keeps his sober senses, if he's ever rightly had any. But I don't like to think of his upbraiding her and breaking her heart with his cruel talk just after she's lost the sister that's been her only companion." And Ivory's hand trembled as he filled his pipe. He had no confidant but this quaint, ten-Her hearted, old fashioned little lad, to whom he had grown to speak his mind as if he were a man of his own age. and Rod, in the same way, had gradnally learned to understand and sym

"It's dreadful lonesome on Town House hill," said the boy in a hushed

"Dreadful lonesome," echoed Ivory with a sigh; "and I don't dare leave mother until her fever dies down a bit and she sleeps. Now, do you remember the night that she was taken ill, and we shared the watch?"

Rodman held his breath, "Do you mean you're going to let me help just as if I was big?" he asked, speaking through a great lump in his throat. "There are only two of us, Rod You're rather young for this piece of work, but you're trusty - you're trusty!"

"Am I to keep watch on the deacon?" "That's it, and this is my plan: Nick will have had his feed. You're to drive to the bridge when it gets a little darker and hitch in Uncle Bart's horse shed, covering Nick well. You're to go into the brick store, and while you're getting some groceries wrapped up. listen to anything the men say, to see if they know what's happened. When you've bung about as long as you dare leave your bundle and say you'll call in again for it. Then see if Baxter's store is open. I don't believe it will be, and if it isn't look for a light in his kitchen window and prowl about till you know that Waitstill and the deacon have gone up to their bedrooms. Then go to Uncle Bart's and find out if Patty is there.'

Rod's eyes grew bigger and bigger. "Shall I talk to her?" he asked, "and what'll I say?"

"No, just ask if she's there. If she's gone Mark has made it right with his family and taken ber home. If she hasn't why, God knows how that matter will be straightened out. Anyhow, she has a husband now, and he seems to value ber, and Waitstill is alone on the top of that wind swept hill!"

"I'll go. I'll remember everything," cried Rodman, in the seventh beaven of delight at the responsibilities Ivory

was beaping upon him. "Don't stay beyond 8 o'clock, but come back and tell me everything you've learned. Then, if mother grows no worse, I'll walk back to Uncle Bart's shop and spend the night there just-just to be near, that's all."

'You couldn't hear Waltstill, even it she called," Rod said.

"Couldn't 17 A man's ears are very sharp under certain circumstances. unexpected, startling one. What do believe if Waitstill needed help I could you think-your favorite, Patty, has hear her breathe! Besides, I shall be up and down the hill till I know all's "Eatty! Married!" cried Bod, then well, and at suntise I'll go up and hide

behind some of Baxter's buildings till see him get dis breakfast and go to the store. Now wash your dishes." And Ivory caught up his cap from a hook beaind the door.

"Are you going to the barn?" asked

Rodman. "No. only down to the gate for a minute. Mark said that if he had a good chance he'd send a boy with a note and get him to put it under the stone gate post. It's too soon to expect it perhaps, but I can't seem to keep still."

Rodman tied a gingham apron around his waist, carried the teakettle to the sink and poured the dishpan full of boiling water, then dipped the cups and plates in and out, wiped them and replaced them on the table, gave the bean platter a special polish and set the half mince pie and the butter dish in the cellarway.

"A boy has to do most everything in this family," he sighed to himself. "I don't mind washing dishes, except the nasty frying pan and the sticky bean pot, but what I'm going to do tonight is different"-here he glowed and tingled with anticipation-"I know what they call it in the story books -it's sentry duty, and that's braver work for a boy then dish washing."

Which, however, depends a good deal upon circumstances and somewhat on the point of view.

CHAPTER XXVII.

The House of Aaron.

FEELING that the day was to bring great things had dawned upon Waitstill when she woke that morning, and now it was coming true.

Climbing Saco hill was like climbing the hill of her dreams; life and love beckoned to her across the snowy slopes.

At rest about Patty's future, though troubled as to her sorry plight at the moment, she was conscious chiefly of her newborn freedom. She reveled in the keen air that tingled against her cheek and drew in fresh hope with every breath. As she trod the shining pathway she was full of expectancy, her eyes dancing, her heart as buoyant as her step. Not a vestige of confusion or uncertainty vexed her mind. She knew Ivory for her true mate, and if the way to him took her through dark places it was lighted by a steadfast beacon of love.

At the top of the hill she turned the corner breathlessly and faced the length of road that led to the Boynton farm. Mrs. Mason's house was beyond, and, oh, how she hoped that Ivory would be at home and that she need not walt another day to tell him all and claim the gift she knew was hers before she asked it! She might not have the same exaltation tomorrow, for now there were no levels in her heart and soul. She had a sense of mounting from height to height and lighting fires on every peak of her being. She took no heed of the road she was traveling. She was conscious only of a wonderful inward glow.

The house was now in sight, and a that figure was issuing from the side 65or, putting on a fur cap as it came out on the steps and down the lane. Ivory was at home, then, and, best of all, he was unconsciously coming to meet her, although their hearts had been coming to meet each other, she thought, ever since they first began to GENOA TRIBUNE together for one year for

As she neared the bars she called Ivery's name. His bands were in the pockets of his great coat, and his eyes were fixed on the ground. Somber he was, distinctly somber, in mien and gait. Could she make him smile and flush and glow as she was smiling and flushing and glowing? As he heard her voice he raised his head quickly and uncomprehendingly.

"Don't come any nearer," she said 'until I have told you something."

His mind had been so full of her that the sight of her in the flesh standing twenty feet away, bewildered

Friday Morning, Aug. 21, 1914 MADRID'S ARID SITE.

Parched and Dusty Now, It Was Once a Watered Garden Spot.

Travelers find it hard to believe that Madrid ever abounded with water. The modern town stands on so bleak and arid an eminence, its surroundings, save in early spring, are so parched and dusty and the water peddler's cry of "Agua! Agua!" is so insistent and ubiquitous one fancies Madrid must have been thirsty from the beginning.

Yet its ancient coat of arms was a large flint half immersed in water. with steel hatchets striking it on either side, the ascending sparks forming a sort of canopy around it. Appended was the motto:

I was built on water. My walls are of fire. Such is my emblazonment.

This device was emblematic only of the city and its early days before Charles V. had started it on its headlong career of greatness merely because he credited its climate with having cured him of a fever.

At that time Madrid was a small town embowered in gardens and woods and meadows and with springs and wells lavishly supplied by nature. The Manzanares, now a melancholy, meager stream, was of a measurable depth. But with the apportioning of her territory into palaces and lodging houses for the royal hangers-on and the cutting down of the trees to swell the royal treasury the inevitable followed. The sun of well nigh 400 summers has burned and reburned the site of the old town and its bestripped suburbs and dried up the natural moisture. At present the climate of Madrid is nearly the most trying in all Europe.-From Calvert's "Madrid."

SCHOOLS IN ARABIA.

Pupils Sit Swaying on the Floor as They All Study Aloud.

In the schools of Arabia the children. with the schoolmaster, sit upon the floor or the ground in a semicircle, and each has a tablet of wood which is painted white and upon which the lessons are written. When the latter are learned they are washed out and replaced by other lessons.

During study hours the Arab schools remind one of the Chinese, for the children all study aloud, and as they chant they rock back and forth like trees in a storm, and this movement is continued for an hour or more at a time. The schoolmaster rocks back and forth also, and altogether the school presents a most novel appearance as well as sound. Worshipers in the mosques always move about while reciting the Koran, as this movement is believed to assist the memory.

The desks of the Arab schools are odd contrivances of palm sticks, upon which is placed the Koran or one of the thirty sections of it. After learning the alphabet the boys take up the study of the Koran, memorizing entire chapters of it until the sacred book is

entirely familiar. A peculiar method is followed in learning the Koran. The study begins with the opening chapter, and from this it skips to the last. The last but one is then learned, then the last but two, and so on in inverted order, ending finally with the second chapter.

Origin of the Word "Mustard." Our English word "mustard" is traceable to the French "moutarde," the origin of which is curiously given. In 1382 Philip the Bold, duke of Burgundy, granted to the town of Dijon the privilege of bearing his armorial ensigns, with the motto "Moult me tarde" ("I wish ardently"), in return for a handsome contingent of a thousand men furnished to him at its expense. Pleased with the royal condescension, the authorities ordered the device to be affixed over the principal gates of the city. Time or accident at

length obliterated the middle word, and the two remaining, moult tarde, were printed on the labels which the merchants of Dijon pasted on pots in which they sent this commodity all over the world.

Our Constitution. The United States constitution is not modeled on any other; but, on the contrary, several are modeled on it, notably those of Canada, Australia, the Central and South American republics, Switzerland and, to a certain extent, China. It was drafted by a convention in 1787, ratified by nine states (the prescribed number) in 1788 and set to work under George Washington as first president in 1780. It is a very simple document, containing originally vnly seven articles,-Christian Herald.

As Good as His Ward.

when to go home. He then bade her good night-Cleveand Lunder.

GENOA TRIBUNE FOR FIRELESS COOKER

EXPERT ADVISES SOME NEW AND DELICIOUS DISHES.

How Requisites for Any Meal May Be Prepared Through the Agency of the Latest Kitchen Labor-Saving Device.

Some new things which may be prepared in the fireless cooker were presented by Miss Fannie Merritt Farmer. Following are the recipes:

cracked wheat in five cupfuls of cold water two hours. Put over flame and bring to the boiling point; add salt and let boil for three minutes, stirring constantly. Set pan into a larger one containing boiling water and cook in a fireless cooker over night. Serve with sugar and cream.

Smothered Haddock.-Cut fish into fillets and season with salt, pepper, and lemon juice. Arrange fish in kettle, cover with prepared tomato soup: over this put a second layer. Place kettle in a larger one containing boiling water and let water continue to boil for three minutes. Cook with or without radiator about 45 min-

Roly Poly.-Remove fat, skin and bones from a loin of lamb. Remove meat from eight veal chops, arrange the eight pieces of veal, separated by a thin piece of fat salt pork, close to the lean meat of the loin. Season with salt and pepper and sprinkle with a rounding tablespoonful each of finely chopped carrot, celery and parsley. Roll as tight as possible, put over a few strips of very thin fat salt pork and fasten with a string to keep meat in shape. Dredge, roll with flour and brown in a pan placed over gas flame. Cook between two radiators two and one-half hours.

Scalloped Egg and Potato With Cheese.-Arrango alternate layers of cold sliced boiled potatoes and sliced hard boiled eggs, and on each layer of egg arrange one-half of thin sliced onion which has been parboiled for one minute. Pour over a thin sauce flavored with cheese, salt and pepper to taste. Cook over one radiator one

and one half to two hours. String Beans With Cheese.-Remove strings by cutting entire length of each side, then cut beans into two-inch lengths. Plunge into cold water and allow them to remain until all the beans drop out, which may afterwards be discarded. Cook pods in boiling water, allowing onequarter teaspoon of soda to two quarts of beans, for five minutes; then cook over one radiator two hours. Drain thoroughly, put in serving-dish, season with salt and cayenne, add onehalf cup of graded rarebit cheese and one-quarter cup of heavy cream. Stir until well mixed, sprinkle generously over top grated Parmesan cheese and dot over with one tablespoon of soft butter. Reheat in hot oven or under

Nut Butter.-Mix and sift two cups of bread flour, one cup of graham flour, one cup of brown sugar, two teaspoons of baking powder and one teaspoon each of sods and salt; then add two cups of sour milk and one cup of chopped or coarsely cut English walnut meat. Turn into bread pan and bake in fireless gas range with the gas on for 16 minutes and about an hour after gas is turned off.

Black Eyed Susan .- To one cup of brown bread crumbs add two and onehalf cups of scalded milk and let stand until mixture cools; then add two eggs slightly beaten, one tablespoon of butter, one-half teaspoon of cinnamon and one-quarter teaspoon each of clove, nutmeg and salt. Bake between two radiators. Serve hot with sugar and cream.-Boston Transcript.

Fruit.

A delightful way of serving oranges to an invalid is to press all the juice into a glass with a lemon squeezer; add pulverized sugar to taste and serve with chopped ice. If fresh fruit is denied a patient, stewed fruit may be permitted. In order to secure the very best flavor in apple sauce, which invalids will relish, wash and quarter the apples, remove the cores and stems and stew gently without paring. Then press the soft mass through a colander and beat either with or without the white of an egg until it is light and foamy, sweetening to taste.

What to Do With the Covers. Save the covers of cocoa or mustard boxes to use for cleansing frying pans and saucepans. Hammer down sharp Scrape with the sharp lower edge. The rounding corners of the covers fit in the round pans much better than anything you can buy for the

purpose.

Regent's Punch. Three lemons, 1 pound sugar, 2 quarts pineapple fuice, 1 quart very strong colong tea and 1 quart carbonated water. Served in the senter of a large block of ice, bollowed out to make a bowl, it is very attractive.

Strawberry Sponge.

Try this dessert: Take sponge cake, cut in slices, put preserved strawberries between slices and pour the juice over it; then cover with whipped cream and dot over the top with strawberries.

French Chef's Advice.

Soup should never be salted while cooking until it has been thoroughly skimmed, as salt prevents the scum from rising.

***************** MORE MONEY FOR GOOD ROADS.

According to figures compiled by the office of public roads of the department of agriculture. expenditures in the United States for improvement of roads have more than doubled since 1904. In that year money spent for road improvement amounted to \$79.771,417, while in 1913 the expenditure was in excess of \$165,-

Cracked Wheat.—Soak one cupful of EXCELLENT ROADS ABROAD.

Average Cost of Maintenance In France and England.

So much is heard about the excellence of roads in England and France that occasionally some consideration of their cost is helpful to a fuller appreciation of what will be necessary in order that systems of equal merit (trafrecent issue of the Engineering Review.

The road mileage of France is 371. 000, and the cost, at a time when wages were very, very low, was \$1,663,000,-000. On this basis to secure a system for the 23,000 miles of highways in Massachusetts would require the expenditure of \$100,000,000. Moreover ... France spends \$45,000.000 per annum for maintenance. This is about \$120 a mile a year, a figure which, of course, as an average means very little, since on the main roads a much greater amount is spent and on the minor roads considerably less. The minister of public works, too, is recommending that \$50,000,000 additional be provided during the next ten or twelve years for some bituminous binder on 6,000 miles of national highways, where it is greatly needed.

Turning now to England, where the road surfaces are, on the whole, better than those in France, it is found that the average cost of maintenance on the 27.800 miles of main roads in England and Wales is \$475 per mile per annum and that on the 95,000 miles of rural roads in England the average cost of maintenance is \$115.

While these figures should not-and in fact will not-discourage persistent this country, they may well be borne in mind to silence those who see little abroad. True it is that in some sections of this country appropriations for a few selected routes have compared well with those quoted; but, taking the country generally, the amounts available have been pitiably small as compared with English and French prac-

WILL BUY CEMENT FOR ROADS

Illinois State Commission Has Decided to Furnish Supplies.

The state highway commission will purchase all the cement used to build Illinois "state aid roads." The members reached this conclusion recently and have sent letters to cement companies asking for bids. The commission hopes to insure the best quality of materials at the lowest possible cost. It also will give the small contractor an equal chance with the big operator in road building. The plan to furnish cement to the contractors was reached after an investigation of the conditions in Wisconsin, California and Michigan. where similar operations have been

"We believe the commission's plan to purchase the cement will give the small contractor who cannot afford to buy in great quantities an equal chance with the big operator who can," said A. D. Gash, chairman of the commission, in anyouncing the plan. "Whenever a contractor bids on constructing a piece of road we will deduct from his bid the cost of cement. I believe also that our plan will insure good materials and better construction '

Cook county's allotment of \$120,000 from the state aid fund was officially turned over to the county board by the commission. This, together with the \$120,320 appropriated by the county board for roads to meet the requirement of the state aid and the \$80,000 appropriated for use of the roads and bridges committee, constitutes a total of \$320,320 that will be spent for good roads in Cook county this year,

Road Building In Mexico.

The road engineers of the department of communication of the federal government have recently completed an inspection of the highway between Puebla and the City of Mexico and pronounce it almost ready for traffic. The greater part of the road is completed. The road passes the great Popocatapeti volcano. It is being constructed by the Mexican government. and, strange as it may seem, in view of the internecine warfare in Mexico. work on the road has been carried on without molestation.

Hand Tools For Road Grading. The simple hand tools that are re-

quired for earth road work consist of single and two man rakes, grading picks and ciay picks and square and round pointed shovels. These articles require no description, but the best should always be purchased, even if they are a little bigher in first cost This will be more than offset in their increased life. - Better Roads.

Want Farmers' Names Posted.

The state grange of California, after going on record last fall asking all persons living outside the city limits to place their names in front of their farms, where they may be seen plainly from the road, is now working to accomplish the improvement. It is also typing to get aigns posted at crossroads.

DELICACIES IN SEASON

NEW METHODS OF PREPARING SUMMER VEGETABLES.

Spinach Souffle Healthful and Appetiz-Ing-How Creole Cooks Make Use of the Tops of Beets, Radishes and Turnips.

By LIDA AMES WILLIS. Spinach Souffle.-Wash and pick over the spinach as directed and boil tender in just enough water to prevent burning, stirring now and then. After a quarter of an hour add a tablespoonful of salt. Cook about five minutes longer, then drain and squeeze out all the water. Chop very fine. Put a large spoonful of butter in a saucepan, melt and stir in a level tablespoonful of flour. When it begins to bubble add the spinach and the seasoning of salt and pepper. Cook fic requirements being considered) may five minutes; add about a third of a be developed here, says a writer in a cup of cream; continue to stir a few minutes. To a cup of this prepared spinach add the well-beaten yolk of an egg and stir mixture over the fire long enough to set the egg. Let the mixture cool, then fold in the whites of the eggs, beaten white and stiff, and fill ramekin or little souffle cases, well buttered, and bake about twelve minutes in hot oven. Serve at once or they will fall, particularly if they are not sufficiently baked.

A good cook who knows, tells me that in New Orleans the humble Creole cooks make most wholesome and excellent dishes of the tops of beets, radishes and turnips, while the more prosperous do not disdain to use them, in purees, or in many a dish that the most fastidious would relish. One way is to serve them au jus a la bourgeoise, that is with hard-boiled or poached eggs and a little gravy or consomme, again reducing the cost of Big stock of living in a worth-while manner.

String Beans a la Fricassee.--New string beans are coming in plentifully. If you want to serve them as an occasional treat until they become a common vegetable, elaborate a little and let them be served as the principal luncheon dish. For example, after effort to improve highway systems in having washed the beans well, cut off the ends and string them, if they need to be. Cook tender in salted water, good in our own work and much good then drain well. Put into a saucepan with butter, parsley and a little minced new onion. Add a little broth, and now and then a little more, in order to keep the beans from becoming dry before they are tender. Cook slowly. Just before removing from before buying. the fire add the beaten yolks of egg, the number determined by quantity of beans. A pint of cooked beans will require two egg yolks. Mix with the juice of a lemon, a little cold water, and enough grated cheese, Parmesan preferred, to give a delicate flavor. Do not allow the mixture to boil, but stir occasionally until the eggs are cooked to a soft custard-like consistency. Cook the beans uncovered and they will be a bright color. A pinch of baking soda put in the water with

the salt will keep the color. Spring Onions on Toast.-Mince a bunch of onions very fine, cover them with cold water and set over the fire. When at boiling point drain and cover again with cold water. Boil ten minutes; drain, season with half a teaspoonful of salt and a quarter of a teaspoonful of pepper. Stir in a level tablespoonful of butter, rolled in a teaspoonful of flour. Add just enough milk-a few tablespoonfuls-to make a little sauce. Cook a minute or two and then arrange on toast. This is a delicious dish.

Luncheon Tips.

Crackers covered with grated cheese and toasted in the oven are good served with salad for lucheon.

A tiny sprinkling of sugar placed over each layer of meat in a steak pudding will make the steak tender. Toughness of angel cake is often

Cream cheese, mixed with boiled salad dressing and minced chives, makes a most delicious salad if rolled into balls and served on lettuce or cress with French dressing.

Orange Shortcake.

One quart of flour, 2 teaspoonfuls of 1/2 cupful butter, 1/2 pint of sweet milk Take half of this and roll half an inch thick, place in a dripping pan and spread with butter, then roll the other half and put on top of the first. Bake in hot oven. Peel, seed and slice thin 8 oranges, add enough sugar to make sweet, place these between the cake and serve at once. Sometimes I use whipped cream, but it is fine without.

Lemon Verbena.

If one has tired of the use of lavender or sweet clover for the household linen, use the dried leaves or even the fresh branches of lemon verbena. It is strangely sweet and wonderfully pungent and quite reminds one of grandmother's linen closet.

To Clean Shoes.

To clean children's white kid topped shoes, use sweet milk and a good white soap. Rub in well and set in the air to dry. This will leave the kid nice and soft as well as clean.

Labor-Saving Plan.

Try using a small paint brush for greasing cake, bread or gem pans. It is a great help and can be easily cleaned in warm soap suda,

Friday Morning, Aug. 21, 1914

Lord--Minard.

On Wednesday, Aug. 19, about seventy five guests were welcomed at the pleasant residence of Mr. and Mrs. Walter W. Minard of Ledyard to witness the marriage of their eldest daughter, Anna, to Mr. Frederick H Lord of Venice Center.

asters, everlasting flowers and pink and white sweet peas used profusely throughout the house produced a beautiful effect.

of the bridal chorus from Lohengrin, played by Miss Kathryn Reynolds of Trumansburg announced the coming of the bride and groom. They were preceded by Rev. J. R. Walters, pastor of Poplar Ridge Friends church, fine one. the bridesmaid, Miss Sabella Bodle of Mecklenburg and the best man, Mr. Gaylord Hoskins of Aurelius, who led them before the beautifully decorated fireplace in the south par lor, and there the simple and beauti ful ceremony was performed, the ring service being used.

Directly afterward a delicious luncheon was served by Caterer Guindon and assistants, the waiters being close friends of the bride and

The bride was charming in a beau tiful white gown of French crepe de cheue with trimmings of satin and lace and she carried bride's roses The bridesmaid was gowned in green fuille with lace trimmings and car ried pink sweet peas.

A large sum of money and many valuable and beautiful gifts attested the high regard in which the young couple are held.

After the refreshments and congratulations. Mr. and Mrs. Lord start. ed on their wedding journey, well showered with good wishes and confetti. They are to spend two weeks camping at Sea Breeze, Lake Ontario, meanwhile taking several lake trips visiting Thousand Islands and other points.

The young friends of the couple indulged in the usual merriment of such an occasion and yet all were much impressed by the sacredness of the hour in which two lives were made as one.

Eakland---Lyon.

Tuesday afternoon, Aug. 18, at 5 o'clock, at the home of the bride's uncle, Willis G. Hoskins, 10 Hulbert St., Auburn, the marriage of Miss Rosalyn Chase Lyon, daughter of Mrs. Sara Lyon of Sherwood, to Edward Huriburt Eakland of Brooklyn, took place. Rev. A. S. Yantis, of the First Universalist church, performed the ceremony, the ring service being used.

parlor which had been prettily decorated. The bridal couple were unattended, and stood in a semi circle which was formed of baskets filled with pink and white asters, festooned tegether with clematis and ribbon.

As the bride and groom entered the room, Mendelssohn's wedding march was played by Harry A Tidd of Auburn, who also played the Lohengrin wedding march as they left the room. Before the ceremony, "O Promise Me" was sung by Mrs. Baxter of Brooklyn a friend of the bride. She also sang "Love's Coronation" following the ceremony.

The bride was charmingly attired in white taffeta, covered and trimmed with real English cluny lace, and carried a bouquet of white roses and lillies of the valley.

Following the ceremony, the wedding party and guests went to the Palm Room of the Oaborne House where the wedding supper was served to thirty people A reception was held later at the Hoskins home.

The wedding gifts were many and costly, including silver, cut glass and lines. The groom's gift to the bride was a beautiful lavalliere.

The couple left on the 9:50 train for Lake Bonaparte in the Adirondacks where they will spend two weeks. After Oct. 1, they will be at home in Brooklyn, where the groom is employed as an efficiency neglacer. The bride has been a teacher in the Brooklyn schools for several years.

Among the out-of-town guests at the wadding were Wm, Rockins of General Mary Hockine of Scipio, and Mr. and Mrs. Chas. Cook of Poplar Ridge

What The Management Says.

About five hundred people attended the ball game in this village last Saturday afternoon, and probably, instead of being the best game of the season, it proved to be the poorest. And this the management greatly re gret. The game resulted in a score of 22 to 3 in favor of Genoa.

It has been our desire throughout the season to bring only the best teams that we were able to get to Genoa for our games, and in so doing we have been very careful to arrange with only those who have been winning their games and who we supposed were the best, however, we Feathery asparagus with white have had the misfortune to draw a couple of lemons. Our team has been playing excellent ball this season \$1,000 for the three charitable orand those who attend our games expect to witness good baseball. Shortly before 2 p m., the strains Never before have teams with the reputations of those of the that will play the remaining games season been brought to Genos. game, which it is expected will be a

GENOA, N. Y.

To Our Patrons:

The deplorable conditions that now exist in Europe on account of the war now being waged between the largest and most civilized countries, and the conflicting reports that have been circulated regarding the prices of imported merchandise entitles the consumer to receive definite and exact knowledge regarding the situation.

We therefore wish to announce that at the present time and as long as our present stock will last we will not advance our prices one single cent on merchandise of any kind.

We shall protect our patrons during these unsettled market conditions to the fullest extent. Our resources for obtaining merchandise is not excelled by any firm. Nearly thirty-five years of honorable dealing with manufacturers, wholesalers and importers means a great deal in

a crisis like this, and there is no one better equipped to serve At the present time there is a corps of buyers in the

market to provide for you and for us and to protect both our We realize that there will be scarcity of some materials

and some classes of merchandise and that we will be tested to the utmost to supply you, but we are in hopes by the advice we receive that we will be able to cope with the situation. Always prepared to serve you best.

GARDEN PLAN WELL LIKED

Laid Out Along Lines of the Illustration It Will Be of Permanent Beauty.

A very helpful plan for beautifying the garden is shown in the accompanying illustration, which, if carefully followed, will give results that are successful and of permanent beauty.

In the plan well-designed borders are filled with shrubbery in the corners, or the rear, and hardy perennials in the foreground. These should be planted according to their height and color. Foxgloves, peonies and Oriental poppies are excellent for grouping. Both German and Japanese trises and brilliant Sweet Williams must find a place here also. Narcissus and daffodils give a perfect effect if planted as a border about the entire sweep of beds. These, together with

the flowering shrubbery, are gorgeous in the early springtime. The open spaces shown in this plot are res for lawn. In the center is a lily pool, having a cement basin. A gazingglobe is at one and and a sun dial op-posite. At each side of the garden are semi-circular white benches which invite one to tarry.

A scheme for a more pretentious garden having stately Lombardy poplars and a pergola at the rear, has proved popular. Beneath the latter is placed a group of white garden furniture. Perennial borders frame the lawn with brilliant color. An edge of boxwood is exceedingly good. Plant tall-growing hollyhocks and mallow marvels in the background. Masses of helianthus, coreopsis and popples should appear in prominent groups. Forgioves, English larkspur and hardy phlox should be planted in abundance. Japanese iris, anapdragon and gay Sweet Williams are good just within the short-cut boxwood border. Stepping-stores lead to the artistic sun dial and pedestal.

LOOKS TO PUBLIC WELFARE

Kansas City Institution Might Well Be Copied by Other Big Centers of Population.

The board of public welfare is an institution in which Kansas City has set an example for the whole country. Delegations from other places repeatedly have visited the city to study the workings of the board with the idea of applying its principles at home.

The latest city to take the matter up is Chicago. Recently Mr. Jacob Billikopf of the Kansas City board was invited to explain its operation to the Chicago Association of Commerce. Following his address an ordinance has been introduced in the Chicago council by Prof. C. E. Merriam, an alderman, to establish a department of public welfare with two

One is the bureau of employment, which is to operate municipal lodging houses and gather information on genaral working conditions, as well as to help persons find work. The second is the bureau of social surveys, to collect information on living conditions in Chicago and to recommend ordinances for their betterment.

The judiciary committee of the council has unanimously recommendad the ordinance for passage. Cities generally are beginning to assume larger responsibilities for better conditions of living.

LIOMIE TOWN: Orchard.

WORK IN RASPBERRY PATCH

One of Our Most Delicious Fruits is Adapted to Both the Garden and the Truck Farm.

(By J. E. MORMAN. Copyright, 1914.) The raspberry is the queen of all small fruits. It is delicious both as a fresh fruit and in preserves, and for culture the raspberry is adapted to both the garden and the truck farm. The canes grow rapidly, the better varieties produce heavily the second year. and a patch with proper care will last for about twelve to fifteen years.

Spring is the best time to set out raspberry canes. If the canes are planted in the fall alternate freezing and thawing cause the rootlets to decay, and the plants, unfortunately. readily winter kill. Among the varieties on the market the Cuthbert red raspberry is still at the head of the list. and in the gardens the canes should be planted about three feet apart, in rows at least three feet from each other. For farm planting rows should be about six feet distant and the plants set out about four feet apart, and, if possible, plant the rows north and south, which permits the sun to reach all of the fruit, and thus it ripens better. The rows should be cultivated once or twice in a season. During the summer the most vigorous shoots should be allowed to grow after being placed carefully between two wires which are stapled to posts placed about twenty feet apart in the row. To keep the wires firm during the winter, clamp them together with short pieces of wire.

In November, when other garden or farm work slackens, pay the raspberry patch a visit and trim out all the dead canes. These should be burned to destroy any lurking raspberry borers. Trim back the live canes to about four feet. This compels the plant, when growth starts in the spring, to throw out numerous side branches and thus increase their fruiting capacity. Then mulch the rows with leaves, if they are abundant, and weight them down with a heavy coating of coarse farm manure, good compost or chicken madure. The decaying organic materials furnish humus to the soil, and humus is necessary to supply the plants with sufficient plant food. The rain and soil moisture dissolve the materials which plants need, and when the raspberry plants take up this moisture they grow

rapidly and bear profusely. Raspberry canes bear about one year only, but nature provides a new supply of young canes, so that a patch cared for as above described will bear annually and last many years, and since the raspberry blossoms late it is practically guaranteed against injury from frost. For this reason a raspberry crop is almost a certainty.

CULTIVATION OF PEACH TREES

Cultivator or Disk Harrow Should Be Used Often to Form Mulch and Prevent Evaporation,

It is very essential to take the very best possible care of the young peach trees. They should be kept thrifty and healthy, and all the necessary care given them to conserve the moisture and plant food in the soil.

As soon as the soil will permit, it should be stirred six to eight inches

Method of Obtaining Good Mulch.

planted as deeply as they should, plowing this depth will cause them to produce a deep root system which will not be injured as quickly by freezing or drought. After this plowing the fertilizer should be applied and worked with a disk harrow or culti-

Frequent cultivations should be given with the cultivator or disk harrow, running deep enough to form a good soil mulch and prevent subsequent baking or crusting of the surface, and prevent loss of soil moisture by evaporation. Thorough culture kills all the weeds, which are a constant drain on the soil moisture and plant food, and also assists in decomposing and liberating any plant food which may have turned under.

Pruning Raspberries. Pinching back the new growth during summer, thereby causing a more bushy form has long been the accepted method of pruning. A better plan a mold, and let sit in ice chest until is to let the canes make a natural growth, then during the winter cut back to three or three and one-half feet. In spring tie to a wire supported by stakes. Much larger berries can be grown; there is less difficulty egg and a cupful of powdered sugar, in picking and a much better price with a teaspoonful of lemon fulce. can be obtained for the fruit. This Beat until thick. method will pay handsomely on the amounting to an impressive little fruit farm and is the ideal plan for the ordinary farmer. The work can bushlet issued by the Alabama Coal he done in winter when there is plenty

He that falls in love with himself will have no rivals.

Most people return small favors, acknowledge middling ones, and repay great ones by ingratitude.—Benjamin

GOOD THINGS TO EAT.

Take two pounds of veal for stew, cut into about nine pieces. Roll in flour and put into

a kettle to fry in hot fat with one chopped onion. When a golden brown add water to nearly cover, salt as desired, add a third of a

cupful of vinegar, one bay leaf, four cloves, and let stew for an hour, adding water if necessary. When nearly done add four tablespoonfuls of apple jelly, a teaspoonful of sugar and a tablespoonful of catsup. Strain the gravy over the meat when serving.

Duchess Loaf.—Boil a pint of cherry juice with the juice of half a lemon and a half pint of sugar. Cook ten minutes and pour into a mold. Whip together until stiff one pint of cream, his own lips could pronounce upon the half a cupful of sugar and a half teaspoonful of vanilla. Sprinkle into the this what it still is to the unregenercream half a cupful of minced, candied cherries, place oiled paper over the the ruin wrought by sin? Yes, the top and cover securely. Pack in ice heart that has no ties elsewhere; that and salt four hours.

Asparagus Rabbit-Lightly toast and butter thin slices of whole wheat bread, cover each with a layer of cooked asparagus cut in bits, sprinkle with salt, pepper and a few drops of Worcestershire sauce and a thick coating of grated cheese. Cook in the oven long enough to melt the cheese. Serve at once with a poached egg on the top of each slice.

Golden Fleece.—Break in pieces a half pound of good, rich cheese, melt in a cupful of cream, add a pinch of cayenne and when smooth and wellblended add five eggs without beating, cover until the whites are set, then eat briskly. It will rise in yellow foam, tender and delicious if not overcooked. Serve hot on buttered crack-

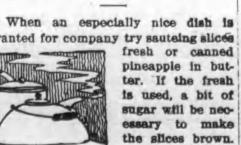

Chantilly Sauce.—Cook by steaming five medium-sized, good-flavored apples, pass through a sieve and add to the pulp two tablespoonfuls of powdered sugar and a fourth of a cupful of fresh grated horseradish. When well mixed fold in an equal bulk of whipped cream. Fine to serve with pork roast or duck.

I verfly believe if an angel should come to chant the chorus of the moral law, he would eat too much gingerbread, or take liberties with private letters, or do some precious atrocity.

If the king is in the palace, nobody looks at the walls.-R. W. Emerson.

MORE GOOD THINGS.

Bar le Duc Currants.-A most delicious substitute for the expensive bar le duc may be made at home. Select large currants, remove the stems, and with a coarse needle extract the seeds, crushing as little as possible. Take other currents and crush them, and let simmer slowly to extract all the juice, strain this and cook until thick with sugar, add the prepared currants and scald in the jelly, then seal in glasses. A few of these large currants to a glass will make the jelly most delicious.

Jellied Chicken.-Three cupfuls of minced chicken, two small red or green peppers, one-fourth of a cupful of celery hearts chopped fine, four tablespoonfuls of gelatin, one-half cupful of cold water, one-fourth of a cupful of vinegar and salt and paprika to taste. When the cooked chicken has cooled enough to handle cut the most desirable meat into small bits and pour over some of the stock and set aside until needed. Prepare the peppers and celery and stir into the minced chicken. Add the cold water of the gelatin, skim fat from the stock and take off all that is clear, heat the stock and the vinegar together, add a bit of onion julce, sait and pepper, and when boiling bot, pour over the gelatin. Pour together into the next day to set firmly. Unmold on

Mellien Maguella

At the Gate of Nain

By REV. GEORGE E. GUILLE Bible Teacher, Moody Institute,

600000000000000000000000000 TEXT-He went into a city called Nain. Luke 7:11.

The words, looked at closely, will be found to epitomize all the work of Christ as Savior. For what is the city of Nain? We

called because of its striking situation. And is not this what the world was as God made it, so that labor of his hands, "very good?" Is not ate heart, that refuses to recognize has not "tasted the powers of the

world to come;" nor seen the glorious

realities of things eternal, finds it fair

and pleasant still. But alas! this pleasant world has become a valley of the shadow of death, for behold! at the very gate of Nain, proclaiming its real condition, a dead man is carried out. Death is the way out of the world still, and death is the awful shadow over it. "Death reigned from Adam to Moses," and reigns today, the world, with all its boasted wisdom, having found no remedy for it. On every portal, death with relentless hand, has carved his telltale crest, and upon all creation he has placed his stamp. "The world passeth away."

This is the scene into which Christ has come, as here he comes to Naincame with life and salvation and open-

ing heaven to the lost of the earth. What sorrows, too, are in fair Nain! Behold this widow weeping for her only son, and much people in the city, following and weeping with her. For sin has brought not only death, but a multitude of sorrows, into the world. However fair it may be, however beautiful the names by which it may be called, however much it may furnish the natural heart with pleasure sorrow remains the great fact of human life. The great sea of life is salty with human tears, and the sighing of the wind is the echo of the threnody of broken hearts. "The whole creation groaneth and travaileth in pain together until now."

But the Man of Sorrows draws nigh and Nain must answer to its name. With him at its gate, all is changed, and we see the divine remedy for all the ills brought in by sin.

1. "When Jesus saw her, he was moved with compassion." Yes it was compassion that brought him down to save, compassion for my lost estate, compassion for the helpless mis-When an especially nice dish is ery to which sin reduced me. "Moved wanted for company try sauteing slices with compassion at my tears for sin,

fresh or canned he has come to my help." 2. "And he said unto her, Don't cry. don't cry!" Who is this stranger is used, a bit of breaking in upon her grief with his sugar will be nectender sympathy? Can be quench essary to make those tears? Has he a balm for that broken heart? Yes, he has, and he Serve these as a freely gives it; and in doing so gives garnish to pork us a picture of all his finished work. chops, or they are good with beef The Christ of Calvary will make good his every word.

3. "He touched the bler!" "Touch it he must if his word is to have power over it." He must die, if he would have to say to death, "Where is thy

sting?" "The sting of death is sin" and he must be "made sin for us" to take away that sting. He must "taste death for every man," who is to arise from it at his word. He must go into it in order to triumph over it, and "forasmuch as the children are partakers of flesh and blood, he likewise himself, also took part of the same, that through death . . . he might deliver them who through fear of death were all their lifetime subject to bondage," "Christ, being raised from the dead, dieth no more; death hath no more dominion over him." But he has dominion over it, and thus he touches the bier.

In Israel it meant defilement to come in contact with death. But Jesus must touch it, yet remain unde-

4. And having touched it he can say, and his word stand fast, "Young man, I say unto thee, Arise.'

And these words, which in a thousand tongues, he is repeating in the ears of the multitudes "dead in treepasses and sins." Know, O man without Christ, that this young man at Nain's gate is your picture. Dweller in Nain-in a world still "fair" to the eye, but upon which sin has brought an awful curse-you are dead.

5. "And he that was dead sat up and began to speak." "Hath he said and shall he not do it, hath he spoken and shall be not make it good?" O soul, hast thou heard his voice?

death in trespasses and sins, "a new creation" in Christ Jesus? Hast thou All hall, hearer of Jesus' voice! "They of the state authorities. that hear shall live!"

GOOD ROADS PROVE BENEFIT

improved Highways Increase Attendance at Rural Schools-States Making Greatest Progress.

While it is true that various factors contribute to increase or decrease the attendance at schools in given sections of the country, it is worthy of comment that in the states having a high percentage of improved roads a much larger percentage of the students enrolled regularly attend the schools than in the states having a small percentage of improved roads. In five eastern and western states, which have a large mileage of improved roads, the average attendance of enrolled pupils in 1908-9 was 80 per cent, while in four southern states and one northwestern state, which are noted for bad reads, the average attendance for the same year was 64 per cent-80 per cent in the good roads states as against 64 per cent in the bad roads states. In the states first named 35 per cent of the roads have been

A Good Road in New England.

improved, while in the latter group of states there are only 11/2 per cent of the roads improved.

That improved roads would benefit our country school system there would seem to be no doubt. Improved roads make it possible to consolidate or centralize the schools and to establish graded schools in the rural districts. Such schools centrally located will accommodate all of the children within a radius of from four to five miles. In many communities having the advantage of improved roads commodious buildings have been provided, more competent teachers have been employed, and modern facilities for teaching have been supplied at a minimum cost. For instance, since the improvement of the main highways in Durham county, North Carolina, the number of school houses has been reduced from 65 to 42, of which 17 are graded and have two or more rooms and employ

two or more teachers. There are at the present time about two thousand consolidated rural schools in the United States. It appears that Massachusetts, Ohio and Indiana have made the greatest progress along these lines, and it is rather significant to note that in these states about one-third of the roads have been improved. According to statistics of the agricultural department there was expended in 1899, \$22,116 in Massachusetts for the conveyance of pupils to consolidated schools, but in 1908 the expenditure for this purpose amounted to \$292,213. In Indiana the expenditure for this purpose in 1904 amounted to \$86,000, while in 1908, \$290,000 was expended. This expenditure for transportation reflects, in a general way, the extent and progress of this new educational movement. It must not be understood that this is an additional burden, as the expenditure thus made is saved in other directions.

BENEFIT OF IMPROVED ROAD

Among Many Other Things It Attracts Investors Looking for Advantageous Locations.

A long stretch of improved road is one of the best advertisements a state can have. It attracts a class of tourists who are able and willing to pay for entertainment. It brings investors who are looking for advantageous locations. It includes agricultural investigation and consequent immigration and investment, not only along the line of the road, but in other accessible sections. It changes, by the sheer force of publicity, backward localities into progressive ones; enhances values, and brings into general notice resources which had only been known locally; or, if known, not appreciated.

The advantages which such stretches of main roads cause to accrue are advantages which affect the entire state. as well as the localities themselves. Hast thou "sat up" out of thine awful It should, therefore, be assumed as a principle that such main roads should be built, in whole or in part, by the begun to speak with a new tongue in state; that their management and the language they speak in heaven? maintenance should be in the hands

An Unconscious Linguist. Many a man has traveled safely, if not always placidly, through Europe with no other language than English at his command, but few have been so lucky as a correspondent of the New York Post, whose English was actually taken for French by the Frenchmen themselves. He writes:

Although I speak no language except English, I have never had any trouble in traveling in Europe. In the only instance when I greatly longed to be able to speak another tongue I was helped out of a predicament in a most unexpected way. At a railway station in Paris I could not make the porters understand that I wanted my baggage. Finally, in despair, I exclaimed, "Oh, b'gosh!"

One of the porters replied: "Out, bah-gazh! Oui, oui, bah-gazh!" and he soon produced my trunk. That was the first times that I knew that the French have the word "baggage" and learned how they pronounced it.

O brother man, fold to thine heart thy Where pity dwells, the peace of God is

Do Not Jump at Conclusions.

"Do not jump at conclusions and do not be hasty in judgment," said Strickland W. Gilllan. "To illustrate my point I will tell a story of August, my pet dog. August was always jumping at conclusions.

"He would run out into the street to "When a horse went by August

would jump at his conclusion. "When a cow went by August would

jump at her conclusion.

"One day a mule went by, and August jumped at the mule's conclusion, and the mule kicked.

"That was the last of August. "And the next day was the 1st of September."-Chicago Post.

It Was a Savage Animal. Mr. Fred Ginnett, the English showman, who declares that there is no cruelty involved in the training of performing animals, tells an amusing story of the lion and the lamb that Lord George Sanger trained to appear together.

When the sale of the old showman's menagerie took place the two animals were put up together and were bought by Mr. Ginnett, though by this time the "lamb," to say the least of it, was getting rather elderly. A few days after the sale an acquaintance asked Mr. Ginnett how the happy pair were getting on and if they were still fulfilling the Bible phrase about "lying down to-

"I wish I'd never seen them," said Mr. Ginnett gloomily. "Why?" asked the other. "Is he say-

"Savage isn't the word for it," replied Mr. Ginnett.

"But," remarked his friend, "I

Jon"-"Lion!" Interrupted Mr. Ginnett. 'Lion be blowed! It's the lamb I nean. He butts like a battering ram?" TWO TIMES AT BAT.

Roger Had His Inning, and Then His Fair Companion Had Hers.

Roger Bresnahan, former manager of the Cardinals, is made the doubtful bero of a story being told in St. Louis. According to the story teller a friend of Roger's asked him to take a certain young St. Louis lady to a ball game and explain its mysteries to her. Roger was game, and one afternoon when he was not catching he escorted the miss to the ball park and found seats in the stand well toward the front.

"Do you like baseball?" said Roger. "Oh, I dearly love it!" replied his companion. "The games are so excit-

"Well, just sit tight and I'll tell you all about it, so you'll thoroughly un-

derstand its fine points." "When will the game start?" was the next question.

"It's starting now," said Roger. "Do you see that man standing out there in the center of the diamond? Well. he's what we call the pitcher. He pitches the ball-see? The man who receives it is the catcher because be scmetimes catches it. Ha, ha! From right to left we have the first baseman, the second baseman, the shortstop and the third baseman, and those way out toward the fence are the fielders. Now the batter has just bit the ball for a single. It is called a

single because he is allowed to take one hase on the hit."

"Yep," came back the fair one, "I know that. But what is the boob tricking off first like that for? He knows that he can't take a lead like that and get away with it! Who does he think he is? Ty Cobb or Bescher? There he goes like a simp, trying to steal second with Dooin catching. Can you beat that for a solid ivory play. and the backstop signaling for a throwout all the time? If I had a brain like that I'd use a vacuum cleaner on it. Of course he's out a mile, the poor busher. I thought you were taking me to a ball game. Why, that fellow shouldn't be permitted to wander around without a nurse! If this is ace high baseball I'm woozy, and the next time"-

But Roger had fled.-New York Sun

Discipline of the Mind. The first step in the discipline of the mind is the overcoming of indolence. This is the easiest step, and until it is perfectly accomplished the other steps cannot be taken.-James Allen.

Worse Than Before.

A doctor had a very nervous patient One day he came to the doctor in great trouble. During the night, be said, he had accidentally swallowed a mouse. The doctor told him to get a cat and some toasted cheese and to lie on his back with his mouth open and the cheese on his nose. "Then," said the doctor, "when the mouse smells the cheese he will come up for it and the cat will then be able to catch it."

The man thanked him and went home. But the next day he was back again in worse trouble than ever. "Well, did you do as I told you?" asked the doctor. "Yes," said the man, "but while I was lying on my back fell off to sleep. Now the cat is missing and I'm afraid it has gone down after the mouse."-London Tit-Bits.

The Class Was On.

This story is told of an absentmind ed professor at Drew Theological seminary. One evening while studying he had need of a bookmark. Seeing nothing else handy he used his wife's scissors, which lay on the sewing table. A few minutes later the wife wanted

"HERE THEY ARE, DEAR!"

the scissors, but a diligent search fail ed to reveal them.

The next day the professor appeared before his class and opened his book There lay the lost scissors. He picked them up and, holding them above his head, shouted:

"Here they are, dear!" Yes, the class got it.-Everybody's.

The Only Way.

DIRT A CRIME.

Dirt is our universal sin. Not only health, but morals likewise. suffer in its presence Civic pride for a dirty city is the worst form of false pride. A reform of habits tending toward a lack of cleanliness is a crying need of most municipalities. Careless and dirty habits of citizens call for unnecessary expenditure of public funds, make for higher tax rates and therefore for high er rents. Give this matter a thought. Citizens themselves, not the city authorities, are responsible for street litter. A street can be littered by a few careless people much faster than it can be

The proper treatment for offenders of this type is for an officer of the law to take the offender in hand and compel him or her to pick up the litter and deposit it in one of the receptacles provided for such waste.

Another class of persons who persistently violate the law are storekeepers who sweep their wastes into the streets. Such offenders should be promptly arrested and heavily fined. A few such examples will have the desired effect.

We can have really clean streets only when we have really clean people. Will you not contribute your quota toward making your streets clean?-Dr. Arthur L. Murray. **********

TRAMWAYS AS CIVILIZERS.

Farreaching Effects of Street Care In the Old World,

If the steam railway brings civilization into savage countries, street cars or tramways certainly bring a measure of cleanliness into dirty towns.

The workers, who for countless generations have huddled together in filthy dens cooped up within the walls of an old town (for no man, in the days when banditti roamed everywhere outside arrow shot from the towers of a medieval town, dared to be outside its gates at night), now, by the aid of tramways, can live in the country in houses the rent of which is cheap and can go in to their work in the early morning by the tramcars. What the bicycle has done for English and French workmen the tramcar is doing for the near east good enough for cycling. In India, in China, in Africa and in South America the tramways are great civilizing in fluences as well as money making un dertakings.

Four tramway routes are to be laid down all starting from the Jaffa gate of Jerusalem. One of the lines is to run through the great business quarter outside Jerusalem, another line is to run through the new Jewish quarter beyond the walls, and the other two tram ines will be the tourist lines. One of them is to run the six miles out to Bethlehem and will pass many of the holy places which lie outside the citywells and tombs and convents-and the fourth is to circle the old city, with halting places at Gordon's Calvary, which is held by many scholars to have been the scene of the crucifixion; the Tomb of the Kings, the Valley of Jehoshaphat and the Mount of Olives. The existence of these tramways will make Jerusalem a far cheaper place for sightseeing than it has been heretofore.

Commercial Organizations.

In 1912 the bureau of foreign and domestic commerce issued a monograph entitled "Commercial Organizations" (Special Agents Series No. 60), coverng general features of commercial organization work. This is now supplemented by a second publication under the same title (Special Agents Series No. 79, obtainable for 10 cents from the government printing office Washington), in which the salient features of individual commercial organizations of twenty-five southern and western cities are covered. The data given are valuable not only as conveying information regarding the activities of the particular organizations mentioned, but notably as offering suggestions to those wishing to glean ideas on how to conduct commercial work in general. Intimate details are given as to the main objects of the organization, accomplishments achieved, under way or contemplated, methods of financing, etc. Among the larger cities whose commercial organizations are studied at length are Houston, New Orleans, Atlanta, San Antonio, Spokane, Seattle, Portland, San Francisco, Los Angeles, Minneapolis and St. Paul State wide consolidated hodies, such 23 the California development board and the associated chambers of com merce of the Pacific coast, are also in

Cleveland's Clean Up.

Recent efforts put forth by Cleveland residents, the first in the official cleanup and brighten up campaign, transformed the city into a Vesuvius that belched forth ashes and rubbish enough to have almost buried another Pompell.

More than 100 wagons, manned by 1,000 drivers, belpers and cleaners. gathered 226,800 cubic feet of ashes, rubbish and street refuse during the cleanup week. If placed in one spot this could have been made into a pile of the same dimensions as the twelve story tower of the Guardian Savings and Trust company's building. This tower, which rears its top above the neighboring buildings on Euclid aveman said in telling the story of the ac- | nue, is 150 feet high, with a tnirty foot

This amount of refuse and ashes would nave filled 184 gondola freight cars, which would have made a trate one rolle and a quarter long.

FOOLED THE OFFICIAL

A Russian Pessant Who Was Far Top Smart For the City Man.

Russian cities abound in sharpare and swindlers who are always on the alert for victims. A moujik-a Russian peasant-once paid a visit to Moscow. While admiring the Kremlin he noticed a lot of crows flying about its gilded towers and turrets. The crows were so many he began to count them. A swindler saw that the moutik looked easy and seized him by

"Young man, what are you doing?" he demanded.

"Nothing, sir," said the monjik; 'nothing but counting the crows."

"What! Counting the crows! That will cost you ten years in Siberia, Come along with me!"

But the moutik, holding back, whispered that he had a pocketful of mon-

ey and would be glad to buy his freedom from the supposed official.

"Humph! How many crows have you counted?" the latter asked, relaxing his severity a little.

"Only twenty. sir." "Humph! That's 10 kopecks aplece, Well, fish out 2 rubles and I'll let you

So the moulik paid the 2 rublesabout a dollar-to the swindler and went back home to his village rejoicclare in recounting his adventure:

"And they say that city people can easily swindle country folk. Well, it's the other way. Take my case. That fool thought I'd only counted twenty crows. Well-ha, ha, ha!-the fact is I'd counted over 200,"-Chicago Record-Herald.

Purpose.

Better the chance of shipwreck on a voyage of high purpose than to expend life in paddling hither and thither on a shallow stream to no purpose. at all.-Miss Sedgwick.

Gladstone's Persuasive Power. Stafford House was the Garibaldian headquarters in London during the visit of 1864, and a society pleasantry of the time was a proposal to marry the hero to the old Duchess of Sutherland. Sir Mountstuart Grant Duff in his diary tells how some severely practical person objected that this was impossible because Garibaldi had a wife al-

"Oh," said Abraham Hayward, "we'll put up Gladstone to explain her away."

A Ruse That Worked. A young lady took down the receiver of the telephone one day and discovered that the line was in use.

"I just put on a pan of beans for dinner," she heard one woman complacently informing another.

She hung up the receiver and waited for the conversation to end. Upon returning to the telephone she found the women still talking. Three times she waited, and then at last, becoming exasperated, she broke into the conversa-

"Madam, I smell your beans burning," she announced crisply.

A horrified scream greeted the remark, and the young lady was able to put in her call.-Everybody's.

A Miss and a Hit.

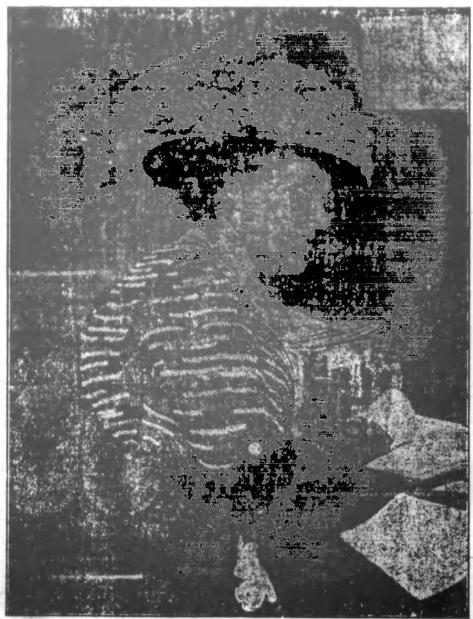

Pat was a young recruit and was undergoing his first course of musketry at Aldershot. The soldiers had just finished firing, and Pat was taken before the officer for his bad shooting, who told him he would have to do better at the next distance, which was seven rounds of quick firing. "Now, Pat, you fire at No. 5 target." Pat banged away his seven rounds and waited for the result, which showed be had hit No. 4 target the possible number of bits, but had not bit No. 5 target once. "What target did you aim at?" asked the irate officer. sir," answered Pat, "And have bit No. 4 every time," continued the officer, getting cross, "Bedad, sorr," retorted Pat, "'twould be a grand thing in war. Sure, I might aim at a private and hit a general?"

WORK IN SCIENTIFIC MANNER

Authorities of Paris Raise Their Own Flowers and Trees for Beautifying the City.

The raising, planting and upkeep of the trees which so beautify the streets and boulevards of Paris are under the direction of the prefecture of the department of the Seine, in which Paris is situated. A special administrative department of the prefecture, known charge of this undertaking, which, in a city like Paris, assumes very large proportions. For instance, on January 1, 1912, the total number of trees on the streets, boulevards and squares of planting, transplanting, watering and removing dead trees was 120, and the total cost of maintaining these trees was estimated at 500,000f. (\$96.500).

On an average 1,100 to 1,200 new trees are planted every year to replace those which have died, been overthrown by carts, automobiles, etc., or which have been removed for other reasons.

The city of Paris has large and varied plantations just outside the fortifications, where flowers, exotic shrubs and trees are raised. One hundred and thirteen bothouses for plants, exotic shrubs and flowers are heated from one central heating plant, distributing hot water through a nine and one-half mile system of pipes. The object of this central heating organization is not, as the head gardener explains, with a view to economy. In fact, such a system is far more costly than separate installations for each group of hothouses, but is thus arranged to avoid the existence of a series of unsightly chimneys which would destroy the artistic effect of the grounds. which are more or less a public resort and show place.

MONEY IN HOME GARDENS

Speakers at Boston Meeting Say Boys and Girls Are Making Their Training Profitable.

The application of home and school garden training may be said to have been in a general way the subject discussed at a meeting at Boston of the Home and School Garden Club of Massachusetts.

Prof. W. R. Hart of Amherst Agricultural college, the secretary of the club, declared that the home and school garden is now, so to speak, "a going proposition," and that after six years of urging the plan for urban, suburban and rural districts the idea is now to school children so they may turn the knowledge acquired in the gardens to the best advantage.

All the speakers laid stress on the fact that, aside from keeping children interested and profitably occupied, the garden training has resulted in considerable revenue to the youthful gardeners, once they have become reasonably proficient in growing vegetables and flowers. In the neighborhood of THE PERSON WHO KNOWS several large cities in the state the highly cultivated market gardens have been found to be excellent laboratories for the young students of gardening, and some boys from this beginning have graduated into the practical work of farming or market-gardening.

If the boys' work is planting and harvesting vegetables, there is a field for the girls in canning, and this branch was described by Laura Comstock of Amherst Agricultural college, extension professor in home economics. Miss Comstock exhibited a small wood-burning stove specially designed for steaming canned fruits or

Home Garden Contest.

Seven thousand school children of Spokane will participate in a city-wide home garden contest to be conducted this spring and summer by the chamber of commerce and Young Men's Christian association. Last year's contest, in which 3,500 children raised garden stuff valued at \$15,000, will be doubled in size this year, and the board of education will hire an expert agriculturist to direct the work of the amateur farmer. Instead of one large central fair in the autumn, as last year, there will be a series of "spring fairs," one in each of the 30 city school districts, the week after school closes in June, and the winners at these will take their exhibits to a central place the next day for the final contest. In the fall the pupils who wish to enter in the Spokane Intesstate fair for prises offered on garden products will take their exhibits individually to the fair. Competition in the "spring fairs" will be open to puptls in all schools from the fourth to the eighth grade. High school pupils will be eligible to bompete at the Interstate fair.
